Anthropologist Erich Brauer interviewed a large number of these Kurdish Jews and wrote *The Jews of Kurdistan* prior to his death in 1942. Raphael Patai completed the manuscript left by Brauer, translated it into Hebrew, and had it published in 1947. This new English-language volume, completed and edited by Patai, makes a unique ethnological monograph available to the wider scholarly community, and, at the same time, serves as a monument to a scholar whose work has to this day remained largely unknown outside the narrow circle of Hebrew-reading anthropologists. *The Jews of Kurdistan* is a unique historical document in that it presents a picture of Kurdish Jewish life and culture prior to World War II. It is the only ethnological study of the Kurdish Jews ever written and provides a comprehensive look at their material culture, life cycles, religious practices, occupations, and relations with the Muslims. In 1950-51, with the mass immigration of Kurdish Jews to Israel, their world as it had been before the war suddenly ceased to exist. This book reflects the life and culture of a Jewish community that has disappeared from the country it had inhabited from antiquity. In his preface, Raphael Patai offers data he considers important for supplementing Brauer's book, and comments on the book's values and limitations fifty years after Brauer wrote it. Patai has included additional information elicited from Kurdish Jews in Jerusalem, verified quotations, corrected some passages that were inaccurately translated from Hebrew authors, completed the bibliography, and added occasional references to parallel traits found in other Oriental Jewish communities.

When Emperor Meiji began his rule in 1867, Japan was a splintered empire dominated by the shogun and the daimyos, cut off from the outside world, staunchly antiforeign, and committed to the traditions of the past. Before long, the shogun surrendered to the emperor, a new constitution was adopted, and Japan emerged as a modern, industrialized state. Despite the length of his reign, little has been written about the strangely obscured figure of Meiji himself, the first emperor ever to meet a European. But now, Donald Keene sifts the available evidence to present a rich portrait not only of Meiji but also of rapid and sometimes violent change during this pivotal period in Japan’s history. In this vivid and engrossing biography, we move with the emperor through his early, traditional education; join in the formal processions that acquainted the young emperor with his country and its people; observe his behavior in court, his marriage, and his relationships with various consorts; and follow his maturation into a “Confucian” sovereign dedicated to simplicity, frugality, and hard work. Later, during Japan’s wars with China and Russia, we witness Meiji’s struggle to reconcile his personal commitment to peace and his nation’s increasingly militarized experience of modernization. Emperor of Japan conveys in sparkling prose the complexity of the man and offers an unrivaled portrait of Japan in a period of unique interest. “Utterly brilliant . . . the best history in English of the emergence of modern Japan.”—Los Angeles Times

Barber (II), Jonathan Wilson-Hartgrove, 2016 In the summer of 2013, Moral Mondays gained national attention as tens of thousands of citizens protested the extreme makeover of North Carolina's state government and over a thousand people were arrested in the largest mass civil disobedience movement since the lunch counter sit-ins of 1960. Every Monday for 13 weeks, Rev. Dr. William J. Barber led a revival meeting on the state house lawn that brought together educators and the unemployed, civil rights and labor activists, young and old, documented and undocumented, gay and straight, black, white and brown. News reporters asked what had happened in state politics to elicit such a spontaneous outcry. But most coverage missed the seven years of coalition building and organizing work that led up to Moral Mondays and held forth a vision for America that would sustain the movement far beyond a mass mobilization in one state. A New Reconstruction is Rev. Barber's memoir of the Forward Together Moral Movement, which began seven years before Moral Mondays and extends far beyond the mass mobilizations of 2013. Drawing on decades of experience in the Southern freedom struggle, Rev. Barber explains how Moral Mondays were not simply a reaction to corporately sponsored extremism that aims to re-make America through state legislatures. Moral Mondays were, instead, a tactical escalation in the Forward Together Moral Movement to draw attention to the anti-democratic forces bent on serving special interests to the detriment of the common good--
