mathworksheetisland: Substitute Nicholson Baker, 2017-09-05 **A New York Times Bestseller** “May be the most revealing depiction of the American contemporary classroom that we have to date. —Garret Keizer, The New York Times Book Review Bestselling author Nicholson Baker, in pursuit of the realities of American public education, signed up as a substitute teacher in a Maine public school district. In 2014, after a brief orientation course and a few fingerprinting sessions, Nicholson Baker became an on-call substitute teacher in a Maine public school district. He awoke to

the dispatcher's five-forty a.m. phone call and headed to one of several nearby schools; when he got there, he did his best to follow lesson plans and help his students get something done. What emerges from Baker's experience is a complex, often touching deconstruction of public schooling in America: children swamped with overdue assignments, overwhelmed by the marvels and distractions of social media and educational technology, and staff who weary themselves trying to teach in step with an often outmoded or overly ambitious standard curriculum. In Baker's hands, the inner life of the classroom is examined anew—mundane worksheets, recess time-outs, surprise nosebleeds, rebellions, griefs, jealousies, minor triumphs, kindergarten show-and-tell, daily lessons on everything from geology to metal tech to the Holocaust—as he and his pupils struggle to find ways to get through the day. Baker is one of the most inventive and remarkable writers of our time, and *Substitute*, filled with humor, honesty, and empathy, may be his most impressive work of nonfiction yet.

mathworksheetisland: *Like a Garment* Yasir Qadhi, 2019-03-04 As- Salaam Alaikum! I welcome you to our 'Like A Garment' e-book, an initiative that seeks to educate Muslims to find conjugal bliss in their marriages. The name of this project came from one of the most beautiful, poetic and profound metaphors of the Qur'an. Allah states, Permitted for you, during the night of the fast, that you approach your wives. They are your garments, and you are their garments [al-Baqarah; 187]. In this verse, each spouse is described as a 'garment' to the other. The famous exegete Ibn Jarir al-Tabari (d. 311) stated that this description most aptly described the act of intimacy between the spouses, for during that act, each spouse sheds his or her other garments and then wraps around the other, taking the place of clothes. Al-Qurtubi (d. 671) also comments on this metaphor, and adds that just as clothes protect their wearer from the external elements, similarly each spouse protects the other from external passions that would harm a marriage. Combining between the various explanations of this beautiful metaphor found in the books of tafseer, we can derive many meanings from it: - The act of procreation is so intimate that it is literally as if one of the spouses covers up the other, just as clothing covers up one's body. Another euphemism that the Qur'aan uses for the sexual act is the verb ghashsha, which means 'to cover up, to envelop'. - One primary purpose of clothing is to conceal one's nakedness, since this nakedness (or `awrah) is embarrassing to display, and should be hidden from the eyes of others. Similarly, each spouse conceals the other spouse's faults, and does not reveal them to others. - Clothing protects one from the external elements, such as heat and cold. Similarly, spouses protect one another from external desires that originate from many different sources. By satisfying these desires within the confines of marriage, external passions are removed. - Clothing is the primary method through which humans beautify themselves. Without clothing, one is incomplete and naked. Similarly, spouses beautify and complete one another; when a person is not married, he or she is not yet complete and has not reached his or her full potential. Marriage is an essential part of being fully human, just like clothes are an essential part of being fully civilized. - Clothes are only worn in front of others, and are not necessary in front of spouses. It is only in front of one's spouse that the other spouse can discard his or her garments. - Clothes are the closest thing to one's body. Nothing comes between a person and his or her clothes. So the analogy of spouses being 'like clothes to one another' implies such a closeness - there is nothing, literally and metaphorically, that should come between spouses.

Recent advances in financial econometrics, such as tools for estimating and representing the tails of the distributions, the analysis of correlation phenomena, and dimensionality reduction through factor analysis and cointegration are discussed in depth. Using a wealth of real-world examples, Focardi and Fabozzi simultaneously show both the mathematical techniques and the areas in finance where these techniques are applied. They also cover a variety of useful financial applications, such as: * Arbitrage pricing * Interest rate modeling * Derivative pricing * Credit risk modeling * Equity and bond portfolio management * Risk management * And much more Filled with in-depth insight and expert advice, The Mathematics of Financial Modeling & Investment Management clearly ties together financial theory and mathematical techniques.
