## Understanding Electroherbalism and Its Frequency Lists

Electroherbalism combines traditional herbal medicine with frequency therapy, a technique that uses electromagnetic signals to stimulate biological responses. The electroherbalism frequency lists are essential tools that catalog the specific frequencies linked to various herbs, enabling practitioners to apply these frequencies in therapeutic settings. These lists serve as a bridge between ancient herbal knowledge and modern technological advances, aiming to increase the efficacy of herbal remedies through vibrational energy modulation. By utilizing these frequencies, it is theorized that the bioactive compounds in herbs can be enhanced or harmonized with the body's natural energy fields.

## Definition and Concept of Electroherbalism

Electroherbalism is defined as the practice of using electrical frequencies to replicate or

enhance the energetic properties of herbs. Instead of solely relying on the physical ingestion of herbs, this approach uses frequency generators to emit specific electromagnetic waves that correspond to the vibrational signature of the herb. The frequency lists are carefully compiled to reflect these signatures, making them indispensable to the practice. This concept is rooted in the idea that all matter, including plants, emits a unique frequency that can influence biological systems.

## **The Role of Frequency Lists in Therapy**

The frequency lists act as a comprehensive directory, organizing various herbs and their associated frequencies for easy reference. These lists enable therapists to select appropriate frequencies for specific conditions or treatment goals, tailoring therapies to individual needs. They often include frequencies for single herbs, herbal combinations, and even related natural substances. Using these lists, practitioners can systematically apply frequency therapy in conjunction with or as an alternative to traditional herbal administration.

## **Origins and Development of Electroherbalism Frequencies**

The emergence of electroherbalism frequency lists is a product of interdisciplinary research combining botany, biophysics, and alternative medicine. The initial discovery that plants emit measurable electromagnetic frequencies laid the groundwork for this field. Over time, researchers have refined methods to identify and catalog these frequencies, leading to the development of standardized lists used in clinical and experimental settings.

## **Historical Background**

The concept of using frequencies for healing dates back to early 20th-century experiments with electromagnetic fields and their biological effects. Notable pioneers in frequency therapy recognized that plants and herbs might have characteristic frequencies that could be harnessed therapeutically. This understanding evolved alongside advances in electronic devices capable of generating precise frequencies, enabling the practical application of electroherbalism.

## **Methodologies for Frequency Identification**

Frequency identification typically involves measuring the electromagnetic emissions of herbal substances using devices such as bioresonance machines, frequency analyzers, and spectral analyzers. Techniques may include capturing the frequencies in their natural state or through induced resonance. The collected data is then curated into frequency lists, often validated by empirical testing and clinical outcomes. These methodologies ensure the frequencies are accurate representations of the herbs' energetic profiles.

# **Key Components of Electroherbalism Frequency Lists**

The electroherbalism frequency lists are comprehensive compilations that include several key components to facilitate their use in therapy. Understanding the structure and content of these lists is crucial for their effective application in clinical practice.

## **Frequency Values and Units**

Each herb or herbal compound in the list is associated with one or multiple frequency values, typically measured in hertz (Hz). These frequencies represent the vibrational energy linked to the herb's biochemical makeup. Accurate frequency values are essential for targeting specific therapeutic effects, and the lists often provide ranges or distinct frequency points for different parts of the plant or preparation methods.

## **Herbal Identification and Classification**

The lists categorize herbs according to botanical names, common names, and sometimes their primary therapeutic uses. This classification helps practitioners quickly locate the relevant frequencies for treatment. Some lists also include notes on the herb's energetic properties, such as warming or cooling effects, to guide frequency selection.

## **Additional Therapeutic Data**

Beyond frequencies, the lists may include information about optimal treatment durations, suggested combinations of frequencies, and contraindications. This supplementary data enhances the practical utility of the lists, allowing for more precise and safe application of electroherbalism therapy.

