## **Understanding Narcissistic Mothers: Traits and Behaviors**

Narcissistic personality disorder (NPD) is a complex mental health condition characterized by an inflated sense of self-importance, a deep need for excessive attention and admiration, troubled relationships, and a lack of empathy for others. When this disorder manifests in a mothering role, the consequences for her children, particularly her daughters, can be devastating. Narcissistic mothers often view their children as extensions of themselves, existing to fulfill their own needs and desires rather than as independent individuals with their own unique feelings and aspirations. This creates an environment where unconditional love and support are rarely present, replaced instead by conditional affection, manipulation, and a constant pressure to perform or please.

## **Core Traits of Narcissistic Mothers**

Identifying the specific traits of a narcissistic mother is the first step in understanding the dynamics at play. These mothers often exhibit a pervasive pattern of grandiosity, a belief in their own superiority, and an expectation of special treatment. They can be highly charming and charismatic, especially in

public, masking the more damaging aspects of their personality from the outside world. Within the family, however, their behavior can be quite different. They may struggle with empathy, finding it difficult to understand or acknowledge the feelings and experiences of their children. This lack of emotional attunement can leave daughters feeling unseen, unheard, and invalidated.

## **The Narcissistic Mother's Need for Control**

Control is a paramount concern for narcissistic mothers. They often exert significant control over their daughters' lives, dictating choices in relationships, career paths, and even personal appearance. This control is not necessarily born out of genuine care but rather out of a need to maintain a perfect image and ensure their daughter serves their purpose. Any deviation from their expectations can be met with criticism, guilt-tripping, or outright punishment, reinforcing the daughter's dependence and hindering her development of autonomy. This pervasive need for control can be a significant source of distress for grown daughters trying to establish their independence.

## **Idealization and Devaluation Cycles**

A hallmark of narcissistic relationships is the cycle of idealization and devaluation. In the early stages of a relationship, or at opportune moments, a narcissistic mother may shower her daughter with excessive praise and attention, making her feel incredibly special and loved. This phase is often short-lived. Once the daughter fails to meet the mother's unrealistic expectations, or if the mother perceives a slight, the daughter can be abruptly devalued. This can involve harsh criticism, withdrawal of affection, public humiliation, or being made to feel inadequate and unlovable. This emotional rollercoaster leaves daughters constantly walking on eggshells, desperate to regain the mother's approval.

## **The Impact on Grown Up Daughters: Emotional and**

# Psychological Scars

Growing up with a narcissistic mother can leave deep emotional and psychological scars that persist well into adulthood. Daughters raised in such environments often struggle with a diminished sense of self-worth, chronic self-doubt, and difficulty forming healthy relationships. The constant criticism, manipulation, and emotional neglect can warp a daughter's perception of herself and the world around her. They may internalize their mother's negative narratives, believing they are inherently flawed or not good enough. This internal struggle can impact all areas of their lives, from their professional endeavors to their intimate partnerships.

## Low Self-Esteem and Self-Doubt

A pervasive sense of inadequacy is a common consequence of being raised by a narcissistic mother. Because their own feelings and experiences were often dismissed or invalidated, daughters may learn to doubt their own perceptions and judgments. They may constantly seek external validation, always looking for approval from others because they never received it consistently from their primary caregiver. This can lead to a fragile sense of self that crumbles under pressure, making it difficult to make decisions or trust their own instincts. This deep-seated self-doubt is a hallmark of the lasting impact of narcissistic parenting.

## Difficulty with Boundaries

Learning to set and maintain healthy boundaries is a significant challenge for daughters of narcissistic mothers. Narcissistic mothers often disregard their children's personal space and emotional limits, viewing them as an extension of themselves. This can lead to adult daughters struggling to say "no," feeling guilty when they assert their needs, or allowing others to overstep their boundaries. The ingrained belief that their needs are less important than their mother's can make boundary-setting feel like an act of defiance or selfishness, even when it's a necessary step for self-preservation. Relearning how to establish and protect personal boundaries is a crucial aspect of healing.

