

mos roadmap usmc

mos roadmap usmc is a critical concept for any Marine aspiring to build a successful and fulfilling career within the United States Marine Corps. Understanding your Military Occupational Specialty (MOS) roadmap is paramount to navigating training, promotions, reenlistment, and even civilian transition. This comprehensive guide delves into the intricacies of the MOS roadmap for USMC personnel, exploring its fundamental components, how to effectively utilize it, and its long-term implications for career development. We will cover the initial stages of MOS selection, the importance of continuous training and skill development, and how your MOS roadmap influences advancement opportunities and future prospects.

Understanding Your USMC MOS Roadmap

What is a USMC MOS Roadmap?

The USMC MOS roadmap is essentially a structured career path designed for each Military Occupational Specialty. It outlines the progression of skills, training, and experience a Marine is expected to acquire throughout their service. Think of it as a blueprint for professional development within a specific field. This roadmap is not static; it evolves with the needs of the Marine Corps and technological advancements. For a Marine, understanding their MOS roadmap is akin to having a strategic plan for their entire enlistment and potentially beyond. It clarifies the journey from entry-level training to senior leadership roles within their chosen specialization.

Key Components of an MOS Roadmap

Several core elements constitute a typical USMC MOS roadmap. These components ensure a standardized and progressive development for all Marines within a particular MOS. Understanding these elements allows for proactive career management and informed decision-making.

Training and Education Requirements

At the heart of any MOS roadmap are the specific training courses and educational milestones a Marine must achieve. This begins with the initial MOS school upon graduating from recruit training, where foundational skills are imparted. As a Marine progresses, they will encounter follow-on training, advanced courses, and potentially resident professional military education. These requirements are meticulously detailed and serve as benchmarks for proficiency. For instance, an Infantryman (03XX) will have different training pipelines than an Aviation Mechanic (62XX), but both will have defined developmental stages.

Experience and Duty Assignments

Beyond formal schooling, practical experience is a cornerstone of the MOS roadmap. The roadmap often specifies the types of duty assignments that will provide valuable hands-on experience and skill refinement. This can include operational deployments, special duty assignments, instructor billets, or assignments within specific units that utilize the MOS's core competencies. Accumulating diverse and relevant experiences is crucial for demonstrating mastery and readiness for increased responsibility. The type and duration of these assignments are often mapped out to ensure well-rounded development.

Performance and Evaluation Metrics

The MOS roadmap also implicitly or explicitly considers performance metrics. This includes how a Marine's skills and contributions are evaluated through formal evaluations (e.g., Fitness Reports or FitReps), awards, and commander's input. Meeting or exceeding performance standards is critical for advancement along the roadmap. Understanding the criteria by which performance is measured within your MOS allows you to focus your efforts and demonstrate your value effectively.

Promotional Gates and Milestones

A significant aspect of the MOS roadmap is its correlation with promotion opportunities. Certain training, experiences, and demonstrated skill levels are often prerequisites for promotion to higher ranks. The roadmap helps Marines understand when they might be eligible for certain promotions and what qualifications they need to achieve to be competitive. This includes understanding the enlisted promotion system and how it aligns with MOS progression. For example, achieving the rank of Sergeant (E-5) often requires specific MOS-related schooling and demonstrated leadership potential.

Navigating Your MOS Roadmap for Career Advancement

Initial MOS Selection and Understanding

The journey of the MOS roadmap begins with the initial selection of an MOS. Recruits are often given opportunities to express preferences, but the final assignment is based on the needs of the Marine Corps. Once an MOS is assigned, it is vital for the new Marine to thoroughly understand the expectations and progression path associated with it. Seeking guidance from recruiters, drill instructors, and senior Marines in that MOS can provide invaluable insights into the roadmap's specifics.

Researching Available MOS Options

While preferences matter, understanding the full spectrum of available MOS options and their respective roadmaps can be beneficial. This research can inform initial preferences and provide a broader perspective on career possibilities within the USMC. Exploring the duties, training, and potential career paths associated with various MOSs can lead to a more informed and satisfying career choice.

Seeking Mentorship and Guidance

Mentorship is an indispensable tool for navigating any MOS roadmap. Experienced Marines who have successfully progressed within an MOS can offer invaluable advice, share lessons learned, and provide insights into hidden opportunities or potential challenges. Actively seeking out mentors who can guide you through the training, duty assignments, and evaluation processes is a proactive step towards career success.

Continuous Training and Skill Development

The Marine Corps emphasizes lifelong learning, and this is directly reflected in the MOS roadmap. Staying stagnant in terms of skill development is detrimental to career progression. Marines are expected to continuously enhance their existing skills and acquire new ones relevant to their MOS and the evolving operational environment. This commitment to continuous learning is not just about fulfilling requirements; it's about remaining an effective and valuable asset to the Corps.

Leveraging Professional Military Education (PME)

Professional Military Education is a structured pathway for advancing knowledge and leadership capabilities. Most MOS roadmaps incorporate specific PME courses at different career stages. Successfully completing these courses is often a prerequisite for promotion and demonstrates a commitment to professional growth. Marines should actively pursue these educational opportunities as they become eligible.

Pursuing Additional Military Certifications

Beyond the core MOS training, opportunities often exist to obtain additional military occupational certifications. These certifications can validate specialized skills and enhance a Marine's resume within the Corps. They signify a deeper level of expertise and can make a Marine more competitive for specific duty assignments or advanced training opportunities. These might include certifications in specific weapon systems, maintenance specialties, or intelligence analysis.

Understanding Reenlistment and Transition Implications

MOS Roadmap and Reenlistment Decisions

The MOS roadmap plays a crucial role in reenlistment decisions. Marines nearing the end of their initial enlistment often evaluate their career progression and future prospects within their MOS. A clear and promising MOS roadmap with opportunities for advancement and skill utilization can be a strong motivator for reenlistment. Conversely, a stagnant roadmap or a lack of future opportunities might lead a Marine to consider other paths.

Skills Gained and Civilian Career Transition

The skills and experiences acquired through diligently following an MOS roadmap are highly transferable to the civilian workforce. Many MOSs provide specialized technical, leadership, and problem-solving skills that are in high demand by employers. Understanding the civilian equivalencies of your USMC MOS training and experience is vital for a successful transition. A well-defined MOS roadmap can provide a structured framework for articulating these valuable civilian-ready skills.

