Understanding the NAHB Chart of Accounts

The National Association of Home Builders (NAHB) provides a standardized framework for construction industry accounting, known as the NAHB Chart of Accounts. This standardized system is designed to ensure consistency and comparability across different construction businesses. It categorizes financial transactions into specific accounts, making it easier to track income, expenses, assets, and liabilities. For construction companies, a well-defined chart of accounts is not merely a bookkeeping requirement; it's a fundamental tool for understanding the financial performance of projects and the overall business. The NAHB's guidelines are widely recognized and adopted within the industry, promoting best practices in financial management for home builders and remodelers.

The primary goal of the NAHB Chart of Accounts is to provide a clear and logical structure for recording financial data. This structure allows for detailed analysis of revenue streams, cost of goods sold, operating expenses, and other critical financial metrics. Without such a system, financial data can become disorganized, making it difficult to generate accurate financial statements or to identify trends and areas for improvement. The standardized nature of the NAHB framework simplifies the process for businesses looking to adopt a robust accounting system, especially when transitioning to digital platforms like spreadsheets.

Why Use an NAHB Chart of Accounts Excel Template?

Leveraging an NAHB Chart of Accounts Excel template offers a distinct advantage for construction businesses, particularly small to medium-sized enterprises. Excel's ubiquity and flexibility make it an accessible and powerful tool for financial management. A pre-designed template based on NAHB standards eliminates the need to build a chart of accounts from scratch, saving valuable time and reducing the risk of errors in initial setup. This readily available format allows businesses to quickly adopt a structured approach to their bookkeeping, focusing on their core operations rather than complex accounting system design.

The affordability and ease of use are significant factors. Many construction businesses may not yet have the resources for specialized accounting software, making an Excel template a cost-effective solution. Furthermore, Excel's familiar interface allows for intuitive data entry, modification, and reporting. Businesses can easily adapt the template to their specific needs, adding or removing accounts as required, and utilizing Excel's powerful features for calculations, sorting, and filtering. This practicality makes the NAHB Chart of Accounts Excel template an ideal starting point for organized financial tracking.

Key Components of an NAHB Chart of Accounts

A comprehensive NAHB Chart of Accounts typically comprises several key categories, each designed to capture specific types of financial information relevant to the construction industry. These categories ensure that all financial activities are systematically recorded and can be easily analyzed. Understanding these core components is essential for effective implementation and utilization of any NAHB Chart of Accounts Excel template.

Revenue Accounts

Revenue accounts track all income generated by the construction business. This includes primary revenue sources such as new home construction sales, remodeling services, and any other related services offered. Properly categorizing revenue ensures accurate tracking of income per project and overall business performance.

Cost of Goods Sold (COGS) Accounts

COGS accounts are critical for construction businesses as they directly relate to the cost of materials, labor, and direct expenses incurred in completing a construction project. This category is vital for calculating gross profit on individual jobs and for the business as a whole. Examples include costs for lumber, concrete, specialized subcontractors, and on-site labor directly tied to project completion.

Operating Expense Accounts

Operating expenses encompass all the costs associated with running the business that are not directly tied to a specific project's COGS. This broad category includes administrative salaries, office rent, utilities, marketing, insurance, and professional fees. Segmenting these expenses helps in understanding the overhead costs and in managing profitability.

Asset Accounts

Asset accounts represent what the business owns. For construction companies, this typically includes tangible assets like equipment (vehicles, machinery), inventory (if applicable, such as raw materials stored for future use), accounts receivable (money owed to the business by clients), and cash. Proper tracking of assets is crucial for assessing the company's financial standing and its ability to undertake new projects.

Liability Accounts

Liability accounts track what the business owes to others. This includes accounts payable (money owed to suppliers and subcontractors), loans, mortgages, and accrued expenses. Managing liabilities effectively is key to maintaining a healthy cash flow and ensuring the long-term solvency of the business.

Equity Accounts

Equity accounts represent the owner's stake in the business. This category includes owner's contributions, retained earnings, and drawings. It provides a picture of the net worth of the business and how it has grown or changed over time.

Customizing Your NAHB Chart of Accounts Excel Template

While an NAHB Chart of Accounts Excel template provides a solid foundation, customization is often necessary to align it perfectly with the unique operations of a specific construction business. Each company has its own way of categorizing costs and revenues, and a tailored chart of accounts leads to more accurate and insightful financial reporting. The flexibility of Excel makes this customization process relatively straightforward, empowering businesses to refine their financial tracking system.

Businesses should review their current projects and operational structure to identify any gaps or redundancies in the standard NAHB template. This might involve adding specific sub-accounts for different types of projects, services, or expense types that are particularly significant to their business model. For instance, a company specializing in custom kitchen remodels might need more detailed sub-accounts for cabinetry, countertops, and plumbing than a general contractor focused on new home builds.