## People-Pleasing Tendencies

To survive the unpredictable emotional landscape of a narcissistic mother, daughters often develop people-pleasing tendencies. They learn that appeasing their mother, anticipating her needs, and avoiding conflict is the safest way to navigate the relationship. This can translate into adulthood, where these daughters may find themselves constantly trying to gain the approval of others, often at the expense of their own well-being. This ingrained pattern can lead to burnout, resentment, and a feeling of being perpetually "on stage," never truly able to relax or be authentic.

## Anxiety and Depression

The chronic stress, emotional neglect, and instability inherent in relationships with narcissistic mothers can significantly contribute to the development of anxiety and depression in adult daughters. The constant feeling of walking on eggshells, the fear of rejection or criticism, and the struggle to maintain a stable sense of self can take a heavy toll on mental health. These emotional challenges are not a reflection of weakness but rather a predictable response to an invalidating and often toxic upbringing. Addressing these mental health concerns is a vital part of the healing process.

## Healing and Recovery: Strategies for Grown Up Daughters

The journey of healing from the effects of a narcissistic mother is often long and challenging, but it is also incredibly empowering. It involves understanding the dynamics of the relationship, grieving the unfulfilled needs, and actively working to build a healthier sense of self. This process often involves seeking professional support and implementing specific strategies to reclaim one's emotional well-being. Resources like a narcissistic mothers and grown up daughters pdf can offer guidance and validation for this critical process.

## **Establishing Healthy Boundaries**

One of the most crucial steps in healing is learning to establish and maintain healthy boundaries. This involves clearly defining what is and is not acceptable behavior from others, including the narcissistic mother. It requires consistent practice, and often, facing resistance or pushback. Learning to say "no" without guilt, limiting contact when necessary, and protecting one's emotional and physical space are all essential components of boundary setting. This is not about punishing the other person, but about protecting oneself and fostering a healthier relationship dynamic, or in some cases, disengaging from a toxic one.

## **Rebuilding Self-Esteem and Self-Worth**

Rebuilding self-esteem and self-worth is a central goal of recovery. This involves challenging the negative self-talk and internalized criticisms from the narcissistic mother. It often requires actively engaging in activities that foster a sense of competence and self-compassion. This might include pursuing hobbies, developing new skills, engaging in self-care practices, and surrounding oneself with supportive and validating people. Recognizing and celebrating one's own strengths and accomplishments, no matter how small, is vital in this process. Acknowledging the journey and celebrating progress is key.

## **Grieving the Lost Mother-Daughter Relationship**

A significant part of healing involves grieving the loss of the healthy mother-daughter relationship that was never fully realized. Daughters may need to mourn the conditional love, the lack of emotional attunement, and the unmet needs they experienced. This grief can be complex and may surface at different times and in different ways. Allowing oneself to feel and process these emotions, without judgment, is essential. This can be done through journaling, therapy, or creative expression. Acknowledging this loss is a powerful step towards emotional liberation.

## Seeking Professional Support

Professional support, such as therapy with a therapist experienced in narcissistic abuse and complex trauma, can be invaluable in the healing process. A therapist can provide a safe and supportive environment to explore the impact of the narcissistic mother, develop coping mechanisms, and learn effective strategies for boundary setting and self-care. They can also help in understanding the dynamics of narcissistic personality disorder and its effects on family relationships. Joining support groups, whether online or in person, can also provide a sense of community and shared understanding with others who have similar experiences.

## Developing a Strong Sense of Self

Ultimately, the goal of healing is to develop a strong and independent sense of self, separate from the influence of the narcissistic mother. This involves understanding one's own values, desires, and needs, and learning to trust one's own inner voice. It means recognizing that one's worth is not dependent on the approval or validation of others, especially those who have been consistently critical or manipulative. Cultivating a strong sense of self allows grown daughters to make authentic choices, build healthy relationships, and live a life that is true to themselves.