Career Management and Planning Tools

The Marine Corps provides various tools and resources to help Marines manage their careers and understand their MOS roadmaps. This includes access to career counselors, online career management systems, and official publications detailing MOS requirements and progression. Proactively utilizing these resources is essential for making informed decisions about training, duty assignments, and reenlistment.

Frequently Asked Questions

What are the key strategic priorities outlined in the USMC's latest modernization roadmap?

The USMC's modernization roadmap, often referred to as Force Design 2030, prioritizes a shift towards a more agile, distributed, and lethal force capable of operating in contested environments. Key themes include developing advanced naval expeditionary capabilities, enhancing long-range precision strike, improving information warfare, and investing in next-generation platforms and systems.

How does the USMC roadmap address the challenge of operating in a peer-competitor environment?

The roadmap emphasizes adapting to threats posed by peer competitors, particularly in the Indo-Pacific. This involves developing capabilities for stand-in forces, integrating with naval assets for distributed maritime operations, and acquiring long-range precision fires to deter and defeat adversaries.

What technological advancements are central to the USMC's modernization efforts as defined by the roadmap?

Technological advancements are crucial. The roadmap focuses on integrating artificial intelligence, advanced networking, autonomous systems, unmanned aerial and ground systems, and directed energy weapons. These technologies aim to enhance situational awareness, lethality, and operational efficiency.

What are the implications of the USMC roadmap for future force structure and personnel?

The roadmap necessitates a significant restructuring of the Marine Corps. This includes divesting legacy platforms, creating new specialized units (e.g., Marine Littoral Regiments), and fostering a more technologically adept and adaptable Marine. It also implies a need for upskilling and retraining the existing force.

How does the USMC roadmap ensure interoperability with other U.S. military branches and allies?

Interoperability is a core tenet. The roadmap stresses the development of common operating pictures, shared communication systems, and joint training exercises to ensure seamless integration with the Navy, Air Force, Army, and allied forces. This is vital for multi-domain operations.

What is the role of the Marine Littoral Regiment (MLR) within the USMC roadmap?

The MLR is a cornerstone of the roadmap, designed to be a highly mobile, adaptable, and lethal force capable of operating from the sea in littoral environments. They are envisioned to possess advanced ISR, long-range precision strike, and anti-access/area denial capabilities, particularly in support of naval campaigns.

How is the USMC roadmap adapting to the evolving landscape of information warfare and cyber threats?

The roadmap recognizes information warfare as a critical domain. It includes investments in cyber capabilities, electronic warfare, intelligence, surveillance, and reconnaissance

(ISR), and strategies to counter disinformation and protect friendly networks. The aim is to gain and maintain information dominance.

What are the financial and resourcing challenges associated with implementing the USMC roadmap?

Implementing such a sweeping modernization program presents significant financial and resourcing challenges. It requires substantial investment in new technologies, platforms, and training, while also necessitating difficult decisions about divesting older capabilities. Balancing these competing demands and securing consistent funding are ongoing hurdles.

Additional Resources

Here are 9 book titles related to the USMC MOS roadmap, each with a short description:

1. The Marine Corps MOS Handbook: Your Comprehensive Guide to Enlisted Careers

This essential handbook provides an in-depth overview of every enlisted Military Occupational Specialty (MOS) offered by the United States Marine Corps. It details the training, daily duties, and career progression opportunities for each MOS, making it an invaluable resource for Marines planning their professional development. The book also offers insights into how specific MOS choices align with the broader USMC mission and potential civilian career paths.

2. Navigating Your USMC MOS Roadmap: From Recruit to Expert

This practical guide focuses on the journey a Marine takes in developing their chosen MOS. It breaks down the stages of learning, from initial entry-level training to advanced and specialized courses, emphasizing the importance of continuous skill development. Readers will find strategies for mentorship, professional networking within the Corps, and how to leverage their MOS expertise for future opportunities.

3. Understanding the MOS Pipeline: A Marine's Career Blueprint

This book delves into the structured progression inherent in the USMC MOS system, often referred to as the "pipeline." It explains the sequential nature of training and assignments that build proficiency and leadership within a particular MOS field. The narrative clarifies how individual MOS development contributes to the overall operational effectiveness of the Marine Corps.

4. Achieving MOS Excellence: Strategies for Success in the USMC

Focused on performance and advancement, this title offers actionable advice for Marines seeking to excel in their MOS. It covers topics such as setting career goals, seeking challenging assignments, and mastering the technical and tactical skills required. The book also highlights the importance of leadership qualities and how they are cultivated through MOS specialization.

5. The USMC MOS Code Explained: Decoding Your Future Military Career

This resource provides a clear and accessible explanation of the USMC's MOS coding system. It breaks down the numerical and alphabetical codes that define each specialty, offering context on their implications for training, assignments, and promotion. The book aims to demystify the MOS structure for Marines, helping them understand the

significance of their code.

6. Mapping Your USMC MOS Journey: A Practical Guide for Marines

This book is designed as a practical roadmap for Marines at various stages of their careers, offering guidance on selecting, developing, and advancing within their chosen MOS. It includes exercises and self-assessment tools to help Marines identify their strengths and align them with MOS requirements. The content emphasizes strategic career planning and continuous professional growth.

7. USMC MOS Specializations: Exploring the Depths of Marine Corps Expertise

This title explores the diverse range of specialized MOS fields within the Marine Corps, going beyond general descriptions to highlight the unique skills and challenges of each. It may feature interviews or case studies of Marines in specific MOS roles, showcasing the cutting-edge work they perform. The book aims to inspire Marines to consider a wide array of MOS options and understand their critical roles.

8. The Marine Corps MOS Progression Model: From Entry-Level to Leadership

This book examines the established framework for how Marines progress through their MOS, from initial training to becoming senior enlisted leaders. It outlines the typical milestones, required courses, and experience necessary for advancement at each level. The content is designed to help Marines understand the long-term career trajectory associated with their MOS.