Here are some areas where customization is commonly applied:

- **Project-Specific Accounts:** Creating unique revenue and COGS accounts for different project types (e.g., residential renovations, commercial builds, custom homes).
- **Detailed Expense Categories:** Breaking down general operating expenses into more granular sub-categories relevant to the business (e.g., specific software subscriptions, vehicle maintenance by type, specialized insurance policies).
- **Subcontractor Tracking:** Adding accounts to categorize expenses by key subcontractors or trades, allowing for better vendor management and cost analysis.
- **Material Tracking:** Developing detailed accounts for different categories of building materials to better understand procurement costs and inventory levels.
- **Equipment Costs:** Differentiating between rental costs, maintenance, and depreciation for various types of construction equipment.

The process involves carefully considering each existing account and determining if it adequately serves the business's reporting needs. Adding new accounts should be done logically, maintaining the hierarchical structure of a chart of accounts. It's also important to ensure that any custom accounts are clearly defined to avoid confusion during data entry. Documenting these customizations can be helpful for training new staff and for maintaining consistency over time.

Implementing Your NAHB Chart of Accounts Excel

Successful implementation of an NAHB Chart of Accounts Excel template is crucial for realizing its full benefits. This involves more than just downloading a file; it requires careful planning, data entry, and integration into daily business processes. A well-executed implementation ensures that the chart of accounts becomes a reliable tool for financial management, not just a static spreadsheet.

The first step in implementation is to ensure that all team members who will be involved in financial data entry are properly trained on the new chart of accounts. This includes understanding the purpose of each account and how to correctly categorize transactions. Clear guidelines and definitions for each account can be invaluable in this training process. Consistency in data entry is paramount for generating accurate reports.

Next, all existing financial data needs to be transferred or mapped to the new chart of accounts. This may involve going back through previous financial records to reclassify transactions according to the new structure. While this can be a time-consuming task, it is essential for establishing a clean and accurate financial history within the new system. For ongoing operations, integrating the chart of accounts into the daily workflow of invoicing, bill payment, and payroll is key. This means ensuring that when a transaction

occurs, it is immediately assigned to the correct account within the Excel template.

Regular review and reconciliation are also part of the implementation process. Periodically checking that the balances in your Excel chart of accounts align with bank statements and other financial records helps catch errors early and maintain data integrity. This ongoing diligence is what transforms a simple spreadsheet into a robust financial management system.

Benefits of Using an NAHB Chart of Accounts Excel for Reporting

The structured nature of an NAHB Chart of Accounts, especially when managed within an Excel environment, unlocks significant benefits for financial reporting in construction businesses. This structured approach allows for the generation of clear, concise, and insightful financial statements that are vital for understanding business performance and making informed decisions.

One of the primary benefits is enhanced clarity in financial reporting. Instead of a jumbled list of income and expenses, reports derived from a well-organized chart of accounts present a clear picture of where money is coming from and where it is going. This enables stakeholders to quickly grasp the financial health of the company and specific projects. For example, a detailed breakdown of project costs can immediately highlight which aspects of a build are exceeding budget, allowing for proactive adjustments.

Furthermore, an NAHB Chart of Accounts Excel template facilitates easier tax preparation. By categorizing income and expenses according to industry standards, accountants and tax professionals can more efficiently process financial information, potentially reducing preparation time and costs. This standardized reporting also aids in compliance with various industry regulations and financial reporting requirements.

The ability to generate key financial reports is greatly improved:

- **Profit and Loss Statements:** Clearly shows revenue, COGS, and operating expenses to determine profitability over a specific period.
- **Balance Sheets:** Provides a snapshot of the company's assets, liabilities, and equity at a given point in time.
- **Job Cost Reports:** Crucial for construction, these reports detail the revenue and expenses associated with individual projects, enabling accurate project profitability analysis.
- **Budget vs. Actual Reports:** Allows for comparison of budgeted figures against actual expenditures and revenues, identifying variances and potential areas for financial correction.

Beyond these core reports, the granular detail available through an NAHB Chart of Accounts Excel setup allows for deeper analysis. Businesses can track trends in material costs, labor expenses, or specific types of project

revenues over time. This data-driven insight is invaluable for strategic planning, setting realistic budgets, and identifying opportunities for cost savings or revenue growth. Ultimately, it empowers construction business owners to move from reactive to proactive financial management.

Best Practices for Managing Your NAHB Chart of Accounts

Effective management of an NAHB Chart of Accounts in Excel is an ongoing process that ensures the continued accuracy and usefulness of your financial data. Adhering to best practices will prevent common pitfalls and maximize the value derived from this critical accounting tool. Consistency, accuracy, and regular review are the cornerstones of good practice.