## Frequently Asked Questions

### **What are the common signs that a mother might have narcissistic traits and how does this impact her adult daughter?**

Common signs of a narcissistic mother include a constant need for admiration, a lack of empathy, a sense of entitlement, manipulative behavior, and a tendency to see her children as extensions of herself rather than individuals. For adult daughters, this can manifest as chronic self-doubt, people-pleasing tendencies, difficulty setting boundaries, a fear of abandonment, and a struggle with self-worth and identity. The daughter may have internalized the mother's critical voice and feel perpetually

'not good enough.'

## **How can an adult daughter cope with the emotional fallout from a narcissistic mother, and what strategies are effective?**

Coping strategies often involve establishing firm boundaries, which can be challenging due to the mother's resistance. This includes limiting contact, saying 'no' without guilt, and protecting one's emotional space. Developing self-compassion is crucial, as is seeking validation from healthy relationships outside the family. Therapy, particularly approaches like cognitive behavioral therapy (CBT) or trauma-informed therapy, can be invaluable for processing past hurts and developing healthier coping mechanisms.

## **What does 'going no-contact' or 'low-contact' with a narcissistic mother entail, and is it always the best solution?**

Going no-contact means ceasing all communication and interaction with the mother. Low-contact involves significantly reducing interactions to a bare minimum, often for specific necessary reasons like co-parenting younger siblings, and maintaining strict boundaries during these limited interactions. It's not always the 'best' solution for everyone, as the decision is deeply personal and depends on the daughter's individual circumstances, safety, and mental well-being. For some, it's essential for healing; for others, a carefully managed low-contact approach might be more feasible.

## **How does a daughter of a narcissistic mother navigate the holiday seasons or family gatherings, which can be particularly stressful?**

Navigating holidays often requires proactive planning. This can include setting strict time limits for visits, having an 'exit strategy,' bringing a supportive partner or friend, and practicing detachment by not engaging in arguments or seeking approval. It's also helpful to prepare responses to anticipated criticisms or guilt trips, and to focus on creating new, positive traditions with chosen family or friends. Prioritizing self-care before, during, and after these events is paramount.

# What are the long-term effects of having a narcissistic mother on a daughter's romantic relationships and friendships?

Adult daughters of narcissistic mothers may struggle with trust and intimacy in relationships. They might unconsciously gravitate towards partners who exhibit similar narcissistic traits (familiarity, even if unhealthy) or, conversely, seek highly empathetic partners who may be easily exploited. Difficulty with boundaries can lead to being overly accommodating or having unrealistic expectations. In friendships, they might struggle with vulnerability, fear rejection, or have an intense need for external validation, making it challenging to form deep and reciprocal connections.

This article delves into the complex dynamics of this challenging relationship, exploring the impact on adult daughters and offering pathways to healing and recovery. Understanding these dynamics is crucial for daughters seeking to reclaim their lives and build healthier futures.

## **1. Defining Narcissistic Personality Disorder and its Impact**

Narcissistic Personality Disorder is a personality disorder characterized by an inflated sense of self-importance, a need for excessive admiration, and a lack of empathy. Narcissistic mothers often exhibit a range of behaviors that negatively impact their daughters' development. These include:

**Emotional Manipulation:** Narcissistic mothers frequently use guilt, shame, and manipulation to control their daughters' behavior and emotions. This can involve gaslighting (making the daughter question her own reality), constant criticism, and emotional blackmail.

**Lack of Empathy:** They struggle to understand or acknowledge their daughters' feelings, needs, and perspectives. The daughter's emotions are often dismissed, invalidated, or used against her.

**Controlling Behavior:** Narcissistic mothers exert significant control over their daughters' lives, often interfering in their relationships, careers, and personal choices. This can extend well into adulthood.

**Idealization and Devaluation:** The daughter may experience periods of intense idealization followed by brutal devaluation, creating an unstable and unpredictable relationship dynamic. This leaves the daughter constantly walking on eggshells.