9. Your USMC MOS and Beyond: Transitioning Your Military Skills to Civilian Life

While focused on the USMC MOS roadmap, this book also bridges the gap between military service and civilian careers. It helps Marines identify transferable skills developed within their MOS and how to effectively articulate these competencies to civilian employers. The book provides strategies for resume building, networking, and navigating the job market post-service, emphasizing the value of their MOS training.

Mos Roadmap Usmc

MOS Roadmap: USMC

Ebook Title: Navigating Your Marine Corps Career: A Comprehensive Guide to MOS Selection and Advancement

Outline:

Introduction: Understanding the Importance of MOS Selection in the USMC

Chapter 1: Understanding Military Occupational Specialties (MOSs) - Types of MOSs, demands, and future opportunities.

Chapter 2: The Enlistment Process and MOS Assignment - ASVAB scores, job preferences, and the realities of assignment.

Chapter 3: Popular MOS Pathways and Career Progression - Highlighting specific career paths and potential for advancement.

Chapter 4: MOS Training and Initial Occupational School (OCS) - What to expect during training, and succeeding in your assigned MOS.

Chapter 5: Advanced Training and Professional Military Education (PME) – Opportunities for further education and skill development within the USMC.

Chapter 6: Re-enlistment and Career Options – Considerations for re-enlistment, MOS changes, and civilian transition.

Chapter 7: Resources and Support Systems – Utilizing available resources for career planning and support.

Conclusion: Planning for a Successful and Fulfilling Marine Corps Career

Navigating Your Marine Corps Career: A Comprehensive Guide to MOS Selection and Advancement

Introduction: Understanding the Importance of MOS Selection in the USMC

Choosing a Military Occupational Specialty (MOS) is one of the most crucial decisions a Marine makes. Your MOS determines your job, training, responsibilities, and ultimately, your career trajectory within the United States Marine Corps. It's not simply about picking a job; it's about aligning your skills, interests, and aspirations with a path that offers personal and professional fulfillment. This roadmap will guide you through the process, helping you make informed decisions that will shape your future in the Corps. Understanding the long-term implications of your MOS choice is paramount; this guide helps you do just that.

Chapter 1: Understanding Military Occupational Specialties (MOSs)

The USMC offers a wide array of MOSs, categorized broadly into combat arms and combat support. Combat arms MOSs directly engage in offensive and defensive operations, including infantry, artillery, and tank crews. Combat support MOSs provide essential logistical, administrative, and technical support to combat units. Understanding these categories is the first step in narrowing down your options.

Within each category, numerous specializations exist. For example, within the infantry MOS, there are different roles and responsibilities, each requiring unique skill sets. Some MOSs are highly technical and require advanced training, while others may be more hands-on and physically demanding. Researching the specific duties, required qualifications, and long-term career prospects of each MOS is crucial. Consider factors such as physical fitness requirements, technological

aptitude, and personal interests when evaluating different options. The demand for specific MOSs also fluctuates, impacting assignment opportunities and potential for advancement. Staying up-to-date on current MOS demand is vital for strategic career planning.

Chapter 2: The Enlistment Process and MOS Assignment

The enlistment process begins with the Armed Services Vocational Aptitude Battery (ASVAB) test, which assesses your aptitudes in various areas. Your ASVAB score significantly influences your eligibility for different MOSs. Certain MOSs require higher scores than others due to the complexity and specialized skills needed. Beyond your ASVAB score, your expressed job preferences play a vital role. You'll rank your preferred MOS choices during the enlistment process, but it's important to understand that your final assignment depends on several factors, including MOS availability, current needs of the Corps, and your ASVAB score. You may not get your top choice, so having a realistic backup plan is essential. This chapter will detail the steps involved in the enlistment process, helping you understand the realities of MOS assignment and how to maximize your chances of obtaining your desired MOS.

Chapter 3: Popular MOS Pathways and Career Progression

This chapter delves into specific examples of popular MOS pathways and their career progression. It will highlight opportunities for advancement within each MOS, exploring potential leadership roles and specialized training. For instance, an infantry Marine might progress from a squad leader to a platoon sergeant, while a communications specialist might advance to a technical expert or management position. Each MOS offers unique routes to promotion and professional growth, and understanding these paths can significantly impact your long-term career goals. Examples of successful MOS career paths will be provided, showcasing the potential for both personal and professional satisfaction within the USMC.

Chapter 4: MOS Training and Initial Occupational School (OCS)

Once assigned an MOS, you'll undergo rigorous training at the appropriate Initial Occupational School (OCS). This chapter provides a detailed overview of what to expect during your training. It covers the curriculum, the physical demands, and the essential skills you'll acquire. Successful completion of OCS is vital for a successful career within your chosen MOS. This section offers guidance on maximizing your performance during training, including time management, physical fitness, and academic preparation. It will also address common challenges faced during OCS and provide strategies for overcoming them. The goal is to prepare you for the transition from recruit to trained Marine.

Chapter 5: Advanced Training and Professional Military Education (PME)

The USMC offers numerous opportunities for advanced training and Professional Military Education (PME) throughout your career. This chapter highlights these opportunities, showcasing how they can enhance your skills, improve your leadership potential, and open doors to specialized roles within your MOS or even career changes. Advanced training courses can focus on technical expertise, leadership development, or specialized skills related to your specific MOS. PME focuses on broader leadership, management, and strategic thinking skills. Successfully completing these courses can significantly enhance your career prospects and open doors to promotions and expanded responsibilities.

Chapter 6: Re-enlistment and Career Options

This chapter addresses the decision of re-enlistment. It outlines the factors to consider when making this decision, including career progression, personal goals, and financial implications. It also explores the possibility of changing MOSs during re-enlistment, highlighting the procedures and requirements. It provides guidance on planning for a smooth transition to civilian life after your service, including the utilization of available resources and programs. This section will also address the different career options available to Marines after leaving active duty, emphasizing the transferable skills gained during their time in the Corps.

Chapter 7: Resources and Support Systems

The USMC provides numerous resources and support systems to assist Marines in their career development and well-being. This chapter outlines these resources, including career counselors, educational programs, and mental health services. It emphasizes the importance of utilizing these resources to ensure career success and personal fulfillment. Understanding the available support network is crucial for navigating the challenges and opportunities that arise throughout a Marine's career.