One of the most important practices is to maintain strict consistency in how transactions are recorded. This means ensuring that every team member understands the definitions of each account and applies them uniformly. Inconsistent categorization will quickly render financial reports unreliable. Regularly training new employees and providing refresher courses for existing staff can help uphold this consistency.

Another crucial best practice is regular reconciliation of your accounts. At least monthly, you should compare the balances in your Excel chart of accounts to your bank statements, credit card statements, and other financial records. This process helps identify any discrepancies, errors, or unauthorized transactions promptly. It's also advisable to perform a more thorough review of your chart of accounts at least annually. This review should assess whether the existing accounts still accurately reflect the business's operations and if any adjustments or additions are needed.

Here are some key best practices to implement:

- **Document Account Definitions:** Create a separate document or a dedicated sheet within your Excel file that clearly defines the purpose of each account. This serves as a reference guide for all users.
- **Perform Regular Audits:** Periodically conduct internal audits of your financial data to ensure accuracy and adherence to accounting policies.
- **Backup Your Data:** Regularly back up your Excel file to prevent data loss due to hardware failure, accidental deletion, or software issues. Store backups in a secure, off-site location.
- **Keep it Simple (When Possible):** While customization is important, avoid over-complicating your chart of accounts. Too many granular accounts can make data entry tedious and reporting cumbersome. Aim for a balance between detail and usability.
- **Seek Professional Advice:** Consult with an accountant or bookkeeper who is familiar with the construction industry. They can provide guidance on setting up and managing your chart of accounts for optimal financial performance and tax compliance.
- **Use Account Codes:** Assigning numerical or alphanumeric codes to each

account can streamline data entry and improve the organization of your spreadsheet, especially as the number of accounts grows.

By diligently applying these best practices, construction businesses can transform their NAHB Chart of Accounts Excel template from a simple record-keeping tool into a powerful engine for financial insight and strategic growth.

Frequently Asked Questions

What is the primary purpose of a NAHB Chart of Accounts Excel template?

The primary purpose of a NAHB Chart of Accounts Excel template is to provide home builders and remodelers with a standardized, industry-specific framework for organizing and tracking their financial transactions. This facilitates accurate job costing, financial reporting, and comparison to industry benchmarks.

Where can I find reliable NAHB Chart of Accounts Excel templates?

Reliable NAHB Chart of Accounts Excel templates can often be found on the National Association of Home Builders (NAHB) official website, through their affiliated state and local associations, or from reputable construction accounting software providers who offer downloadable templates or integrated solutions.

How does a NAHB Chart of Accounts differ from a generic accounting chart of accounts?

A NAHB Chart of Accounts is specifically tailored to the unique revenue streams, cost centers (e.g., land acquisition, construction labor, materials, subcontractors), and reporting requirements of the home building and remodeling industry. It includes specific accounts for things like work-in-progress (WIP), construction overhead, and homeowner-specific expenses that might not be present in a generic chart.

What are the key benefits of using an Excel template for a NAHB Chart of Accounts?

Key benefits include ease of customization, accessibility without specialized software, lower initial cost, and the ability to easily input and manipulate data. It's particularly useful for smaller builders or those transitioning to more formal accounting practices.

What are some common challenges when using an Excel template for a NAHB Chart of Accounts?

Common challenges include potential for data entry errors, lack of automated

integrations with other systems (like payroll or invoicing), difficulty in scalability as the business grows, and the need for manual updates and backups to prevent data loss or corruption.

Can a NAHB Chart of Accounts Excel template be integrated with accounting software?

While an Excel template itself is a standalone file, the chart of accounts structure within it can be used as a blueprint for setting up accounts in accounting software. Many accounting programs allow you to import or manually replicate chart of accounts structures, making the transition smoother.

Additional Resources

Here are 9 book titles related to NAHB Chart of Accounts in Excel, with short descriptions:

1. Mastering Construction Accounting with Excel and the NAHB Chart of Accounts

This practical guide demystifies the process of managing construction finances using the National Association of Home Builders (NAHB) Chart of Accounts. It walks readers through setting up and customizing Excel spreadsheets to track project costs, revenue, and profitability effectively. The book emphasizes best practices for data entry, reporting, and analysis, making it an invaluable resource for builders and accounting professionals.

2. Excel for Builders: Implementing the NAHB Chart of Accounts for Profitability

Designed specifically for home builders, this book focuses on leveraging the power of Excel to implement the NAHB Chart of Accounts. It provides step-by-step instructions for creating dynamic spreadsheets that align with industry standards, enabling better cost control and financial forecasting. Readers will learn how to generate insightful reports that highlight key performance indicators and support strategic decision-making.

3. The NAHB Chart of Accounts: A Practical Excel Guide for Small Builders

This accessible guide breaks down the NAHB Chart of Accounts into manageable components, specifically tailored for small to medium-sized home building businesses. It offers clear explanations and numerous Excel templates to help users set up their accounting systems from scratch. The book aims to empower smaller builders to gain better control over their financials and improve their bottom line.