**Entitlement:** Narcissistic mothers often feel entitled to their daughters' time, energy, and emotional support without reciprocation.

These behaviors can significantly impact a daughter's self-esteem, sense of self, and overall well-being. The constant criticism and invalidation can lead to feelings of inadequacy, self-doubt, and anxiety. The lack of empathy can make the daughter feel invisible and unimportant.

## **2. The Dynamics of the Relationship: A Pattern of Abuse**

The relationship between a narcissistic mother and her daughter is often characterized by a cyclical pattern of abuse. This pattern can include:

**Triangulation:** The mother may pit the daughter against other family members, creating conflict and undermining the daughter's relationships.

**Projection:** The mother may project her own insecurities and flaws onto her daughter, blaming her for her own shortcomings.

**Boundary Violations:** The mother may consistently disregard the daughter's boundaries, intruding on her privacy and personal life.

**Emotional Neglect:** The daughter may experience a lack of emotional support and validation from her mother, leading to feelings of loneliness and isolation.

**Covert Abuse:** The abuse may be subtle and indirect, making it difficult for the daughter to recognize and articulate the harm she is experiencing.

This constant emotional manipulation and abuse can have profound and long-lasting effects on the daughter's psychological development.

### **3. The Daughter's Experience: A Landscape of Emotional Challenges**

Adult daughters of narcissistic mothers often struggle with a range of emotional and psychological challenges, including:

**Low Self-Esteem:** Years of criticism and invalidation can leave the daughter with a deeply ingrained sense of inadequacy.

**Anxiety and Depression:** The constant stress and uncertainty of the relationship can lead to significant anxiety and depression.

**Codependency:** The daughter may develop codependent behaviors, prioritizing her mother's needs over her own.

**Difficulty in Relationships:** The unhealthy relationship dynamic with her mother can impact her ability to form healthy relationships with others.

**Difficulty Setting Boundaries:** The daughter may struggle to set and maintain healthy boundaries due to her history of being controlled and manipulated.

**Trauma and PTSD:** In severe cases, the daughter may experience symptoms of trauma and post-traumatic stress disorder (PTSD).

Understanding these challenges is crucial for developing effective coping strategies and seeking appropriate support.

### **4. Breaking Free from the Cycle: Reclaiming Your Life**

Breaking free from the damaging effects of a narcissistic mother requires conscious effort and often professional guidance. Strategies include:

**Establishing Healthy Boundaries:** Learning to identify and enforce personal boundaries is paramount. This may involve limiting contact, saying no to unreasonable requests, and protecting

personal space.

**Seeking Therapy:** Therapy provides a safe and supportive space to process past trauma, develop coping mechanisms, and build self-esteem. Different therapeutic approaches, such as cognitive behavioral therapy (CBT) and trauma-informed therapy, can be highly effective.

**Self-Compassion:** Practicing self-compassion is vital in overcoming the self-criticism and self-doubt instilled by the narcissistic mother.

**Building a Supportive Network:** Surrounding oneself with supportive friends, family members, or support groups can provide crucial emotional support and validation.

**Focusing on Self-Care:** Prioritizing self-care activities, such as exercise, healthy eating, and mindfulness practices, can help manage stress and improve overall well-being.

These steps are crucial for the daughter to begin the process of healing and reclaiming her life.

## **5. Healing and Recovery: A Journey of Self-Discovery**

The healing process is a journey, not a destination. It requires patience, self-compassion, and ongoing effort. Key aspects of healing include:

**Processing Trauma:** Addressing the past trauma through therapy or other support mechanisms is vital for healing.

**Developing a Strong Sense of Self:** Rebuilding self-esteem and establishing a strong sense of self is crucial for long-term well-being.

**Forgiving Yourself:** Letting go of guilt and self-blame is essential for moving forward. Forgiveness, however, does not necessitate reconciliation with the narcissistic parent.