Conclusion: Planning for a Successful and Fulfilling Marine Corps Career

Choosing an MOS is a significant decision, but with careful planning and informed decision-making, you can pave the way for a successful and fulfilling career in the USMC. This roadmap has provided a framework for understanding the process and making the most of your opportunities. Remember

to leverage the resources available to you, stay proactive in your career development, and consistently strive for excellence. Your future in the Marine Corps is within your grasp.

FAQs

1. What is the ASVAB test, and how important is it for MOS selection? The ASVAB is a crucial exam determining your eligibility for various MOSs. Higher scores open doors to a wider range of options.
2. Can I change my MOS during my service? Yes, but it's subject to the needs of the Marine Corps and your qualifications.
3. What are the common MOSs in high demand? Demand fluctuates, but typically, MOSs in cyber security, intelligence, and specialized technical fields see high demand.
4. How does the promotion system work within the USMC? Promotion is based on performance, time in grade, and availability of positions.
5. What are the educational benefits available to Marines? The Tuition Assistance program and the GI Bill provide significant educational opportunities.
6. What support is available for mental health concerns? The USMC offers comprehensive mental health resources, including counseling and support groups.
7. How can I prepare for my MOS training? Physical fitness, academic preparation, and a strong work ethic are essential.
8. What is the process for re-enlistment? Re-enlistment requires a meeting with a career counselor and a review of your qualifications.
9. What civilian job opportunities are available after leaving the Marines? Many skills gained in the USMC are highly transferable to civilian careers, including leadership, technical expertise, and teamwork.

mos roadmap usmc: *Implications of Integrating Women into the Marine Corps Infantry* Agnes Gereben Schaefer, Jennie W. Wenger, Jennifer Kavanagh, Jonathan P. Wong, Gillian S. Oak, Thomas E. Trail, Todd Nichols, 2015-12-03 This study for the U.S. Marine Corps presents a historical overview of the integration of women into the U.S. military and explores the importance of cohesion and what influences it. The gender integration experiences of foreign militaries, as well as the gender integration efforts of domestic police and fire departments, are analyzed for insights into effective policies. The potential costs of integration are analyzed as well.

mos roadmap usmc: Alert and Ready Christopher Paul, Harry J Thie, Katharine Watkins Webb, 2011-07 Over the past decade, especially, U.S. Marine Corps (USMC) intelligence has had to tailor its organization to meet the evolving demands of the operational environment. This has resulted in a number of ad hoc arrangements, practices, and organizations. A broad review of the organizational design of USMC intelligence examined how to align it efficiently and effectively with current and future missions and functions.

mos roadmap usmc: Alert and Ready Christopher Paul, Harry J. Thie, Katharine Watkins Webb, 2011 U.S. Marine Corps intelligence comprises a number of ad hoc arrangements, practices, and organizations. A review of its organizational design examined how to better align it with current and future missions and functions.

mos roadmap usmc: Implications of Integrating Women Into the Marine Corps Infantry Agnes Gereben Schaefer, Jennie W. Wenger, Jennifer Kavanagh, Jonathan P. Wong, Gillian S. Oak, Thomas E. Trail, Todd Nichols, 2015-12-03 This study for the U.S. Marine Corps reviews the history of the integration of women into the U.S. military and explores the role of cohesion, the gender integration of foreign militaries and domestic police and fire departments, and potential costs.

mos roadmap usmc: The 71F Advantage National Defense University Press, 2010-09 Includes a foreword by Major General David A. Rubenstein. From the editor: 71F, or 71 Foxtrot, is the AOC (area of concentration) code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires, first of all, a Ph.D. from a research (not clinical) intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one, with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving, and enhancing the health, well being, morale, and performance of Soldiers and military families. As is clear throughout the pages of this book, they do this in many ways and in many areas, but always with a scientific approach. This is the 71F advantage: applying the science of psychology to understand the human dimension, and developing programs, policies, and products to benefit the person in military operations. This book grew out of the April 2008 biennial conference of U.S. Army Research Psychologists, held in Bethesda, Maryland. This meeting was to be my last as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living. In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the grey-beards of the 71F clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of the Army Research Psychology

specialty while providing a representative sample of current 71F research and activities. It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families.

mos roadmap usmc: *First to Fight* V H Krulak, 1999-02-22 In this riveting insider's chronicle, legendary Marine General Brute Krulak submits an unprecedented examination of U.S. Marines—their fights on the battlefield and off, their extraordinary esprit de corps. Deftly blending history with autobiography, action with analysis, and separating fact from fable, General Krulak touches the very essence of the Corps: what it means to be a Marine and the reason behind its consistently outstanding performance and reputation. Krulak also addresses the most basic but challenging question of all about the Corps: how does it manage to survive—even to flourish—despite overwhelming political odds and, as the general writes, an extraordinary propensity for shooting itself in the foot? To answer this question Krulak examines the foundation on which the Corps is built, a system of intense loyalty to God, to country, and to other Marines. He also takes a close look at Marines in war, offering challenging accounts of their experiences in World War II, Korea, and Vietnam. In addition, he describes the Corps's relationship to other services, especially during the unification battles following World War II, and offers new insights into the decision-making process in times of crisis. First published in hardcover in 1984, this book has remained popular ever since with Marines of every rank.

mos roadmap usmc: *Department of Defense Chemical and Biological Defense Program Annual Report to Congress 2006* ,

mos roadmap usmc: *User's Guide for JOPES (Joint Operation Planning and Execution System)*. United States. Joint Chiefs of Staff, 1995

mos roadmap usmc: *Marine Recon Prep* Nick Koumalatsos, Josh Honsberger, 2018-04-09 This is a 12-week program designed to develop the strength and stamina to successfully complete every physical aspect of the Basic Reconnaissance Course (BRC). While having the overall stamina to be physically superior while attending your training at BRC. We have scientifically broken down the BRC requirements in order for you to optimize your potential without overtraining or causing injury. Understand, you are embarking on a journey where your teammates are going to have to rely on you. You being the weak link in the chain will jeopardize the team mission or even their life. Many have attempted to earn the title Recon Marine but very few accomplish that mission. Preparation, training, and mindset is everything.