4. Financial Reporting in Construction: Utilizing Excel with the NAHB Chart of Accounts

This book explores advanced financial reporting techniques within the construction industry, with a strong emphasis on using Excel and the NAHB Chart of Accounts. It delves into creating custom dashboards, performing variance analysis, and projecting future financial performance. The content is ideal for those looking to enhance their understanding of construction financial statements and their interpretation.

5. Budgeting and Job Costing in Excel: A NAHB Chart of Accounts Approach

Focusing on the critical areas of budgeting and job costing, this book demonstrates how to effectively utilize Excel in conjunction with the NAHB Chart of Accounts. It provides practical strategies for developing accurate project budgets and meticulously tracking actual costs against those budgets.

Readers will learn to identify cost overruns early and make informed decisions to protect project profitability.

6. NAHB Chart of Accounts in Action: Excel Templates for Real Estate Developers

This resource provides a collection of ready-to-use Excel templates designed for real estate developers, all built around the NAHB Chart of Accounts framework. It offers practical solutions for managing diverse development projects, from residential subdivisions to commercial properties. The book simplifies complex financial tracking and reporting, allowing developers to focus on their core business.

7. From Spreadsheets to Strategy: Optimizing NAHB Chart of Accounts with Excel

This insightful book goes beyond basic Excel usage to explore how the NAHB Chart of Accounts can be a strategic tool for construction businesses. It guides readers in transforming raw financial data from Excel into actionable insights for business growth. The focus is on leveraging the chart of accounts for better forecasting, risk management, and overall business improvement.

8. Troubleshooting Construction Finances: Common Errors and Excel Solutions with NAHB Chart of Accounts

This book addresses common financial challenges faced by construction companies and provides practical Excel-based solutions, all referencing the NAHB Chart of Accounts. It highlights typical accounting errors and offers step-by-step guidance on how to identify, correct, and prevent them using spreadsheet techniques. The aim is to ensure accuracy and compliance in construction financial management.

9. The Builder's Financial Toolkit: Excel and NAHB Chart of Accounts for Enhanced Management

This comprehensive toolkit equips builders with the essential Excel skills and knowledge of the NAHB Chart of Accounts needed for robust financial management. It covers everything from initial setup to detailed analysis, offering practical advice and reproducible templates. The book serves as a valuable reference for builders seeking to gain greater control and understanding of their company's financial health.

The Ultimate Guide to the NAHB Chart of Accounts Excel: Streamlining Your Home Building Business Finances

This ebook provides a comprehensive guide to utilizing the National Association of Home Builders (NAHB) Chart of Accounts in an Excel format, demonstrating its crucial role in managing the financial complexities of the home building industry, ensuring accurate reporting, and optimizing profitability. Effective financial management is paramount for success in this sector, and a well-

structured chart of accounts is the cornerstone of this process.

Ebook Title: Mastering the NAHB Chart of Accounts in Excel: A Home Builder's Financial Management Handbook

Contents:

Introduction: Understanding the Importance of a Standardized Chart of Accounts.

Chapter 1: The NAHB Chart of Accounts Explained: Detailed breakdown of the chart's structure and key account categories.

Chapter 2: Setting Up Your Excel Spreadsheet: Step-by-step guide to creating and customizing a NAHB-compliant Excel chart of accounts.

Chapter 3: Data Entry and Best Practices: Tips and techniques for accurate and efficient data entry, minimizing errors.

Chapter 4: Generating Financial Reports: Utilizing Excel formulas and functions to create insightful reports (Profit & Loss, Balance Sheet, Cash Flow).

Chapter 5: Integrating with Accounting Software: Seamless transition of data from Excel to your accounting software.

Chapter 6: Advanced Techniques and Customization: Exploring more advanced Excel features for enhanced financial analysis.

Chapter 7: Compliance and Auditing: Ensuring your financial records adhere to industry standards and best practices.

Conclusion: Recap of key takeaways and future considerations for financial management.

Detailed Outline Explanation:

Introduction: This section emphasizes the critical role of a structured chart of accounts in streamlining financial processes, improving accuracy, and facilitating informed decision-making within the home building industry. It will highlight the advantages of using the NAHB chart as a standardized framework.

Chapter 1: The NAHB Chart of Accounts Explained: This chapter provides a thorough explanation of the NAHB chart's structure, detailing each major account category (assets, liabilities, equity, revenue, expenses), its sub-categories, and their significance in tracking various aspects of a home building business. It will also discuss the differences between the various NAHB chart versions.