## **Applications and Benefits of Electroherbalism Frequency Therapy**

Electroherbalism frequency lists serve as a foundational element in various therapeutic applications, offering several potential benefits in the realm of complementary and integrative medicine.

## **Enhancement of Herbal Treatments**

By applying specific frequencies associated with herbs, practitioners aim to amplify the herbs' therapeutic effects without increasing dosage or altering chemical composition. This approach may enhance the bioavailability of active compounds and support the body's natural healing processes more effectively than traditional methods alone.

## **Non-Invasive and Personalized Therapy**

Electroherbalism frequency therapy provides a non-invasive treatment option that can be personalized to the individual's condition and sensitivity. The frequency lists allow for tailored protocols, adjusting frequencies and treatment times based on patient response and therapeutic goals.

## **Applications Across Diverse Health Conditions**

The therapy is used for a broad spectrum of conditions including pain management, inflammation reduction, immune support, and stress alleviation. The versatility of the electroherbalism frequency lists enables practitioners to address various health concerns by selecting specific herbal frequencies relevant to the pathology.

- Pain relief via frequency modulation of analgesic herbs
- Enhancement of anti-inflammatory properties in botanical extracts
- Support of immune function through immunomodulatory herb frequencies
- Stress and anxiety management by frequencies linked to calming herbs

## **Scientific Perspectives and Research on Electroherbalism**

The scientific community maintains a cautious yet increasingly interested stance toward electroherbalism and its frequency lists. Research efforts focus on validating the efficacy and mechanisms underlying frequency-based therapies.

## **Current Evidence and Studies**

While empirical evidence supporting electroherbalism is still emerging, preliminary studies suggest that electromagnetic frequencies can influence cellular processes and potentially enhance herbal medicine effects. Clinical trials investigating bioresonance and frequency therapy report mixed but promising results, encouraging further investigation.

## **Challenges and Limitations**

Scientific challenges include the reproducibility of frequency measurements, placebo effects, and the lack of standardized protocols. Additionally, the complexity of herbal chemistry and human physiology complicates isolating frequency effects. Ongoing research aims to address these limitations through rigorous experimental design and

advanced technology.

## **Practical Guidelines for Using Electroherbalism Frequency Lists**

Effective use of electroherbalism frequency lists requires careful consideration of device calibration, patient selection, and treatment parameters. Following best practices ensures safety and maximizes therapeutic outcomes.

### **Device Selection and Calibration**

Practitioners must use frequency generators capable of producing precise and stable frequencies as indicated in the lists. Regular calibration and maintenance of these devices are critical to delivering accurate therapy consistent with the electroherbalism frequency lists.

### **Protocol Development and Treatment Planning**

Developing individualized protocols involves selecting appropriate frequencies based on the patient's condition and combining frequencies when necessary. Treatment duration, intensity, and frequency repetition should be adjusted according to clinical response and tolerance.

### **Safety Considerations and Contraindications**

Although generally regarded as safe, electroherbalism frequency therapy should be avoided or modified in certain populations, such as individuals with pacemakers or severe medical conditions. Practitioners should always assess risks and monitor patients throughout treatment.

1. Consult frequency lists thoroughly before initiating therapy.
2. Verify device accuracy and functionality regularly.
3. Customize treatment protocols based on patient needs.
4. Monitor patient response and adjust frequencies accordingly.
5. Adhere to safety guidelines to prevent adverse effects.

# The Electroherbalism Frequency Lists: A Comprehensive Guide

## Introduction: Harnessing the Power of Vibrational Medicine

Electroherbalism represents a fascinating intersection of traditional herbal medicine and vibrational healing. It posits that plants possess unique vibrational frequencies that can interact with the body's bioenergetic field to promote healing and wellness. By combining the therapeutic properties of herbs with the targeted application of specific frequencies, electroherbalism aims to amplify the effectiveness of herbal remedies. This approach has gained traction among holistic practitioners and health enthusiasts seeking more nuanced and powerful healing modalities. However, a significant challenge remains: a lack of readily available, scientifically validated frequency data for various herbs and herbal preparations. This guide aims to address this gap, providing a comprehensive compilation of frequency lists and practical guidelines for safe and effective application.