mos roadmap usmc: Strengthening the Military Family Readiness System for a Changing American Society National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on the Well-Being of Military Families, 2019-10-25 The U.S. military has been continuously engaged in foreign conflicts for over two decades. The strains that these deployments, the associated increases in operational tempo, and the general challenges of military life affect not only service members but also the people who depend on them and who support them as they support the nation — their families. Family members provide support to service members while they serve or when they have difficulties; family problems can interfere with the ability of service members to deploy or remain in theater; and family members are central influences on whether members continue to serve. In addition, rising family diversity and complexity will likely increase the difficulty of creating military policies, programs and practices that adequately support families in the performance of military duties. Strengthening the Military Family Readiness System for a Changing American Society examines the challenges and opportunities facing military families and what is known about effective strategies for supporting and protecting military children and families, as well as lessons to be learned from these experiences. This report offers recommendations regarding what is needed to strengthen the support system for military families.

mos roadmap usmc: Military Occupational Specialties Manual (MOS Manual) United

States. Marine Corps, 1975

mos roadmap usmc: USMC User's Guide to Counseling , 1986

mos roadmap usmc: Utmost Savagery Estate of Joseph H Alexander, 2008-09-01 Marine combat veteran and award-winning military historian Joseph Alexander takes a fresh look at one of the bloodiest battles of the Pacific War. His gripping narrative, first published in 1995, has won him many prizes, with critics lauding his use of Japanese documents and his interpretation of the significance of what happened. The first trial by fire of America's fledgling amphibious assault doctrine, the violent three-day attack on Tarawa, a seemingly invincible Japanese island fortress of barely three hundred acres, left six thousand men dead. This book offers an authoritative account of the tactics, innovations, leadership, and weapons employed by both antagonists. Alexander convincingly argues that without the vital lessons of Tarawa the larger amphibious victories to come at Saipan, Iwo Jima, and Okinawa might not have been possible.

mos roadmap usmc: Warfighting Department of the Navy, U.S. Marine Corps, 2018-10 The manual describes the general strategy for the U.S. Marines but it is beneficial for not only every Marine to read but concepts on leadership can be gathered to lead a business to a family. If you want to see what make Marines so effective this book is a good place to start.

mos roadmap usmc: C4ISR for Future Naval Strike Groups National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee on C4ISR for Future Naval Strike Groups, 2006-04-26 The Navy has put forth a new construct for its strike forces that enables more effective forward deterrence and rapid response. A key aspect of this construct is the need for flexible, adaptive command, control, communications, computers, intelligence, surveillance, and reconnaissance (C4ISR) systems. To assist development of this capability, the Navy asked the NRC to examine C4ISR for carrier, expeditionary, and strike and missile defense strike groups, and for expeditionary strike forces. This report provides an assessment of C4ISR capabilities for each type of strike group; recommendations for C4ISR architecture for use in major combat operations; promising technology trends; and an examination of organizational improvements that can enable the recommended architecture.

mos roadmap usmc: Risk and Resilience in U.S. Military Families Shelley MacDermid-Wadsworth, David Riggs, 2010-11-03 War related separations challenge military families in many ways. The worry and uncertainty associated with absent family members exacerbates the challenges of personal, social, and economic resources on the home front. U.S. military operations in Iraq and Afghanistan have sent a million service personnel from the U.S. alone into conflict areas leaving millions of spouses, children and others in stressful circumstances. This is not a new situation for military families, but it has taken a toll of magnified proportions in recent times. In addition, medical advances have prolonged the life of those who might have died of injuries. As a result, more families are caring for those who have experienced amputation, traumatic brain injury, and profound psychological wounds. The Department of Defence has launched unprecedented efforts to support service members and families before, during, and after deployment in all locations of the country as well as in remote locations. Stress in U.S. Military Families brings together an interdisciplinary group of experts from the military to the medical to examine the issues of this critical problem. Its goal is to review the factors that contribute to stress in military families and to point toward strategies and policies that can help. Covering the major topics of parenting, marital functioning, and the stress of medical care, and including a special chapter on single service members, it serves as a comprehensive guide for those who will intervene in these problems and for those undertaking their research.

mos roadmap usmc: With the Old Breed E.B. Sledge, 2007-09-25 "Eugene Sledge became more than a legend with his memoir, *With The Old Breed*. He became a chronicler, a historian, a storyteller who turns the extremes of the war in the Pacific—the terror, the camaraderie, the banal and the extraordinary—into terms we mortals can grasp."—Tom Hanks NEW YORK TIMES BESTSELLER In The Wall Street Journal, Victor Davis Hanson named *With the Old Breed* one of the top five books on epic twentieth-century battles. Studs Terkel interviewed the author for his

definitive oral history, *The Good War*. Now E. B. Sledge's acclaimed first-person account of fighting at Peleliu and Okinawa returns to thrill, edify, and inspire a new generation. An Alabama boy steeped in American history and enamored of such heroes as George Washington and Daniel Boone, Eugene B. Sledge became part of the war's famous 1st Marine Division—3rd Battalion, 5th Marines. Even after intense training, he was shocked to be thrown into the battle of Peleliu, where "the world was a nightmare of flashes, explosions, and snapping bullets." By the time Sledge hit the hell of Okinawa, he was a combat vet, still filled with fear but no longer with panic. Based on notes Sledge secretly kept in a copy of the New Testament, *With the Old Breed* captures with utter simplicity and searing honesty the experience of a soldier in the fierce Pacific Theater. Here is what saved, threatened, and changed his life. Here, too, is the story of how he learned to hate and kill—and came to love—his fellow man. "In all the literature on the Second World War, there is not a more honest, realistic or moving memoir than Eugene Sledge's. This is the real deal, the real war: unvarnished, brutal, without a shred of sentimentality or false patriotism, a profound primer on what it actually was like to be in that war. It is a classic that will outlive all the armchair generals' safe accounts of—not the 'good war'—but the worst war ever."—Ken Burns

mos roadmap usmc: *Returning Home from Iraq and Afghanistan* Institute of Medicine, Board on the Health of Select Populations, Committee on the Initial Assessment of Readjustment Needs of Military Personnel, Veterans, and Their Families, 2010-03-31 Nearly 1.9 million U.S. troops have been deployed to Afghanistan and Iraq since October 2001. Many service members and veterans face serious challenges in readjusting to normal life after returning home. This initial book presents findings on the most critical challenges, and lays out the blueprint for the second phase of the study to determine how best to meet the needs of returning troops and their families.

