commanding your morning pdf: The Little Book of Prayers David Schiller, 1996-10-01 The perfect gift for seekers, the curious, and the spiritually hungry, The Little Book of Prayers now has a stunning new cover and a more prayer book-like format. Gathered from holy books and prayer books, from songs and spirituals, spoken traditions and poets, it is an unexpectedly approachable collection of common and uncommon prayers from around the world. The entries, one per page or spread, are chosen for their depth of feeling, beauty of expression, spiritual intensity, and sense of the universal. The book is organized into broad categories of praise, entreaty, contemplation, mourning, and grace; and two indexes—one by authorship, and the other by topic—make it immediately accessible. There are familiar prayers, like the Lord’s Prayer and 23rd Psalm, which, placed in new context, shine with a renewed beauty and wisdom. You’ll find prayers unfamiliar to many in the West, such as the “Opener” from the Koran or the four vows of the Bodhisattva, chanted every evening in Zen monasteries around the world. And the surprising—from the “Prayer of the Unknown Confederate Soldier” to the blues of Lightnin’ Hopkins to the poetry of Rumi. God help us to live slowly: To move simply: To look softly: To allow emptiness: To let the heart create for us. Amen. —Michael Leunig You, whose day it is, make it beautiful. commanding your morning pdf: Command Of The Air General Giulio Douhet, 2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the

need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision—that command of the air is all important in modern warfare—has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.