Chapter 2: Setting Up Your Excel Spreadsheet: This chapter offers a practical, step-by-step guide to creating an Excel spreadsheet that accurately reflects the NAHB chart of accounts. It covers topics such as creating account numbers, descriptive account titles, and setting up formulas for calculations. Examples of spreadsheet setup will be provided.

Chapter 3: Data Entry and Best Practices: This chapter focuses on the efficient and accurate input of financial data into the Excel spreadsheet. Best practices will be outlined to minimize errors, including data validation techniques, regular backups, and the importance of using consistent terminology.

Chapter 4: Generating Financial Reports: This chapter teaches readers how to leverage Excel's powerful functions (SUM, IF, VLOOKUP, etc.) to generate key financial reports like Profit & Loss statements, Balance Sheets, and Cash Flow statements directly from their NAHB-compliant spreadsheet. It will also cover data visualization techniques for easier understanding.

Chapter 5: Integrating with Accounting Software: This chapter explains how to seamlessly transfer data from the Excel spreadsheet to various accounting software programs commonly used in the home building industry. It will discuss import/export options and potential challenges.

Chapter 6: Advanced Techniques and Customization: This chapter explores more advanced Excel features, such as pivot tables, macros, and charting tools, to conduct deeper financial analysis, identify trends, and create customized reports tailored to specific needs.

Chapter 7: Compliance and Auditing: This chapter stresses the importance of compliance with accounting standards and best practices. It will discuss how a well-structured NAHB chart of accounts can aid in audits and ensure financial transparency.

Conclusion: This section summarizes the key learning points from the ebook, reinforcing the benefits of utilizing the NAHB chart of accounts in Excel, and offering guidance on ongoing financial management strategies and resources for further learning.

Frequently Asked Questions (FAQs)

1. What is the NAHB Chart of Accounts? The NAHB Chart of Accounts is a standardized accounting system developed by the National Association of Home Builders (NAHB) specifically designed for home building businesses. It provides a consistent framework for tracking financial transactions.
2. Why use the NAHB Chart of Accounts in Excel? Excel offers flexibility and affordability compared to dedicated accounting software. Using the NAHB Chart in Excel allows for customization and control, especially for smaller builders.
3. Can I adapt the NAHB chart to fit my specific business needs? Yes, while the NAHB chart provides a solid foundation, you can customize it by adding sub-accounts or modifying existing categories to reflect your unique business structure and requirements.
4. How often should I update my NAHB Chart of Accounts in Excel? Ideally, your chart should be updated regularly, at least monthly, to reflect current financial transactions and ensure accuracy.
5. What are the benefits of using a standardized chart of accounts? Standardization improves financial reporting consistency, simplifies data analysis, and makes it easier to compare financial

performance over time. It also aids in audits.

6. What if I don't have experience with Excel? The ebook provides step-by-step instructions suitable for users of all skill levels. Basic Excel knowledge is helpful but not mandatory.

7. Can I use the NAHB chart with other accounting software? Yes, you can use the NAHB chart as a foundation and later import the data into other accounting software. The ebook will guide you through this process.

8. What types of financial reports can I generate using this method? You can generate a wide range of reports including Profit & Loss, Balance Sheet, Cash Flow Statement, and customized reports tailored to your specific business analysis needs.

9. Where can I find the latest version of the NAHB Chart of Accounts? The most up-to-date versions are usually available on the NAHB website, often requiring membership access.

nahb chart of accounts excel: The Art of Islamic Banking and Finance Yahia Abdul-Rahman, 2009-12-09 A detailed look at the fast-growing field of Islamic banking and finance The Art of Islamic Banking and Finance is a modern American take on what it means to incorporate Islamic finance principles into everyday banking and investment techniques by introducing a new brand of banking for all people of all faiths: The Riba-Free (RF) banking. The author is considered the father of RF (Islamic) banking in America. He has been a banker and an Imam/scholar for over 40 years in America since 1968. He started the tedious process with a finance company, LARIBA, in Pasadena, California in 1987. This is the first book ever in the field to trace the origins of prohibiting the renting of money at a price called interest rate and over-indulging in debt. The book reviews in great details the theological foundations of prohibiting interest in the Jewish Bible, the Christian Bible, and the Qur'aan. The author then discusses money and how fiat money is created, the role of the Federal Reserve, and the banking system in America. The book also discusses for the first time ever how to include an important aspect of RF (Islamic) finance using commodity indexation and marking the items to be financed to market in order to avoid participating in economic bubbles. The author discusses how these rules work, how they affect consumer behavior, and how they change the role of the banker/financier. Covers a new pioneering model that is based on the Law (Shari'aa) and how it is applied in every transaction from joint ventures and portfolio management to home mortgages and personal financing Shows how to incorporate the Law (Shari'aa) into American financing and banking systems Points to RF (Islamic) finance and banking as a way to emphasize socially responsible investing The Art of Islamic Banking and Finance also includes a discussion on the emergence of a culture of RF (Islamic) banking and finance today, which is based on the real Judeo-Christian-Islamic spirit and very effective when compared to twentieth-century models that use financial engineering and structuring techniques to circumvent the Law (Shari'aa). The book also includes case studies based on the actual experience of the author and detailed analysis of the superior results realized by applying this new brand of banking to financing.