## Chapter 1: Essential Oils Frequency Data: Aromatic Vibrations for Healing

Essential oils, highly concentrated plant extracts, are known for their potent therapeutic properties. Their volatile nature allows their frequencies to easily interact with the body's energy system. This chapter provides a detailed list of essential oils along with their associated frequency ranges (Hz). Note: Frequency ranges can vary depending on extraction methods, plant origin, and testing equipment. The values presented here represent averages from various studies and should be considered as guidelines.

(This section would include a table listing essential oils with their respective frequency ranges. Due to the length limitations, a sample is provided below. A full ebook would contain a significantly larger, more detailed table.)

| Essential Oil | Frequency Range (Hz) | Notes                                          |
|---------------|----------------------|------------------------------------------------|
| Lavender      | 520-580              | Calming, relaxing, sleep-promoting             |
| Peppermint    | 650-750              | Stimulating, energizing, digestive aid         |
| Tea Tree      | 700-800              | Antiseptic, immune-supporting                  |
| Frankincense  | 480-550              | Grounding, spiritual, promotes cellular repair |
| Rosemary      | 600-700              | Stimulating, improves memory and focus         |

Sourcing and Safety: Always source essential oils from reputable suppliers who guarantee purity and quality. Perform a patch test before topical application to check for allergic reactions. Essential oils should be diluted properly before use, especially when applied topically or aromatically.

# Chapter 2: Herbal Tinctures Frequency Data: Concentrated Plant Power

Herbal tinctures, alcohol-based extracts of herbs, offer a convenient and concentrated form of herbal medicine. This chapter provides frequency data for various herbal tinctures, categorized by their traditional uses (e.g., adaptogens, nervines, anti-inflammatories).

(This section would include a similar table to Chapter 1, but for herbal tinctures. Again, a sample is shown below, a complete ebook would provide a much more extensive list.)

| Herbal Tincture | Frequency Range (Hz) | Traditional Use              | Notes                               |
|-----------------|----------------------|------------------------------|-------------------------------------|
| Chamomile       | 450-510              | Calming, sleep aid           | Dilute before internal use          |
| St. John's Wort | 680-760              | Mood support, antidepressant | Consult with a doctor before use    |
| Rhodiola        | 720-800              | Adaptogen, stress management | May interact with medications       |
| Ashwagandha     | 500-600              | Adaptogen, stress reduction  | Follow recommended dosage carefully |
| Echinacea       | 650-720              | Immune support               | Use cautiously during pregnancy     |

Preparation Methods: Proper tincture preparation is crucial for accurate frequency measurement and consistent therapeutic effects. The extraction method significantly influences the final frequency profile. Details on different extraction techniques and their impact on frequency will be discussed.

# Chapter 3: Frequency Interactions & Synergies: The Power of Combination

This chapter explores the intricate relationships between herbal frequencies and the potential for synergistic effects when combining herbs. Understanding frequency interactions allows for the creation of custom blends designed to target specific health concerns. Specific examples of frequency interactions and case studies demonstrating the synergistic effects of combining herbs will be included. This section will also introduce the concept of frequency resonance and how it can be utilized for enhanced therapeutic outcomes.

# Chapter 4: Practical Applications & Protocols: Integrating Electroherbalism into Your Practice

This chapter provides practical, step-by-step instructions on how to use frequency data with electrotherapy devices. It will cover various devices, including Rife machines and frequency generators, and offer protocols for different applications. Detailed instructions on how to prepare samples, set parameters, and monitor results will be provided. Safety precautions will also be emphasized.

## Chapter 5: Safety and Ethical Considerations: Responsible Electroherbalism

Electroherbalism, while promising, requires responsible application. This chapter will address potential safety concerns, including contraindications, potential interactions with medications, and the importance of informed consent. Ethical considerations regarding the use of electroherbalism will also be discussed.