**Building Healthy Relationships:** Developing healthy relationships with others who provide love, support, and validation can counteract the negative impact of the past relationship.

**Creating a Meaningful Life:** Focusing on personal goals, passions, and values can contribute to a sense of purpose and fulfillment.

This journey of self-discovery allows the daughter to create a life free from the negative influence of her narcissistic mother.

## **Conclusion: A Path Towards Empowerment**

The impact of a narcissistic mother on her adult daughter can be profound and far-reaching.

However, with understanding, support, and self-awareness, it is possible to break free from the cycle of abuse and build a healthy, fulfilling life. This requires courage, resilience, and a commitment to self-care and personal growth. The journey to healing is personal and unique, but with the right tools and support, empowerment is achievable.

Dr. McBride's step-by-step program will enable you to: (1) Recognize your own experience with maternal narcissism and its effects on all aspects of your life (2) Discover how you have internalized verbal and nonverbal messages from your mother and how these have translated into a strong desire to overachieve or a tendency to self-sabotage (3) Construct a step-by-step program to reclaim your life and enhance your sense of self, a process that includes creating a psychological separation from your mother and breaking the legacy of abuse. mothers undeniably challenges the status quo in various ways, but most certainly needs to be addressed. Adult children of narcissistic parents are often plagued with such an abundance of guilt and sense of deep obligation and shame that it causes them to feel duty-bound to keep whatever happened in the family secret, even when it is destroying their lives. It's really difficult to share your experience in this case, because narcissists, and especially a narcissistic mother, can be very good at creating the perfect family image for outsiders looking in. The solution is not forgiving or forgetting. You should understand your situation and work on your self-development in order to take back control of your life.

**narcissistic mothers and grown up daughters pdf: Trapped in the Mirror** Elan Golomb, PhD, 2012-06-19 In this compelling book, Elan Golomb identifies the crux of the emotional and psychological problems of millions of adults. Simply put, the children of narcissist—offspring of parents whose interest always towered above the most basic needs of their sons and daughters—share a common belief: They believe they do not have the right to exist. The difficulties

experienced by adult children of narcissists can manifest themselves in many ways: for examples, physical self-loathing that takes form of overeating, anorexia, or bulimia; a self-destructive streak that causes poor job performance and rocky personal relationships; or a struggle with the self that is perpetuated in the adult's interaction with his or her own children. These dilemmas are both common and correctable, Dr. Golomb tells us. With an empathic blend of scholarship and case studies, along with her own personal narrative of her fight for self, Dr. Golomb plumbs the depths of this problem, revealing its mysterious hold on the affairs of otherwise bright, aware, motivated, and worthy people. *Trapped in the Mirror* explores the nature of the paralysis and lack of motivation so many adults feel stress and its role in exacerbating childhood wrongs why do many of our relationships seem to be reruns of the past how one's body image can be formed by faulty parenting how anger must be acknowledge to be overcome and, most important, how even the most traumatized self can be healed. Rooted in a profoundly humanist traditional approach, and suffused with the benefit of the latest knowledge about intrafamily relationships, *Trapped in the Mirror* offers more than the average self-help book; it is truly the first self-heal book for millions.

**narcissistic mothers and grown up daughters pdf: Healing the Adult Children of Narcissists** Shahida Arabi, 1990-01-23 Those who have had a narcissistic parent can testify to how damaging it can be to one's psyche. Narcissistic parents lack empathy, show a severe sense of entitlement to micromanage the lives of their children and often subject their children to neglect, as well as emotional, psychological and physical abuse. From the unique challenges daughters of narcissistic fathers face to the ways in which adverse childhood experiences affect our brains, Shahida Arabi's insightful essays resonate deeply with those who have been raised by narcissistic parents. In this new essay collection, Arabi explores how narcissistic abuse in childhood can set us up for trauma repetition in adulthood, affecting how we navigate relationships, the self, and the world. She pinpoints the toxic traits and behaviors of narcissistic mothers and fathers, exposing how covert abuse insidiously plays out in these specific dynamics. She offers the essential tools, skill sets and healing modalities for survivors who have undergone a lifetime's worth of abuse, helping them to break the cycle once and for all for future generations.

