**unes download: Trade and Culture** Patricia M. Goff, 2020-12-28 Governments that seek to liberalize trade can find that doing so is often in tension with their desire to achieve the objectives of

This tension has prompted a long-standing debate, with great variation in how countries have approached it. Trade and Culture: The Ongoing Debate explores this variation across geographic space. It also seeks to explain the evolution in these various policies over time. Policies are not static, largely due to domestic politics, shifts in the international trading system and technological developments. The chapters in this volume explore the different approaches to the trade and culture debate and provide an up-to-date look at current versions of these policies in Canada, the European Union, South Africa, Latin America, South Korea, the United States and China. This book will be of great value to scholars and researchers interested in cultural policies and the politics of international trade. **unes download: Competence-based Vocational and Professional Education** Martin Mulder, 2016-09-08 This book presents a comprehensive overview of extant literature on competence-based vocational and professional education since the introduction of the competence concept in the 1950s. To structure the field, the book distinguishes between three approaches to defining competence, based on 1. functional behaviourism, 2. integrated occupationalism, and 3. situated professionalism. It also distinguishes between two ways of operationalizing competence: 1. behaviour-oriented generic, and 2. task-oriented specific competence. Lastly, it identifies three kinds of competencies, related to: 1. specific activities, 2. known jobs, and 3. the unknown future. Competence for the unknown future must receive more attention, as our world is rapidly evolving and there are many 'glocal' challenges which call for innovation and a profound transformation of policies and practices. The book presents a range of different approaches to competence-based education, and demonstrates that competence-based education is a worldwide innovation, which is institutionalized in various ways. It presents the major theories and policies, specific components of educational systems, such as recognition, accreditation, modelling and assessment, and developments in discipline-oriented and transversal competence domains. The book concludes by synthesizing the different perspectives with the intention to contribute to further improving vocational and professional education policy and practice. Joao Santos, Deputy Head of Unit C5, Vocational Training and Adult Education, Directorate General for Employment, Social Affairs and Inclusion, European Commission: "This comprehensive work on competence-based education led by Martin Mulder, provides an excellent and timely contribution to the current debate on a New Skills Agenda for Europe, and the challenge of bridging the employment and education and training worlds closer together. This book will influence our work aimed at improving the relevance of vocational education to support initial and continuing vocational education and training policy and practice aimed at strengthening the key competencies for the 21st century." Prof. Dr. Reinhold Weiss, Deputy President and Head of the Research, Federal Institute for Vocational Education and Training (BIBB), Bonn, Germany: "This book illustrates that the idea and concept of competence is not only a buzzword in educational debates but key to innovative pedagogical thinking as well as educational practice." Prof. Dr. Johanna Lasonen, College of Education, University of South Florida, Tampa, USA: Competence-based Vocational and Professional Education is one of the most important multi-disciplinary book in education and training. This path-breaking book offers a timely, rich and global perspective on the field. The book is a good resource for practitioners, policymakers and

researchers.

**unes download: Erzählungen als kulturelles Erbe - Das kulturelle Erbe als Erzählung**

Ingo Schneider, Valeska Flor, 2014 Der Titel des Bandes 'Erzählungen als kulturelles Erbe - das Kulturelle Erbe als Erzählung' - signalisiert ein zweifaches Interesse der internationalen volkskundlichen Erzählforschung an den einschlägigen Aktivitäten der UNESCO auf dem Feld des Intangible Cultural Heritage. In ausgewählten Fallstudien wird zum einen der Frage nachgegangen, wie es kulturtheoretisch zu verstehen sei, wenn Erzählungen zum Erbe erklärt wurden und werden. Welche Sehnsüchte, Ansprüche, welche Interessen aber auch Konsequenzen - gleichermaßen mit Blick auf die Vergangenheit als auch auf die Gegenwart - verursachen und begleiten entsprechende Prozesse der 'Heretifizierung'? Eine Reihe von Beiträgen stellt die Frage in entgegengesetzter Richtung. Aus erzähltheoretischer Perspektive untersuchen sie, inwieweit die Rede vom Kulturellen Erbe nicht selbst als eine Erzählung im postmodernen Sinn gelesen werden kann und muss, als eine jener 'kleinen' Erzählungen, die die Metaerzählungen der Moderne und Vormoderne abgelöst haben. Mit Beiträgen von Sandra Blum, Helmut Fischer, Valeska Flor, Brigitte Frizzoni, Helmut Groschwitz, Susanne Hose, Akemi Kaneshiro-Hauptmann, Christina Niem, Kathrin Pöge-Alder, Bernd Rieken, Christoph Schmitt, Ingo Schneider, Martin Steidl, Peter Strasser, Outi Tuomi-Nikula, Harm-Peer Zimmermann