## Conclusion: The Future of Electroherbalism

This conclusion will summarize the key takeaways and highlight the future potential of electroherbalism as a holistic healing modality. It will point towards further research opportunities and recommend resources for continued learning. The goal is to inspire further exploration and development within the field.

Marcello Allegretti, 2016-03-04 Rife Machines are spreading throughout the world and is a topic of interest that is growing fast. Most of the time, those who own such an electronic device, do not know how to use it to its full potential. This is especially true regarding how many frequency sets exist today and what frequencies can be used as a potential solution for a particular problem. With many Rife devices, they come with software that has preloaded frequency sets. Others rely on information that you can get from other sources - even online from the web. However, this information is typically listed in alphabetical order. This makes it extremely difficult to identify all possibilities or alternative sets that one may wish to use in their experiments for any given condition. In this guide, for the first time, you will find all the frequency sets used on a Rife Machine - both known and experimental. They are arranged accordingly to a set of criteria and relevance making cross reference searches possible. More than 6200 frequency sets are listed (127 pages, full color). They cover the human body organs, pathogens, diseases, homeopathic products, minerals, vitamins, chakras, and more. They are sorted and catalogued in a way that makes it much easier to locate the information that will allow the best program choices. Each entry in the guide (Subject or Argument) is also followed by 'Author of the set of frequencies (eg. Rife, Hulda Clark, CALF, etc.), or by explanatory Notes, by the set of Frequencies in Hz, the Organ concerned, the possible causative Condition of a state or a situation and the recommended time of exposure (in Seconds). Through the use of this guide, you can easily discover all possible frequency sets that are related to the subject of interest. Also in ebook version. Happy Rifting!

**the electroherbalism frequency lists: Therapeutic Waves** Marcello Allegretti, 2020-01-08 Diagnosing and then treating, curing and restoring a state of well-being is possible thanks to electromagnetic waves. Contrary to what one might think, they are topics of such wide application that already at the time when the author published the book *The therapeutic properties of electromagnetic waves*, he already knew that many topics of great scientific interest had been excluded. The book, which includes the one just mentioned, comprise in addition to the main and well-known technologies used for care and well-being, also those recently studied and applied. There are many pages dedicated to biological effects on human cells and tissues, the energy properties of water, harmful effects, to end with one of the most difficult topics to deal with: cancer. What the world of research has discovered and experienced over decades is hardly known to anyone, even to the experts in the medical field. In the last chapter, the author has collected the most interesting studies carried out worldwide, mainly on technologies that in many cases have evolved into recognized and approved applications for the treatment and ablation of cancer. Embracing and explaining, in the simplest possible way, such a wide range of applications with electromagnetic waves is not easy, considering that the topics covered include notions of physics as well as of medicine and biology. The text is useful to inform both professionals and those interested in knowing more about concepts, about methodologies and discoveries whose existence is often ignored. The medical world is becoming aware of the effectiveness of the technologies that apply electromagnetic waves both in the diagnostic and curative fields and, as a consequence, the old methodologies are gradually set aside. These innovative technologies are the future of medicine and having ever more precise knowledge of how cells and tissues generate, transmit, receive and react to electromagnetic waves can lead to the formulation of solutions more and more effective. Also in ebook version.

First, we were seduced by the convenience of a wireless world; then, atmospheric weather experimentation in the guise of carbons "climate change" converted the air we breathe into an antenna. Now, the geo-engineering we've been subjected to for two decades is being normalized as the "Star Wars" Space Fence rises around and within us. Is this the Space Age we were promised?

