Coyne, 2010-01-14 For all the discussion in the media about creationism and 'Intelligent Design', virtually nothing has been said about the evidence in question - the evidence for evolution by natural selection. Yet, as this succinct and important book shows, that evidence is vast, varied, and magnificent, and drawn from many disparate fields of science. The very latest research is uncovering a stream of evidence revealing evolution in action - from the actual observation of a species splitting into two, to new fossil discoveries, to the deciphering of the evidence stored in our genome. Why Evolution is True weaves together the many threads of modern work in genetics, palaeontology, geology, molecular biology, anatomy, and development to demonstrate the 'indelible stamp' of the processes first proposed by Darwin. It is a crisp, lucid, and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution.

Deb Douglas, 2021-09-23 Help underserved high-potential students claim their right to an education that addresses their unique needs. In gifted education, an important and contentious issue that has yet to be sufficiently addressed is the systemic underrepresentation of gifted students who have been discriminated against in school-based gifted and advanced learner programs because of their race, ethnicity, gender identity, sexual orientation, socioeconomic status, or other realities. Empowering Underrepresented Gifted Students gives a voice to those students and brings their stories into focus. With chapters written by student and expert scholars who specialize in addressing the structural inequity and educational inequality in gifted and advanced learner programs, Empowering Underrepresented Gifted Students recommends practices and strategies for helping underserved high-potential students claim their right to an education that addresses their unique needs. Each chapter has key takeaways and discussion questions, providing a built-in book study guide to prepare educators to engage students in conversation and to help develop their self-advocacy skills. Coeditors Dr. Joy Lawson Davis and Deb Douglas have brought together the voices of experts and students to help educators move closer to ensuring equity, access, and excellence in gifted education. By arming historically marginalized gifted students with self-advocacy strategies, these remarkable students will be better enabled to fulfill their dreams.