**unes download: Die exotisierte Stadt Lisa Gaupp, 2016-06-01 Die Analyse der**

Wechselwirkungen von Kulturpolitik, Musikvermittlung und jugendlichen Identitätskonstruktionen im Spannungsfeld der durch Migration und andere Einflüsse wie die hohe Mobilität von Informationen globalisierten Komplexität heutiger Gesellschaften legt die Entstehung von Jugendkulturen am Beispiel Hamburg offen. «Imaginäre Identitätsmythen» als Repräsentationssystem der Interkultur werden analysiert und ihre Zuschreibungsmechanismen, ihr exotisierendes Othering offengelegt. Durch die Feldstudie werden die Perspektiven der Kultur- und Bildungspolitik und der freien Kulturträger mit den Perspektiven der Jugendlichen in Korrelation gebracht. Gefragt wird, ob der Blickwinkel der Kulturpolitik einschränkend oder fördernd auf Jugendliche wirkt, und ob er mit den kulturellen Bedürfnissen der Jugendlichen übereinstimmt. Die Aktualität der Analyse liegt nicht zuletzt in der Brisanz segregierender Tendenzen im öffentlichen Meinungsklima in Bezug auf «Jugendliche mit Migrationshintergrund». Die Ergebnisse der Forschung liefern Empfehlungen, deren Umsetzung eine wünschenswerte, wenn nicht gar notwendige Adaption der Kulturpolitik an die Realitäten des heutigen postmigrantischen Gesellschaftsprozesses darstellt. Anstatt der Verfestigung von segregierenden Zuschreibungen Vorschub zu leisten, bietet eine solche transkulturelle Perspektive die Möglichkeit, Verflechtungen, Interaktionen und (auch widersprüchliche) Gemeinsamkeiten im globalisierten Kontext als Vorteil zu begreifen und sich der Ermöglichung von postmigrantischer Normalität zu verschreiben. The development of youth cultures in Hamburg externalises the analysis of the interplay of cultural politics, musical communication and construction of youthful identities in the tension field of the complexity of contemporary society, globalised through migration and other influences such as the high mobility of information. "Imaginary myths of identity" are analysed as representation systems of the interculture, and their mechanisms of attribution and exoticising othering are revealed. The field study brings the perspectives of cultural and educational policies and of free culture bearers into correlation with the perspectives of young people. The author questions whether the perspective of cultural policy has a repressive or stimulating effect on young people, or whether it matches the cultural needs of young people. The relevance of the study rests not least on the current hot topic of segregating tendencies in the climate of popular opinion in relation to "young people with a migrant background". The results of the research provide recommendations, the

implementation of which are a desirable or indeed necessary adaptation of cultural policy to the realities of today's post-migration social process. Instead of abetting the consolidation of segregating attributions, this transcultural perspective offers the opportunity to understand interdependencies, interactions and (even contradictory) similarities as an advantage in a global context and to commit ourselves to making possible a post-migration normality.

**unes download: Serving Library Users from Asia** John Hickok, 2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published (e.g., disabled, Latino, seniors, etc.), few books on serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters—each on 24 specific Asian countries/cultures of East, Southeast, and South Asia—with a wealth of resources for understanding, interacting with, outreaching to, and serving library users of each culture. Resources include cultural guides (both print and online), language helps (with sample library vocabulary), Asian booksellers, nationwide cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries—public, school, and academic—making this book valuable for all librarians. The demographics of each Asian culture (numbers and distribution)—plus history of immigration and international student enrollment—is also featured. As a bonus, each chapter spotlights a US public, school, and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more—of public, school, and academic libraries—are all discussed, with detailed documentation. Country conditions influencing libraries and library use are also described: literacy levels, reading cultures, languages and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