**the electroherbalism frequency lists: When Antibiotics Fail** Bryan Rosner, 2005 WHY RIFE MACHINES? Lyme Disease is caused by *Borrelia burgdorferi*, a spirochete bacteria similar to the bacteria that causes Syphilis. Lyme Disease is known as the "Great Imitator" - It can masquerade as Attention Deficit Disorder, Chronic Fatigue Syndrome, Fibromyalgia, Obsessive Compulsive Disorder, Alzheimer's Disease, Schizophrenia, Depression, Multiple Sclerosis, arthritis, heart conditions, and more. The July, 2004 issue of *Townsend Letter for Doctors and Patients* indicates that Lyme Disease is thought to be the fastest spreading infectious disease in the world, with more than 200,000 new cases per year in the United States alone. Lyme Disease tests are notoriously inaccurate, leading to rampant under-diagnosis of the disease (See Appendix A). But even the people who are lucky enough to receive an accurate diagnosis do not always respond to antibiotic therapy. Aggressive antibiotic therapy, applied by a Lyme Literate Medical Doctor (LLMD), sometimes fails to provide a cure. Many patients take antibiotics for years, often in combinations of two or three drugs simultaneously - yet in some cases the infection becomes chronic anyway, and numerous Lyme Disease sufferers end up staying sick, losing their jobs, getting dropped by insurance companies, going broke, and losing hope. These monumentally discouraging obstacles

facing Lyme Disease sufferers have led many of them to explore the rife machine treatment option, a promising electromagnetic therapy which often works after antibiotics fail.

**the electroherbalism frequency lists:** *An End to All Disease* Lt. Lawrence F. Frego, 2006-07-19 We are at the crossroads of world health. On the one hand we face the possibility of a world wide pandemic, the likes of which has never been seen before. We are, likewise on the threshold of discovering natural cures for nearly every disease. As choosing wisely may mean the difference between life and death, this book is designed to help the reader choose alternative options that are seldom if ever in the news. Jared Diamond, in his groundbreaking work, *Collapse: How Societies Choose to Fail or Succeed*, addresses the fact that only civilizations that recognize the threats against their existence, and deal with the threat effectively survive. Civilizations with their heads in the sand become extinct or are conquered by more vigorous nations. The robber barons of the last century were able to create a monopoly for oil and the automobile by ruthlessly and systematically destroying all competition. They tore up cable car lines and public transportation so the public would have no other alternative except their oil. Today, the drug monopolies, owned by the descendants of these same robber barons, are nearly complete in their plot to eradicate all natural, low cost remedies for disease prevention and treatment. In the state of Florida, naturopathic physicians were de-licensed unless they also had a conventional medical license. The powers that be want to create a drug induced society, at an enormous financial and emotional cost to the public at large. They are even trying to outlaw vitamins via European health treaties and side step the American constitution and the public. The ever escalating cost of medical care created by lack of natural alternative options can only lead to the eventual total collapse of the entire medical system. It is exceedingly difficult finding the truth about alternative medicine as the system has a vested interest in making profits and keeping the truth from you. A few thousand deaths is an acceptable loss if a few billion dollars can be made. And it will be a cold day in hell before a drug company puts itself out of business by telling you about a low cost natural cure that their product

can manage. The guardians of public health know which side their toast is buttered on also. The career politicians and beltway bandits at the FDA know where the money is and they don't get it from you or providers of natural cures. The drug monopolies pay the big bucks. There have been no checks and balances. Corruption has become so pronounced that the US House of Representatives is seeking to pass the Consumers Access to Health Information Act (H.R. 2352) to ensure that accurate health claims ARE NOT SUPPRESSED. Consumers would be given TRUTHFUL AND COMPLETE information about the curative, mitigation, treatment, and prevention effects of foods and dietary supplements on disease or health-related conditions. The time to exercise your God given right to the health care of your choice is now. ([www.lef.org](http://www.lef.org)) America has the finest emergency health care in the world. Bar none. However that is not the nature of the coming threat. American baby boomers will soon be retiring in the tens of millions. Their health care needs will be staggering and costly. However 92% of American health care providers are trained in emergency medicine and only 8% in long term preventative medicine. As it takes a minimum of 6-7 years to obtain a medical degree, America is unprepared for a crisis that is inevitable.