nahb chart of accounts excel: Better Data Visualizations Jonathan Schwabish, 2021-02-09 Now more than ever, content must be visual if it is to travel far. Readers everywhere are overwhelmed with a flow of data, news, and text. Visuals can cut through the noise and make it easier for readers to recognize and recall information. Yet many researchers were never taught how to present their work visually. This book details essential strategies to create more effective data visualizations. Jonathan Schwabish walks readers through the steps of creating better graphs and how to move beyond simple line, bar, and pie charts. Through more than five hundred examples, he demonstrates the do's and don'ts of data visualization, the principles of visual perception, and how to make subjective style decisions around a chart's design. Schwabish surveys more than eighty visualization types, from histograms to horizon charts, ridgeline plots to choropleth maps, and explains how each has its place in the visual toolkit. It might seem intimidating, but everyone can learn how to create compelling, effective data visualizations. This book will guide you as you define your audience and goals, choose the graph that best fits for your data, and clearly communicate your message.

nahb chart of accounts excel: *Pre-Columbian Foodways* John Staller, Michael Carrasco, 2009-11-24 The significance of food and feasting to Pre-Columbian Mesoamerican cultures has been

extensively studied by archaeologists, anthropologists and art historians. Foodways studies have been critical to our understanding of early agriculture, political economies, and the domestication and management of plants and animals. Scholars from diverse fields have explored the symbolic complexity of food and its preparation, as well as the social importance of feasting in contemporary and historical societies. This book unites these disciplinary perspectives — from the social and biological sciences to art history and epigraphy — creating a work comprehensive in scope, which reveals our increasing understanding of the various roles of foods and cuisines in Mesoamerican cultures. The volume is organized thematically into three sections. Part 1 gives an overview of food and feasting practices as well as ancient economies in Mesoamerica. Part 2 details ethnographic, epigraphic and isotopic evidence of these practices. Finally, Part 3 presents the metaphoric value of food in Mesoamerican symbolism, ritual, and mythology. The resulting volume provides a thorough, interdisciplinary resource for understanding, food, feasting, and cultural practices in Mesoamerica.

nahb chart of accounts excel: *Renewable Energy and Sustainable Buildings* Ali Sayigh, 2019-08-30 This book contains selected papers presented during the World Renewable Energy Network's 28th anniversary congress at the University of Kingston in London. The forum highlighted the integration of renewables and sustainable buildings as the best means to combat climate change. In-depth chapters written by the world's leading experts highlight the most current research and technological breakthroughs and discuss policy, renewable energy technologies and applications in all sectors - for heating and cooling, agricultural applications, water, desalination, industrial applications and for the transport sectors. Presents cutting-edge research in green building and renewable energy from all over the world; Covers the most up-to-date research developments, government policies, business models, best practices and innovations; Contains case studies and examples to enhance practical application of the technologies.

nahb chart of accounts excel: *Reducing Construction Costs* National Research Council,

Division on Engineering and Physical Sciences, Board on Infrastructure and the Constructed Environment, Federal Facilities Council, 2007-10-09 The National Academy of Construction (NAC) has determined that disputes, and their accompanying inefficiencies and costs, constitute a significant problem for the industry. In 2002, the NAC assessed the industry's progress in attacking this problem and determined that although the tools, techniques, and processes for preventing and efficiently resolving disputes are already in place, they are not being widely used. In 2003, the NAC helped to persuade the Center for Construction Industry Studies (CCIS) at the University of Texas and the Alfred P. Sloan Foundation to finance and conduct empirical research to develop accurate information about the relative transaction costs of various forms of dispute resolution. In 2004 the NAC teamed with the Federal Facilities Council (FFC) of the National Research Council to sponsor the Government/Industry Forum on Reducing Construction Costs: Uses of Best Dispute Resolution Practices by Project Owners. The forum was held on September 23, 2004, at the National Academy of Sciences in Washington, D.C. Speakers and panelists at the forum addressed several topics. Reducing Construction Costs addresses topics such as the root causes of disputes and the impact of disputes on project costs and the economics of the construction industry. A second topic addressed was dispute resolution tools and techniques for preventing, managing, and resolving construction-related disputes. This report documents examples of successful uses of dispute resolution tools and techniques on some high-profile projects, and also provides ways to encourage greater use of dispute resolution tools throughout the industry. This report addresses steps that owners of construction projects (who have the greatest ability to influence how their projects are conducted) should take in order to make their projects more successful.

