wood badge training manual: Field Marshal Sir Henry Wilson Keith Jeffery, 2006-03-09

Field Marshal Sir Henry Wilson, an Irishman who in June 1922 was assassinated on his doorstep in London by Irish republicans, was one of the most controversial British soldiers of the modern age. Before 1914 he did much to secure the Anglo-French alliance and was responsible for the planning which saw the British Expeditionary Force successfully despatched to France after the outbreak of war with Germany. A passionate Irish unionist, he gained a reputation as an intensely 'political' soldier, especially during the 'Curragh crisis' of 1914 when some officers resigned their commissions rather than coerce Ulster unionists into a Home Rule Ireland. During the war he played a major role in Anglo-French liaison, and ended up as Chief of the Imperial General Staff, professional head of the army, a post he held until February 1922. After Wilson retired from the army, he became an MP and was chief security adviser to the new Northern Ireland government. As such, he became a target for nationalist Irish militants, being identified with the security policies of the Belfast regime, though wrongly with Protestant sectarian attacks on Catholics. He is remembered today in unionist Northern Ireland as a kind of founding martyr for the state. Wilson's reputation was ruined in 1927 with the publication of an official biography, which quoted extensively and injudiciously from his entertaining, indiscreet, and wildly opinionated diaries, giving the impression that he was some sort of Machiavellian monster. In this first modern biography, using a wide variety of official and private sources for the first time, Keith Jeffery reassesses Wilson's life and career and places him clearly in his social, national, and political context.

wood badge training manual: Aids To Scouting Robert Baden-Powell, 2015-02-10 In 1899

while serving in the 2nd Boer War, Robert Baden-Powell penned his sixth military book, Aids To Scouting. It was a non-typical training manual filled with personal stories of intrigue and even games. Its goal was to encourage the development of light reconnaissance scouting skills within the British Army. The book was well received by various armies of its time, including the French Army. His successful defense of Mafeking (1899-1900) in South Africa made Baden-Powell a well-known national hero in Britain. But what completely surprised Baden-Powell was that his book was eagerly taken up by teachers and youth groups to help organize outdoor activities and sport. He eventually embraced the idea of adapting his work into a new youth-oriented book, Scouting for Boys (1908) which went on to sell approx. 150 million copies to date. It was that follow-on book that firmly launched the international Boy Scouts movement. Aids to Scouting contains sections on the characters of a scout, as well as practical advice on observation, stealth/camouflage, map reading, sketching, tracking, reporting and care of horses. It presents these topics in a simple conversational style that makes it easy to read, and is illustrated with personal anecdotes of military adventures by the author. It gives scholars clear insights into his mindset and beliefs that served him well in the

siege of Mafeking and shows a clear lineage to the formation of the tenets of his formation of the Boy Scouts. Anyone interested in the history of Boy Scouting will definitely want to read this interesting and formative book. (NOTE - Appendix C contents is missing in this Kindle version - but we hope to update the ebook with it once a suitable facsimile can be referenced). 'To sum up in a few words, success does not consist so much in gaining money and power as in gaining happiness. Many young men drift along with the rest of the crowd according to chance, and thus never reach happiness. From being passive be active. Don't drift. Take your own line. Paddle your own canoe. Only mind the rocks Avoid them by cultivating other qualities. Powell explains the 'rocks you are likely to bump on (Through herd temptation) Horses, betting and looking on at false sports. Wine, and other forms of self indulgence. Women, dangers of a wrong attitude and blessing of the right one. Extremists in politics, irreligion, etc. Powell elaborates on the antidotes to the 'rocks (through individual effort) active hobbies, earning money, self-control, character, chivalry, health of mind and body, service for your fellow-men and for God. 'If you aim for it by practicing these safeguards, instead of being stranded among the rocks, you will win success and happiness. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

wood badge training manual: A Historical Review and Analysis of Army Physical Readiness Training and Assessment Whitfield East, 2013-12 The Drillmaster of Valley Forge-Baron Von Steuben-correctly noted in his Blue Book how physical conditioning and health (which he found woefully missing when he joined Washington's camp) would always be directly linked to individual and unit discipline, courage in the fight, and victory on the battlefield. That remains true today. Even an amateur historian, choosing any study on the performance of units in combat, quickly discovers how the levels of conditioning and physical performance of Soldiers is directly proportional to success or failure in the field. In this monograph, Dr. Whitfield Chip East provides a pragmatic history of physical readiness training in our Army. He tells us we initially mirrored the professional Armies of Europe as they prepared their forces for war on the continent. Then he introduces us to some master trainers, and shows us how they initiated an American brand of physical conditioning when our forces were found lacking in the early wars of the last century. Finally, he shows us how we have and must incorporate science (even when there exists considerable debate!) to contribute to what we do-and how we do it-in shaping today's Army. Dr. East provides the history, the analysis, and the pragmatism, and all of it is geared to understanding how our Army has and must train Soldiers for the physical demands of combat. Our culture is becoming increasingly "unfit, due to poor nutrition, a lack of adequate and formal exercise, and too much technology. Still, the Soldiers who come to our Army from our society will be asked to fight in increasingly complex and demanding conflicts, and they must be prepared through new, unique, and scientifically based techniques. So while Dr. East's monograph is a fascinating history, it is also a required call for all leaders to better understand the science and the art of physical preparation for the battlefield. It was and is important for us to get this area of training right, because getting it right means a better chance for success in combat.