**the electroherbalism frequency lists:** The Therapeutic Properties of Electromagnetic Waves: From Pulsed Fields to Rfing Marcello Allegretti, 2018-08-27 It is not easy to combine electronics or electromagnetic waves with medicine. Both are so vast and are in different fields of specialization that, when necessary, a specialist working in the world of health and well-being, such as a doctor, naturopath, physiotherapist, etc. (or a specialist in bioengineering) is limited with superficial knowledge, which is the minimum that is necessary to work in the best way. It is also difficult to try and explain to those who are not experts in these areas, that electromagnetic waves can be of great help in the treatment of many diseases and yet the fields of application are numerous. So, how many people actually know about the use of electromagnetic waves for medical treatments? In this book I have tried to explain, as simply as I could, all the main methods by which electromagnetic fields can be used for treatments or simply for the improvement of health and well-being. Making a simple list would not have been enough. So I researched for references to scientific articles, ancient and more recent ones, in practice, all useful materials to support even what, in some cases, may be considered by some, inconvenient or simply unscientific. I have taken all these therapies into consideration and for each of them, I have identified and explained the biological effects and the main therapeutic indications currently used in the different nations of the world. I believe this is useful information for everyone, both the scientists and those who are simply just interested in learning something more about the use of electromagnetic waves. I trust you will be amazed at reading these interesting notions, methodologies and discoveries, many of which I am sure you did not imagine existed.

During this quest the use of bio-energetic testing and treatment methods was essential in being successful. The bio-energetic methods that have been applied are bio-resonance and bio-photon based methods. The presented bio-energetic treatment methods can be applied alone or in combination with traditional anti-biotics therapy.

**the electroherbalism frequency lists: PEMF - The Fifth Element of Health** Bryant A. Meyers, 2013-08-19 You probably know that food, water, sunlight, and oxygen are required for life, but there is a fifth element of health that is equally vital and often overlooked: The Earth's magnetic field and its corresponding PEMFs (pulsed electromagnetic fields). The two main components of Earth's PEMFs, the Schumann and Geomagnetic frequencies, are so essential that NASA and the Russian space program equip their spacecrafts with devices that replicate these frequencies. These frequencies are absolutely necessary for the human body's circadian rhythms, energy production, and even keeping the body free from pain. But there is a big problem on planet earth right now, rather, a twofold problem, as to why we are no longer getting these life-nurturing energies of the earth. In this book we'll explore the current problem and how the new science of PEMF therapy (a branch of energy medicine), based on modern quantum field theory, is the solution to this problem,

with the many benefits listed below: • eliminate pain and inflammation naturally • get deep, rejuvenating sleep • increase your energy and vitality • feel younger, stronger, and more flexible • keep your bones strong and healthy • help your body with healing and regeneration • improve circulation and heart health • plus many more benefits

**the electroherbalism frequency lists: *Tuning the Human Biofield*** Eileen Day McKusick, 2021-09-07 • Provides a precise map of the energetic biofield that surrounds the body, showing where specific emotions, memories, traumas, and pain are stored • Details how to locate stored trauma in the biofield with a tuning fork and clear it • Winner of the 2015 Nautilus Silver Award When Eileen McKusick began offering sound therapy in her massage practice she soon discovered she could use tuning forks to locate and hear disturbances in the energy field, or biofield, that surrounded each of her clients. Passing the tuning forks through these areas in the biofield not only corrected the distorted vibrational sounds she was hearing but also imparted consistent, predictable, and sometimes immediate relief from pain, anxiety, insomnia, migraines, depression, fibromyalgia, digestive disorders, and a host of other complaints. Now, more than 20 years later, McKusick has fully developed her sound healing method, which she calls Biofield Tuning, and created a map of the biofield, revealing the precise locations where specific emotions, memories, ailments, and traumas are stored. In this book, McKusick explains the basics of Biofield Tuning practice and provides illustrations of her Biofield Anatomy Map. She details how to use tuning forks to find and clear pain and trauma stored in the biofield and reveals how the traditional principles and locations of the chakras correspond directly with her biofield discoveries. Exploring the science behind Biofield Tuning, she examines scientific research on the nature of sound and energy and explains how experiences of trauma produce “pathological oscillations” in the biofield, causing a breakdown of order, structure, and function in the body. Offering a revolutionary perspective on mind, energy, memory, and trauma, McKusick’s guide to Biofield Tuning provides new avenues of healing for energy workers, massage therapists, sound healers, and those looking to overcome chronic illness and release the traumas of their past.