nahb chart of accounts excel: Cities and Climate Change Daniel Hoornweg, Mila Freire, Marcus J. Lee, Perinaz Bhada-Tata, Belinda Yuen, 2011-06-02 This book provides the latest knowledge and practice in responding to the challenge of climate change in cities. Case studies focus on topics such as New Orleans in the context of a fragile environment, a framework to include poverty in the cities and climate change discussion, and measuring the impact of GHG emissions.

nahb chart of accounts excel: **Green Building with Concrete** Gajanan M. Sabnis, 2011-10-19 With superior fire resistance, strength, and a long service life, concrete is the most widely used construction material in the world. A sustainable material, concrete is also easily and affordably reused and rehabilitated. The first book to provide an overview of sustainability and concrete, *Green Building with Concrete: Sustainable Design and Construction* surveys the material's history in the green building movement and presents state-of-the-art methodologies and best practices. From the manufacturing of cement to the rehabilitation of concrete, this comprehensive book explains how concrete can be used for sustainable design and construction. It offers insight into new technological and social developments guiding the introduction of green buildings and examines the attributes that concrete has to offer the green building movement. The text also highlights research on economic analysis—particularly life cycle costing—to provide a full picture of the economic benefits of concrete. Expert contributors from around the world offer diverse viewpoints on global sustainability. Topics covered include: Principles of sustainable design Benefits of concrete's thermal mass Mitigation of urban heat island effects Surface runoff and the application of pervious concrete for sidewalks and parking areas Reduction of construction waste Leadership in energy and environmental design (LEED) standards Emphasizing environmental impact and occupational and consumer health and safety, this book explains how to make the most of concrete in sustainable design. Written for university and concrete industry continuing education courses, it also serves as a reference for building owners and industry professionals who recognize the value of green building.

nahb chart of accounts excel: Performance of 8 Cold-Climate Envelopes for Passive Houses Rolf Jacobson, 2012-09-10 Master's Thesis from the year 2011 in the subject Art - Architecture /

History of Construction, grade: none, University of Minnesota - Twin Cities (College of Design), language: English, abstract: Exterior envelopes for Passive Houses in very cold climates have not been developed, tested, and used as extensively as those in more mild climates such as central Europe. The purpose of this investigation was to push that development further by testing and comparing the performance of a variety of North American and Scandinavian envelope types that have been used in limited numbers for Passive Houses in those regions. A group of eight envelopes were selected and tested with a number of software analyses: Athena life cycle analysis, WUFI hygrothermal modeling, and THERM and EN ISO 6946 2-D U-value calculations for thermal bridging. Finally, the Passive House Planning Package (PHPP) was used to confirm that the envelopes met Passive House energy performance requirements in a very cold climate using a basic passive solar house design. Although significant variation was found in the performance of these eight envelope types, almost all of them were found capable of meeting the energy efficiency and thermal bridging requirements of the Passive House certification in a very cold climate, while maintaining moisture safety, durability, and significant life-cycle energy and carbon savings. These findings demonstrate that even in cold climates, a variety of envelope types can be used successfully for certified Passive Houses. Envelope types: 1) Advanced 2x6 framing 24" on center with interior cross strapping and exterior insulation, insulated with mineral wool, 2) Advanced 2x6 framing 24" on center, insulated with high-density spray polyurethane foam and exterior rigid foam, 3) Double 2x4 stud wall with studs 16" on center, insulated with blown cellulose, 4) I-joist (TJI) balloon framing 24" on center, insulated with blown fiberglass, 5) Insulated concrete form wall (ICF), using integral rigid EPS foam insulation, 6) Concrete block wall, insulated with exterior mineral wool, 7) Massivtre/Structural engineered panel (SEP), insulated with exterior rigid foam, and 8) Structural insulated panel (SIP), using integral EPS rigid foam insulation. For comparison, a base option was also studied: Standard 2x6 framing 16" on center with fiberglass batt insulation. See Appendix for diagrams of each envelope.

nahb chart of accounts excel: Strategic Marketing Russell Abratt, Michael Bendixen, 2018-07-04 This book is a unique collection of comprehensive cases that explore concepts and issues surrounding strategic marketing. Chapters explain what strategic marketing is, and then discuss strategic segmentation, competitive positioning, and strategies for growth, corporate branding, internal brand management, and corporate reputation management. With case studies from a broad range of global contexts and industries, including Burger King, FedEx, and Twitter, readers will gain a working knowledge of developing and applying market-driven strategy. Through case analysis, students will learn to: examine the role of corporate, business, and marketing strategy in strategic marketing; recognize the implications of markets on competitive space with an emphasis on competitive positioning and growth; interpret the various elements of marketing strategy and apply them to a particular real-world situation; apply sound decision-making strategies and analytical frameworks to specific strategic marketing problems and issues; apply ethical frameworks to strategic marketing situations. Strategic Marketing: Concepts and Cases is ideal for advanced undergraduate and postgraduate students, as well as those studying for an MBA or executive courses in strategic marketing or marketing management.

