lowes link: *Immigrant Acts* Lisa Lowe, 1996 In *Immigrant Acts*, Lisa Lowe argues that understanding Asian immigration to the United States is fundamental to understanding the racialized economic and political foundations of the nation. Lowe discusses the contradictions whereby Asians have been included in the workplaces and markets of the U.S. nation-state, yet, through exclusion laws and bars from citizenship, have been distanced from the terrain of national culture. Lowe argues that a national memory haunts the conception of Asian American, persisting beyond the repeal of individual laws and sustained by U.S. wars in Asia, in which the Asian is seen as the perpetual immigrant, as the foreigner-within. In *Immigrant Acts*, she argues that rather than attesting to the absorption of cultural difference into the universality of the national political sphere, the Asian immigrant--at odds with the cultural, racial, and linguistic forms of the nation--displaces the temporality of assimilation. Distance from the American national culture constitutes Asian American culture as an alternative site that produces cultural forms materially and aesthetically in

contradiction with the institutions of citizenship and national identity. Rather than a sign of a failed integration of Asians into the American cultural sphere, this critique preserves and opens up different possibilities for political practice and coalition across racial and national borders. In this uniquely interdisciplinary study, Lowe examines the historical, political, cultural, and aesthetic meanings of immigration in relation to Asian Americans. Extending the range of Asian American critique, *Immigrant Acts* will interest readers concerned with race and ethnicity in the United States, American cultures, immigration, and transnationalism.

lowes link: *Coleridge Notebooks V1 Notes* Kathleen Coburn, 2019-09-25 First published in 2002. Volume 1 of the notes on the Notebooks of Samuel Taylor Coleridge, spanning from 1794 to 1804. The volume is in two parts, text and notes. During his adult life until his death in 1834, Coleridge made entries in more than sixty notebooks. Neither commonplace books nor diaries, but something of both, they contain notes on literary, theological, philosophical, scientific, social and psychological matters, plans for and fragments of works and many other items of great interest. Shortly after World War II, Kathleen Coburn, formerly of Victoria College in Toronto, rediscovered this great collection of unpublished manuscripts. With the support of the Coleridge estate, she embarked on a career of editing and publishing these volumes and was awarded with many honours for her work, including: a Leverhulme Award (1948), a Guggenheim Fellowship (1953), a Fellowship in the Royal Society of Canada (1958), the Order of Canada (1974) and an honorary doctorate from her own university. Originally projected as a five volume set (each volume consisting of a book of text and a book of notes).