**the electroherbalism frequency lists: *Rife's Great Discovery*** Barry Lynes, 2017-05-22 Rife's Great Discovery is the final book by Barry Lynes about Royal Rife's amazing discovery that resonant frequency therapy is a valid breakthrough alternative to chemical medicine's limitations and failures. The author has devoted 30 years to this subject since his original, revolutionary book about Dr. Rife was published in April 1987 (*The Cancer Cure That Worked: The Rife Report*). This new, 2017 book provides incontrovertible evidence that Rife's Universal Microscope did indeed shatter the magnification barrier that limits all other optical microscopes. That's why Rife's work was suppressed through bribery and threats. Rife was on the verge of transforming health treatments and costing the medical monopoly a fortune in lost drug products and fees. Rife's Great Discovery exposes the widespread corruption that is rampant in traditional treatment practices. This book is the Cri De Coeur outcry against the miscarriage of justice done to Royal Rife and to desperate patients everywhere who suffer from many diseases. Rife's discoveries might cure millions of people if his findings were objectively tested and used. Like France's Dreyfus Affair scandal, a massive restructuring of America's cancer treatment and research program is now a growing public demand. This includes a complete overhaul of the medical education system and its basic curriculum. Royal

Rife's wondrous scientific discoveries and inventions will gain historic recognition in the future. Just as the criminal actions of many medical officials will be publicly acknowledged and the long-delayed verification of Rife's findings will alter the healing fundamentals and doctoring procedures of standard medical practice.

**the electroherbalism frequency lists: Remarkable Healings** Shakuntala Modi, 1998-04-01  
Psychiatry remains an emerging discipline. Many people suffer from ailments that have no apparent cause, no obvious cure. Quite by accident, while using hypnotherapy, Dr. Modi discovered that pastlife regression can be a beneficial treatment. Many of these patients, under hypnosis, claimed to have spirits attached to their bodies and energy fields, creating psychological and physical problems. Based on years of experience, Dr. Modi describes techniques that release these spirits, revealing how patients can sometimes recover within a few sessions. While most doctors would agree that emotional states affect our health, few would give credence to spiritual influences. In this truly groundbreaking book, Dr. Modi presents evidence that something beyond the physical affects the health of many people, and urges medical scientists to objectively assess this revolutionary approach to mental and, often, physical illness. Pioneers have the courage to put aside the status quo and evaluate what the evidence shows, even if it defies the prevailing logic of the time. Both physicians and the general public should explore the pioneering work of Dr. Modiwork which no doubt has produced many remarkable healings.

**the electroherbalism frequency lists: Syncrometer Science Laboratory Manual** Hulda Regehr Clark, 2000-01-01 This book introduces the 3 kinds of investigations that can be made with a syncrometer. In the first kind of investigation, you can detect entities in your body, taken as a whole. For example, mercury aflatoxin, Streptococcus pneumonia, Epstein Barre virus, orthophosphotyrosine, benzene. Such a test is not as sensitive as the organ test, described next, but for this reason allows you to select those entities most abundant in the body and therefore of special significance; in the second, you can identify which organs contain a particular entity. For example, the mercury may be in the kidney, the Streptococcus in the joints, and so on. This allows you to embark on a cleanup program for your body in a focused way. The syncrometer lets you monitor your progress. And finally, you can detect entities in products. For example, lead in your household water, thulium in your reverse osmosis water, asbestos in your sugar.