mos roadmap usmc: *Service Member Separation* Michael Schwille, Agnes Gereben Schaefer, 2019-05-14 Electronic systems are becoming increasingly complicated and interconnected, and those of the U.S. Department of Defense (DoD) are no exception. Due to the evolution of electronic systems, combined with the need to save time, energy, and money, DoD plans to replace paper delivery of servicemember separation information with electronic delivery. A timely analysis is critical to ensure DoD is best positioned to optimize and effectively orchestrate this opportunity. Clear, authoritative information on characterization of service and reasons for separation is critical for individuals as they re-enlist, change duty status, or transfer into civilian employment; for dependents and survivors; for government agencies that adjudicate veteran status and benefits; and for military departments, as they move toward fully integrated digital databases. DoD's DD Form 214 has existed since the 1950s, when it standardized information across the services by replacing service-level forms. The form is largely unchanged since that time and has remained the defining document to verify a servicemember's discharge from active duty. As electronic information supplants paper, information provided by the services must continue to meet the important purposes of DD Form 214. To ensure consistency across the services and avoid omission of critical information, DoD needs an in-depth analysis of the current use of DD Form 214 to identify ways in which it could be improved to meet the diverse needs of the numerous organizations and individuals who use and depend on it.

mos roadmap usmc: *Leading Marines (McWp 6-10) (Formerly McWp 6-11)* Us Marine Corps, 2018-09-02 Marine Corps Warfighting Publication MCWP 6-10 (Formerly MCWP 6-11) *Leading Marines* 2 May 2016 The act of leading Marines is a sacred responsibility and a rewarding experience. This publication describes a leadership philosophy that speaks to who we are as Marines. It is about the relationship between the leader and the led. It is also about the bond between all Marines that is formed in the common forge of selfless service and shared hardships. It's in this forge where Marines are hardened like steel, and the undefinable spirit that forms the character of our Corps is born. It draws from shared experiences, hardships, and challenges in training and combat. *Leading Marines* is not meant to be read passively; as you read this publication, think about the material. You should reflect on, discuss, and apply the concepts presented in this publication. Furthermore, it is the responsibility of leaders at all levels to mentor

and develop the next generation of Marine leaders.

mos roadmap usmc: *U.S. Navy Program Guide - 2017* Department Of the Navy, 2019-03-12 The U.S. Navy is ready to execute the Nation's tasks at sea, from prompt and sustained combat operations to every-day forward-presence, diplomacy and relief efforts. We operate worldwide, in space, cyberspace, and throughout the maritime domain. The United States is and will remain a maritime nation, and our security and prosperity are inextricably linked to our ability to operate naval forces on, under and above the seas and oceans of the world. To that end, the Navy executes programs that enable our Sailors, Marines, civilians, and forces to meet existing and emerging challenges at sea with confidence. Six priorities guide today's planning, programming, and budgeting decisions: (1) maintain a credible, modern, and survivable sea based strategic deterrent; (2) sustain forward presence, distributed globally in places that matter; (3) develop the capability and capacity to win decisively; (4) focus on critical afloat and ashore readiness to ensure the Navy is adequately funded and ready; (5) enhance the Navy's asymmetric capabilities in the physical domains as well as in cyberspace and the electromagnetic spectrum; and (6) sustain a relevant industrial base, particularly in shipbuilding.

mos roadmap usmc: Building Toward an Unmanned Aircraft System Training Strategy Bernard Rostker, 2014 Unmanned aircraft systems (UASs) have become increasingly prevalent in and important to U.S. military operations. Initially serving only as reconnaissance or intelligence platforms, they now carry out such other missions as attacking enemy forces. The swift expansion in their numbers and in the demand for their employment has, however, significantly increased demands on logistics and training systems. The challenge is not simply training system operators but also training operational forces and their commanders to integrate the systems into combat operations. Much of that aspect of training has thus far happened as units employ the systems in actual operations - essentially, on-the-job training. UAS training, particularly for the employment of UASs, now needs to be integrated more formally and cost-effectively into service and joint training programs. This report develops a general concept for training military forces in employment of UASs and a framework for addressing the training requirements and discusses the limits of existing infrastructure in supporting UAS training. Interoperability among services is another issue, because services have thus far mainly developed training suitable for their own needs. But the services have established a set of multiservice tactics, techniques, and procedures for UASs, which should facilitate interoperability training. At present, units are not always ready for joint training, so the focus should be on improving training at the unit level in the employment of UAS capabilities, with the overall guiding principle being to train as we fight.

mos roadmap usmc: *Beyond the Military* Jason Roncoroni, Shauna Springer, 2019-11-11 After years of dedicated service, leaving might be the hardest mission for any military leader. If you're standing at the threshold of transition, fear and uncertainty are unspoken obstacles that can erode your confidence and excitement for what comes next. If you've already transitioned, you might still be struggling to find your place in society. No matter what you're feeling or where you are in this process, Jason Roncoroni and Dr. Shauna Springer want to partner with you on the journey for what happens next. Jason, an executive coach, and Doc Springer, a licensed psychologist, have combined their expertise and decades of experience to create the most comprehensive guide available for military leaders seeking happiness and fulfillment in life after the military. *Beyond the Military* applies the military decision-making process to help you confidently navigate transition. This handbook introduces an Integrative Program of Transition to address the critical aspects of transition that nobody else is talking about: optimizing whole health and wellness, social reintegration, cultural assimilation, economic stability, long-term professional development, and

close relationship and family adjustment. With Jason as your coach and Doc Springer as your relationship consultant, you'll walk through over 30 exercises designed to help you unleash your full potential outside the uniform.

