It erupted into a national news story, one never told in its entirety—until *King of Clubs: The Great Golf Marathon of 1938*. In September 1938, thirty-two-year-old J. Smith Ferebee agreed to play 600 holes of golf in eight cities, from Los Angeles to New York, over four consecutive days. The ordeal meant playing more than thirty-three rounds in just ninety-six hours. The stakes: Ferebee's friend and former business partner Fred Tuerk agreed that if Ferebee succeeded, he would pay on Ferebee's behalf a \$20,000 mortgage on 296 acres of waterfront Virginia land. If Ferebee lost, he would surrender to Tuerk his ownership stake in the property. Brokers on LaSalle Street in Chicago piled up bets. Before long, the marathon was estimated to be worth \$100,000, or well more than \$1 million today. Playing despite a severe leg injury, Ferebee faced one obstacle after another, including a gambler's brazen sabotage attempt in Philadelphia. He started the morning rounds before dawn and ended the afternoon rounds in darkness, with lighting provided by spectators' cars, local fire departments, or flares. Remarkably, Ferebee never lost a ball. Combining the appeal of *Seabiscuit* and *The Greatest Game Ever Played*, *King of Clubs* will amaze and entertain readers from opening drive to final putt.

**trane tracker building management: Outliers** Malcolm Gladwell, 2008-11-18 From the bestselling author of Blink and The Tipping Point, Malcolm Gladwell's Outliers: The Story of Success overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. Outliers will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times