**unes download: The Paradox of Connection** Diana Bossio, Valérie Bélair-Gagnon, Avery E. Holton, Logan Molyneux, 2024-02-27 Using a framework of online connection and disconnection, *The Paradox of Connection* examines how journalists' practices are formed, negotiated, and maintained in dynamic social media environments. The interactions of journalists with the technological, social, and cultural features of online and social media environments have shaped new values and competencies—and the combination of these factors influence online work practices. Merging case studies with analysis, the authors show how the tactics of online connection and disconnection interact with the complex realities of working in today's media environments. The result is an insightful portrait of fast-changing journalistic practices and their implications for both audiences and professional identities and norms.

Kinnear, 2011-07-22 This book provides a much-needed survey of the discrimination and violence against women in developing countries, and identifies the literature and resources available about this topic. Because of improvements in communication technologies, the West has become increasingly aware of horrific examples of ongoing discrimination and violence against individual women in developing countries. As a result, more attention is being paid to the gender bias and hardship that women in developing countries face in their everyday lives, and the importance of these women in economic development and the alleviation of poverty is starting to be recognized. *Women in Developing Countries: A Reference Handbook* addresses topics like the status of women in developing countries; their access to education, health care, and the political process; their legal status; the extent to which they are considered property; female genital mutilation and other harmful practices; and other timely issues. This book also provides statistical information, data on selected nongovernmental organizations (NGOs) and other organizations set up to improve the lives and advance the status of women, and sources of further information in print and nonprint media.

Este compêndio reflete o comprometimento incessante com o avanço do conhecimento científico nas diversas áreas que convergem para a promoção da saúde e do bem-estar. Os capítulos cuidadosamente elaborados pelos eminentes autores deste volume oferecem uma abordagem abrangente e aprofundada sobre temas cruciais que permeiam a saúde e a qualidade de vida. Desde questões psicológicas até inovações em procedimentos cirúrgicos, este livro proporciona uma visão holística das complexidades que envolvem a promoção do bem-estar em nossa sociedade dinâmica. Iniciando com uma análise perspicaz sobre os “afetos transferenciais como condições de riscos suicidas”, o primeiro capítulo destaca a importância da compreensão das nuances emocionais na preservação da saúde mental. Da mesma forma, a discussão sobre a “síndrome de burnout em psicólogos pós-pandemia” oferece uma visão crítica sobre os desafios enfrentados por profissionais que, incansavelmente, buscam aliviar o sofrimento alheio. Os capítulos subsequentes abrangem uma diversidade de tópicos, desde a “humanização da assistência em enfermagem” até avanços inovadores na “cirurgia minimamente invasiva”. Cada capítulo é uma contribuição valiosa para a compreensão e aprimoramento das práticas de saúde, trazendo à tona novas perspectivas e soluções inovadoras. A inclusão de temas como “natação infantil” e “atividade física na terceira idade” reforça a importância do desenvolvimento saudável desde tenra idade até a fase sênior da vida. A diversidade de abordagens, como o “tratamento com canabidiol para epilepsia em pacientes pediátricos” e a “hidroxiapatita de cálcio como bioestimulador na reestruturação facial”, evidencia a amplitude das pesquisas e práticas neste volume. Este livro não apenas oferece uma compreensão aprofundada dos temas abordados, mas também representa um marco na convergência de disciplinas que tradicionalmente atuavam de maneira isolada. Ao destacar a interconexão entre a comunicação humanizada em ambientes hospitalares, os benefícios do treinamento funcional na terceira idade e os avanços em tecnologia da informação em saúde, este volume reflete a complexidade do panorama atual da promoção da saúde.

Cada capítulo, embasado em uma sólida revisão de literatura e, em alguns casos, em relatos de caso, oferece aos leitores uma síntese crítica das pesquisas mais recentes e das práticas inovadoras em suas respectivas áreas. Este livro não é apenas uma fonte de conhecimento, mas também uma ferramenta prática para profissionais de saúde, pesquisadores e estudantes que buscam se aprofundar no entendimento e na aplicação de princípios que promovem o bem-estar. Esperamos que este livro contribua significativamente para o avanço do conhecimento científico e, por conseguinte, para a promoção do bem-estar e da qualidade de vida em nossa sociedade. Boa leitura!