**narcissistic mothers and grown up daughters pdf: Narcissistic Mothers and Covert Emotional Abuse** Diana Macey, 2017-02 If you feel something was very wrong with your childhood, yet you are unable to point to any of the horrific abuse often talked about in the media, this book is for you. It is for adults who don't know why they struggle with the things in life that come naturally to others, who find socialising draining because they are easily affected by the moods and the words of others and cannot understand why sadness and dissatisfaction prevail in their lives, while others thrive with seemingly a lot less. If you struggle with such issues you might be an adult child of a covert narcissistic parent. Covert narcissistic parents break down their children's self-esteem and sense of self in order to manipulate them into serving their unhealthy needs and demands. The abuse is subtle and over time, it erodes the victim's personality, distorts their sense of reality and it does severe damage to their ability to function. And if you wonder why anyone would do that, the answer is simple; narcissists are not mentally healthy people and their goal is not to raise mentally healthy offspring. Most parents do not destroy their children. The narcissism is classified as a personality disorder for a reason, and it has to do with the predatory and inadequate way of sustaining their ego. It is classified as a cluster B personality disorder with a specific set of dynamics and outcomes. This book is not about the academic description, your parents might've had full blown narcissism or had strong tendencies, either way their unhealthy behaviour affected you and you need to understand what happened in order to heal. Other signs of such abuse are chronic anxiety, getting overwhelmed, concentration problems, substance abuse, irritability, flashbacks of humiliating moments from the past, inability to cope with failure and negative emotions, inability to enjoy the simple things others enjoy. This indicates something is majorly and fundamentally wrong with your mental state, and it is the result of the prolonged abuse you've been through. Worst of all, the abuse is not easily visible or widely acknowledged. Understanding the problem will help you start recovering. And, of course, this book is for those who already know about narcissism and narcissistic abuse. More specifically it's about covert narcissistic mothers, and how they inflict lasting damage on their children.

**narcissistic mothers and grown up daughters pdf: The Mother of All Questions** Rebecca Solnit, 2017-02-12 A collection of feminist essays steeped in "Solnit's unapologetically observant and truth-speaking voice on toxic, violent masculinity" (The Los Angeles Review). In a timely and incisive follow-up to her national bestseller Men Explain Things to Me, Rebecca Solnit offers sharp commentary on women who refuse to be silenced, misogynistic violence, the fragile masculinity of the literary canon, the gender binary, the recent history of rape jokes, and much more. In characteristic style, "Solnit draw[s] anecdotes of female indignity or male aggression from history, social media, literature, popular culture, and the news . . . The main essay in the book is about the various ways that women are silenced, and Solnit focuses upon the power of storytelling—the way that who gets to speak, and about what, shapes how a society understands itself and what it expects from its members. The Mother of All Questions poses the thesis that telling women's stories to the world will change the way that the world treats women, and it sets out to tell as many of those stories as possible" (The New Yorker). "There's a new feminist revolution—open to people of all

genders—brewing right now and Rebecca Solnit is one of its most powerful, not to mention beguiling, voices.”—Barbara Ehrenreich, New York Times—bestselling author of *Natural Causes* “Short, incisive essays that pack a powerful punch.” —Publishers Weekly “A keen and timely commentary on gender and feminism. Solnit’s voice is calm, clear, and unapologetic; each essay balances a warm wit with confident, thoughtful analysis, resulting in a collection that is as enjoyable and accessible as it is incisive.” —Booklist