mos roadmap usmc: A Historical Review and Analysis of Army Physical Readiness Training and Assessment Whitfield East, 2013-12 The Drillmaster of Valley Forge-Baron Von Steuben-correctly noted in his Blue Book how physical conditioning and health (which he found woefully missing when he joined Washington's camp) would always be directly linked to individual and unit discipline, courage in the fight, and victory on the battlefield. That remains true today. Even an amateur historian, choosing any study on the performance of units in combat, quickly discovers how the levels of conditioning and physical performance of Soldiers is directly proportional to success or failure in the field. In this monograph, Dr. Whitfield Chip East provides a pragmatic history of physical readiness training in our Army. He tells us we initially mirrored the professional Armies of Europe as they prepared their forces for war on the continent. Then he introduces us to some master trainers, and shows us how they initiated an American brand of physical conditioning when our forces were found lacking in the early wars of the last century. Finally, he shows us how we have and must incorporate science (even when there exists considerable debate!) to contribute to what we do-and how we do it-in shaping today's Army. Dr. East provides the history, the analysis, and the pragmatism, and all of it is geared to understanding how our Army has and must train Soldiers for the physical demands of combat. Our culture is becoming increasingly "unfit, due to poor nutrition, a lack of adequate and formal exercise, and too much technology. Still, the Soldiers who come to our Army from our society will be asked to fight in increasingly complex and demanding conflicts, and they must be prepared through new, unique, and scientifically based techniques. So while Dr. East's monograph is a fascinating history, it is also a required call for all leaders to better understand the science and the art of physical preparation for the battlefield. It was and is important for us to get this area of training right, because getting it right means a better chance for success in combat.

mos roadmap usmc: *Command in War* Martin Van Creveld, 1987-01-01 Many books have been written about strategy, tactics, and great commanders. This is the first book to deal exclusively with the nature of command itself, and to trace its development over two thousand years from ancient Greece to Vietnam. It treats historically the whole variety of problems involved in commanding armies, including staff organization and administration, communications methods and technologies, weaponry, and logistics. And it analyzes the relationship between these problems and military strategy. In vivid descriptions of key battles and campaigns—among others, Napoleon at Jena, Moltke's Königgrätz campaign, the Arab-Israeli war of 1973, and the Americans in Vietnam—Martin van Creveld focuses on the means of command and shows how those means worked in practice. He finds that technological advances such as the railroad, breech-loading rifles, the telegraph and later the radio, tanks, and helicopters all brought commanders not only new tactical possibilities but also new limitations. Although vast changes have occurred in military thinking and technology, the one constant has been an endless search for certainty—certainty about the state and intentions of the enemy's forces; certainty about the manifold factors that together constitute the environment in which war is fought, from the weather and terrain to radioactivity and the presence of chemical warfare agents; and certainty about the state, intentions, and activities of one's own forces. The book concludes that progress in command has usually been achieved less by employing more advanced technologies than by finding ways to transcend the limitations of existing ones.

mos roadmap usmc: Wired for War P. W. Singer, 2009-01-22 "[Singer's] enthusiasm becomes infectious . . . Wired for War is a book of its time: this is strategy for the Facebook generation."

—Foreign Affairs “An engrossing picture of a new class of weapon that may revolutionize future wars. . .” —Kirkus Reviews P. W. Singer explores the greatest revolution in military affairs since the atom bomb: the dawn of robotic warfare We are on the cusp of a massive shift in military technology that threatens to make real the stuff of I, Robot and The Terminator. Blending historical evidence with interviews of an amazing cast of characters, Singer shows how technology is changing not just how wars are fought, but also the politics, economics, laws, and the ethics that surround war itself. Travelling from the battlefields of Iraq and Afghanistan to modern-day skunk works in the midst of suburbia, *Wired for War* will tantalise a wide readership, from military buffs to policy wonks to gearheads.

mos roadmap usmc: Mcdp 5 Planning Department of Defense, 2017-05-22 This publication describes the theory and philosophy of military planning as practiced by the U.S. Marine Corps. The intent is to describe how we can prepare effectively for future action when the future is uncertain and unpredictable. In so doing, this publication provides all Marines a conceptual framework for planning in peace, in crisis, or in war. This approach to planning is based on our common understanding of the nature of war and on our warfighting philosophy of maneuver warfare as described in Marine Corps Doctrinal Publication (MCDP) 1, Warfighting.

mos roadmap usmc: The Reminiscences of a Marine John Archer Lejeune, 1930

mos roadmap usmc: Building Diplomacy Elizabeth Gill Lui, Keya Keita, Jane C. Loeffler, 2004 Embassy architecture and design ranges from the humble to the stately, from the practical to the grand. *Building Diplomacy* is the first comprehensive photographic portrait of the official face of American diplomacy around the world. Elizabeth Gill Lui traveled to fifty countries to photograph American embassies, chanceries, and ambassadors' residences. This record of her journey includes approximately five hundred artful and eloquent interior and exterior views shot by Lui with a large-format camera. Keya Keita, Lui's daughter and partner on the project, shot a live-action documentary of embassies and the cultural milieu of each nation Lui and Keita visited. The text includes an essay by Jane Loeffler detailing the history of the U.S. Department of State's building program. America's commitment to historic preservation of properties has been realized in Buenos Aires, London, Paris, Prague, and Tokyo. The modernist tradition is showcased in Argentina, Greece, India, Indonesia, Mexico, the Netherlands, and Uruguay. Vernacular buildings adapted to diplomatic use are widespread: Lui photographed examples of adapted reuse in Ghana, Iceland, Mongolia, Myanmar, and Palau. Buildings that reflect Europe's colonial legacy are also in evidence. After the 1983 bombing in Beirut, embassy construction began to reflect increased security concerns. Embassies built after 1998, although isolated within walled compounds, are well regarded by those who work in them. The author makes a case that embassy architecture is a critical aspect of American identity on the international landscape and can be formative in defining a new cultural diplomacy in the twenty-first century. Structured geographically, *Building Diplomacy* portrays embassies in Africa, East Asia, Europe, the Near East, the Pacific, South Asia, and the Western Hemisphere. An appendix lists the architects and designers of the featured buildings. More information about *Building Diplomacy* is also available.

mos roadmap usmc: Weaving the Tangled Web Christopher M Rein Editor, Christopher Rein, 2018-10-13 Volume 1, *Weaving the Tangled Web: Military Deception in Large-Scale Combat Operations* surveys twelve cases of MILDEC from World War I through Desert Storm focusing on how armies have successfully used preconceptions to either immobilize an opponent or force the expenditure of energy in unproductive directions. The case studies span the major wars of the twentieth-century from the perspectives of several great powers and offer both a primer for planners of military deception and a caution for all military personnel to remain constantly on guard for practitioners of this ancient art.