nahb chart of accounts excel: Construction Scheduling Jay S. Newitt, 2011-11-21 This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. This text is a comprehensive, stand alone reference for project management scheduling. It features a unique combination of principles/fundamentals of scheduling and project management along with practical applications and tutorials of the 4 most common scheduling software programs—Microsoft Project, Primavera Project Planner (P3), SureTrak, P6 Project Manager and Contractor. Having scheduling information and software instructions in one book obviates the need for two texts, and the exercises and examples in the scheduling portion are tied to the same exercises in the software portions.

nahb chart of accounts excel: Ijrvet International Journal for Research in Vocational Education and Training Michael Gessler, Karen Evans, Johanna Lasonen, 2019-01-07 The International Journal for Research in Vocational Education and Training (IJRVET) is a double blind peer-reviewed journal for VET-related research. This journal provides full open electronic access to its content on the principle that making research freely available to the science community and the public supports a greater global exchange of knowledge and the further development of expertise in the field of Vocational Education and Training (understood in a wide sense and also known as e.g. TVET Technical Vocational Education and Training, Professional Education and Training, Career and Technical Education, Workforce Education). All articles can also be downloaded from the IJRVET Homepage: <http://www.ijrvet.net>. IJRVET covers all topics of VET-related research from Career and Technical Education (CTE) and Initial Vocational Education and Training (IVET) to Workforce Education and Continuing Vocational Education and Training (CVET). The Yearbook includes all electronic articles published in 2018

nahb chart of accounts excel: The American Exception, Volume 2 Frank J. Lechner, 2017-01-09 This book examines what makes the United States an exceptional society, what impact it has had abroad, and why these issues have mattered to Americans. With historical and comparative evidence, Frank J. Lechner describes the distinctive path of American institutions and tracks changes in the country's national identity in order to assess claims about America's 'exceptional' qualities. The book analyzes several focal points of exceptionalist thinking about America, including the importance of US Constitution and the American sense of mission, and explores several aspects of America's distinctive global impact; for example, in economics and film. In addition to discussing the distinctive global impact of the US, this first volume delves into the economy, government, media, and the military and foreign policy.

nahb chart of accounts excel: Universal Design Handbook, 2E Wolfgang Preiser, Korydon H. Smith, 2010-10-11 The Latest Advances in Universal Design Thoroughly updated and packed with examples of global standards and design solutions, Universal Design Handbook, Second Edition, covers the full scope of universal design, discussing how to develop media, products, buildings, and infrastructure for the widest range of human needs, preferences, and functioning. This pioneering work brings together a rich variety of expertise from around the world to discuss the extraordinary growth and changes in the universal design movement. The book provides an overview of universal design premises and perspectives, and performance-based design criteria and guidelines. Public and private spaces, products, and technologies are covered, and current and emerging research and teaching are explored. This unique resource includes analyses of historical and contemporary universal design issues from seven different countries, as well as a look at future trends. Students, advocates, policy makers, and design practitioners will get a theoretical grounding in and practical reference on the physical and social roles of design from this definitive volume. UNIVERSAL DESIGN HANDBOOK, SECOND EDITION, COVERS: United Nations Convention on the Rights of Persons with Disabilities U.S. accessibility codes and standards, including the Americans with Disabilities Act (ADA) Life safety standards and guidelines Universal design implementations in Norway, Japan, France, Germany, Brazil, Italy and the Old City of Jerusalem Planning ADA implementation in public educational institutions Urban scale and mass transportation universal design Designing inclusive experiences, including outdoor play settings Office and workspace design

nahb chart of accounts excel: In Praise of Profits! Edward Yardeni, 2021-11-05 There has been much confusion about corporate profits. As a result, there has been lots of sloppy analysis and misinformed discussion of such important issues as the central role of profits in economic growth, the trend of profits, the corporate tax rate, the profit margin, profits' share of national income, and corporate share buybacks. The confusion has played into the hands of progressives, who claim that the profit motive results in income and wealth inequality. As I will show in this study, their narrative of the relationship between profits and prosperity is wrong and misleadingly pessimistic. Market-driven profit is the source of widespread prosperity, not its nemesis.

nahb chart of accounts excel: Predicting the Markets Edward Yardeni, 2018-02-12 I started my career on Wall Street in 1978. For the past 40 years on the Street, I have been thinking and writing about the economy and financial markets as both an economist and an investment strategist. While I have a solid academic background to be a Wall Street prognosticator, I learned a great deal on the job. In this book, I share my professional insights into predicting the economy and financial markets.