**narcissistic mothers and grown up daughters pdf:** *The Narcissistic Family* Stephanie Donaldson-Pressman, Robert M. Pressman, 1997-07-15 In this compelling book, the authors present an innovative therapeutic model for understanding and treating adults from emotionally abusive or neglectful families? families the authors call narcissistic. Narcissistic families have a parental system that is, for whatever reason (job stress, alcoholism, drug abuse, mental illness, physical disability, lack of parenting skills, self-centered immaturity), primarily involved in getting its own needs met. The children in such narcissistic family systems try to earn love, attention and approval by satisfying their parents' needs, thus never developing the ability to recognize their own needs or create strategies for getting them met. By outlining the theoretical framework of their model and using dozens of illustrative clinical examples, the authors clearly illuminate specific practice guidelines for treating these individuals. Stephanie Donaldson-Pressman is a therapist, consultant, and trainer. She is known for her work with dysfunctional families, particularly with survivors of incest. Robert M. Pressman is the editor-in-chief and president of the Joint Commission for the Development of the Treatment and Statistical Manual for Behavioral and Mental Disorders.

**narcissistic mothers and grown up daughters pdf: Difficult Mothers: Understanding and Overcoming Their Power** Terri Apter, 2012-05-07 An essential work for readers seeking compassionate, wise guidance about the powerful relationship between mothers and their sons and daughters. Mother love is often seen as sacred, but for many children the relationship is a painful struggle. Using the newest research on human attachment and brain development, Terri Apter, an internationally acclaimed psychologist and writer, unlocks the mysteries of this complicated bond. She showcases the five different types of difficult mother—the angry mother, the controlling mother, the narcissistic mother, the envious mother, and the emotionally neglectful mother—and explains the patterns of behavior seen in each type. Apter also explores the dilemma at the heart of a difficult relationship: why a mother has such a powerful impact on us and why we continue to care about her responses long after we have outgrown our dependence. She then shows how we can conduct an “emotional audit” on ourselves to overcome the power of the complex feelings a difficult mother inflicts. In the end this book celebrates the great resilience of sons and daughters of difficult mothers as well as acknowledging their special challenges.

**narcissistic mothers and grown up daughters pdf:** *When You and Your Mother Can't Be Friends* Victoria Secunda, 2009-11-04 “A book of great value for every daughter and every mother; useful for sons, too.”—Benjamin Spock, M.D. From the Introduction: The goal of this book is to help readers achieve that separation so that they can either find a way to be friends with their mothers, or at least recognize and accept that their mothers did the best they could—even if it wasn't “good enough”—and to stop blaming them. Among the issues to be covered: • To understand how a daughter's attachment to her mother—more so than her relationship with her father—colors all her other relationships, and to analyze why it is more difficult for daughters than sons to separate from their mothers, as well as why daughters are more subject than sons to a mother's manipulation • To recognize the difference between a healthy and a destructive mother-daughter connection, and to define clearly the “bad mommy,” in order to help readers who have trouble acknowledging their

childhood losses to begin to comprehend them • To conjugate what I call the “Bad Mommy Taboo”—why our culture is more eager to protect the sanctity of maternity than it is to protect emotionally abused daughters • To describe the evolution of the unpleasable mother—in all likelihood, she was bereft of maternal love as a child—and to recognize the huge, and often poignant, stake she has in keeping her grown daughter dependent and off-balance • To illustrate the consequent controlling behavior—in some cases, cloaked in fragility or good intentions—of such mothers, which falls into general patterns, including: the Doormat, the Critic, the Smotherer, the Avenger, the Deserter • To understand that the daughter has a similar stake in either being a slave to or hating her mother—the two sides of her dependency and immaturity • To illustrate the responsive behavior—and survival mechanisms —of daughters, which is determined in part by such variables as birth rank, family history, and temperament, and which also falls into patterns, including: the Angel, the Superachiever, the Cipher, the Troublemaker, the Defector • To show how to redefine the mother-daughter relationship, so that each can learn to see and accept the other as she is today, appreciating each other's good qualities and not being snared by the bad • Finally, to demonstrate that a redefined relationship with one's mother—adult to adult—frees you from the past, whether that redefinition ultimately results in real friendship, affectionate truce, or divorce.