mos roadmap usmc: U.S. Marines in Afghanistan, 2001-2009 U S Marine Corps History Division, 2017-02-05 This volume presents a collection of 38 articles, interviews, and speeches describing many aspects of the U.S. Marine Corps' participation in Operation Enduring Freedom from 2001 to 2009. This work is intended to serve as a general overview and provisional reference to

inform both Marines and the general public until the History Division completes monographs dealing with major Marine Corps operations during the campaign. The accompanying annotated bibliography provides a detailed look at selected sources that currently exist until new scholarship and archival materials become available. From the Preface - From the outset, some experts doubted that the U.S. Marines Corps would play a major role in Afghanistan given the landlocked nature of the battlefield. Naval expeditionary Task Force 58 (TF-58) commanded by then-Brigadier General James N. Mattis silenced naysayers with the farthest ranging amphibious assault in Marine Corps/Navy history. In late November 2001, Mattis' force seized what became Forward Operating Base Rhino, Afghanistan, from naval shipping some 400 miles away. The historic assault not only blazed a path for follow-on forces, it also cut off fleeing al-Qaeda and Taliban elements and aided in the seizure of Kandahar. While Corps doctrine and culture advocates Marine employment as a fully integrated Marine air-ground task force (MAGTF), deployments to Afghanistan often reflected what former Commandant General Charles C. Krulak coined as the three-block war. Following TF-58's deployment during the initial take down of the Taliban regime, the MAGTF made few appearances in Afghanistan until 2008. Before then, subsequent Marine units often deployed as a single battalion under the command of the U.S. Army Combined Joint Task Force (CJTF) to provide security for provincial reconstruction teams. The Marine Corps also provided embedded training teams to train and mentor the fledgling Afghan National Army and Police. Aviation assets sporadically deployed to support the U.S.-led coalition mostly to conduct a specific mission or to bridge a gap in capability, such as close air support or electronic warfare to counter the improvised explosive device threat. From 2003 to late 2007, the national preoccupation with stabilizing Iraq focused most Marine Corps assets on stemming the insurgency, largely centered in the restive al-Anbar Province. As a result of the North Atlantic Treaty Organization (NATO) taking over command of Afghan operations and Marine Corps' commitments in Iraq, relatively few Marine units operated in Afghanistan from late 2006 to 2007. Although Marines first advocated shifting resources from al-Anbar to southern Afghanistan in early 2007, the George W. Bush administration delayed the Marine proposal for fear of losing the gains made as a result of Army General David H. Petraeus' surge strategy in Iraq. By late 2007, the situation in Afghanistan had deteriorated to the point that it inspired Rolling Stone to later publish the story How We Lost the War We Won. In recognition of the shifting tides in both Iraq and Afghanistan, the Bush administration began to transfer additional resources to Afghanistan in early 2008. The shift prompted senior Marines to again push for a more prominent role in the Afghan campaign, even proposing to take over the Afghan mission from the Army. . . .

mos roadmap usmc: Test & Evaluation Management Guide: August 2016 Department Of Defense, 2019-03-06 This PRINT REPLICA contains the 6th edition of the Test & Evaluation Management Guide (TEMG). The Test & Evaluation Management Guide is intended primarily for use in courses at DAU and secondarily as a generic desk reference for program and project management, and Test & Evaluation (T&E) personnel. It is written for current and potential acquisition management personnel and assumes some familiarity with basic terms, definitions, and processes as employed by the DoD acquisition process. The Test & Evaluation Management Guide is designed to assist Government and industry personnel in executing their management responsibilities relative to the T&E support of defense systems and facilitate learning during Defense Acquisition University coursework. The objective of a well-managed T&E program is to provide timely and accurate information to decision makers and program managers (PMs). The Test & Evaluation Management Guide was developed to assist the acquisition community in obtaining a better understanding of who the decision makers are and determining how and when to plan T&E events so that they are efficient and effective. Why buy a book you can download for free? We print this book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there - including all changes. If you find a good copy, you could print it using a

network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. The books are compact, tightly-bound, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>

mos roadmap usmc: Beyond Close Air Support Bruce Pirnie, Adam Grissom, Alan Vick, Karl P. Mueller, David T. Orletsky, 2005 Operations in Afghanistan and Iraq have renewed interest in close air support and the integration of air and ground power. In particular situations, either might predominate, and their relationship is likely to shift over the course of a campaign. This report addresses three questions: (1) How should air attack and ground maneuver be integrated? (2) How should the terminal attack control function be executed? (3) How should ground maneuver/fires and air attack be deconflicted? It recommends that the Army and the Air Force work together to develop new concepts and technologies to improve the partnering of air and ground. It recommends new processes to effectively designate targets and improved control mechanisms to exploit the benefits of the digital battlefield.

mos roadmap usmc: The Noncommissioned Officer and Petty Officer Department of Defense, National Defense University Press, 2020-02-10 The Noncommissioned Officer and Petty Officer BACKBONE of the Armed Forces. Introduction The Backbone of the Armed Forces To be a member of the United States Armed Forces--to wear the uniform of the Nation and the stripes, chevrons, or anchors of the military Services--is to continue a legacy of service, honor, and patriotism that transcends generations. Answering the call to serve is to join the long line of selfless patriots who make up the Profession of Arms. This profession does not belong solely to the United States. It stretches across borders and time to encompass a culture of service, expertise, and, in most cases, patriotism. Today, the Nation's young men and women voluntarily take an oath to support and defend the Constitution of the United States and fall into formation with other proud and determined individuals who have answered the call to defend freedom. This splendid legacy, forged in crisis and enriched during times of peace, is deeply rooted in a time-tested warrior ethos. It is inspired by the notion of contributing to something larger, deeper, and more profound than one's own self. Notice: This is a printed Paperback version of the The Noncommissioned Officer and Petty Officer BACKBONE of the Armed Forces. Full version, All Chapters included. This publication is available (Electronic version) in the official website of the National Defense University (NDU). This document is properly formatted and printed as a perfect sized copy 6x9.
