At the time of the Japanese invasion, U Sein Tin was deputy secretary in the Ministry of Home and Defense Affairs. An Oxford-trained member of the Indian Civil Service, working for the British administration on the eve of the invasion, he lived with his wife and three small children in Rangoon. *Wartime in Burma* is a stirring memoir that presents a personal account of U Sein Tin's feelings about the war, his anxiety for the safety of his family, the bombing of Rangoon, and what happened to them during the next six chaotic months of the British retreat. The author and his family leave Rangoon to live in a remote forest in Upper Burma with several other Burmese civil servants, their staff, and valuable possessions—rich pickings for robbers. His diary ends abruptly on June 5, his forty-second birthday; U Sein Tin was murdered on June 6 by a gang of Burmese bandits. The diary pages, scattered on the floor of the house, were rescued by his wife and eventually published in Burma in 1966. What survives is a unique account that shines new light on the military retreat from Burma.

dr chat gyi: *General Ne Win* Robert Taylor, 2015-05-25 Robert Taylor, one of the most prominent scholars in Myanmar studies, has written an illuminating study of Ne Win, the most enigmatic and controversial of the first generation of post-independence Southeast Asian leaders,

and how he steered a then largely unknown country, Burma (now Myanmar), through the Cold War years. This book, by perhaps the only foreign political analyst to live in Burma under Ne Win, is a significant contribution to the historiography of Myanmar and its unnoticed role in the Cold War in Asia. -- Associate Professor Ang Cheng Guan, Head of Graduate Studies, S. Rajaratnam School of International Studies, Nanyang Technological University, Singapore. This book fills a major gap in the literature on Myanmar by providing the first scholarly account of the life of General Ne Win, its enigmatic ruler for over 25 years. It will be of interest not only to professional Myanmar watchers, who have long awaited a detailed and comprehensive study of this important historical figure, but to anyone who wants to learn more about this troubled Southeast Asian country, where Ne Win's legacy is still being felt today. -- Andrew Selth, Adjunct Associate Professor, Griffith Asia Institute. The Colonel Ne Win of World War II and General Ne Win of post-independent Myanmar was not the same as Chairman Ne Win of the BSPP. Nor was the context of those days similar to the context by which he is normally judged today. The present work (and Taylor's scholarship in general) is acutely aware of such anachronistic projections backward, made to commensurate with certain desired academic and political consequences. Taylor examines Ne Win's life and career in the context of when it occurred. This book returns Ne Win to the period to which he belonged. -- Michael Aung-Thwin, Professor of South East Asian History, University of Hawaii. It is difficult to imagine that this study of Ne Win, the dominant figure in the politics of Burma through most of the second half of the twentieth century, will ever be surpassed. Immensely detailed, insightful, and impressively understanding, this is an outstanding work of scholarship. Ian Brown, Emeritus Professor of the Economic History of South East Asia, School of Oriental and African Studies (London).

dr chat gyi: *Architects of Buddhist Leisure* Justin Thomas McDaniel, 2017-04-01 Buddhism, often described as an austere religion that condemns desire, promotes denial, and idealizes the contemplative life, actually has a thriving leisure culture in Asia. Creative religious improvisations designed by Buddhists have been produced both within and outside of monasteries across the region—in Nepal, Japan, Korea, Macau, Hong Kong, Singapore, Laos, Thailand, and Vietnam. Justin McDaniel looks at the growth of Asia's culture of Buddhist leisure—what he calls “socially disengaged Buddhism”—through a study of architects responsible for monuments, museums, amusement parks, and other sites. In conversation with noted theorists of material and visual culture and anthropologists of art, McDaniel argues that such sites highlight the importance of public, leisure, and spectacle culture from a Buddhist perspective and illustrate how “secular” and “religious,” “public” and “private,” are in many ways false binaries. Moreover, places like Lek Wiriyaphan's Sanctuary of Truth in Thailand, Suối Tiên Amusement Park in Saigon, and Shi Fa Zhao's multilevel museum/ritual space/tea house in Singapore reflect a growing Buddhist ecumenism built through repetitive affective encounters instead of didactic sermons and sectarian developments. They present different Buddhist traditions, images, and aesthetic expressions as united but not uniform, collected but not concise: Together they form a gathering, not a movement. Despite the ingenuity of lay and ordained visionaries like Wiriyaphan and Zhao and their colleagues Kenzo Tange, Chan-soo Park, Tadao Ando, and others discussed in this book, creators of Buddhist leisure sites often face problems along the way. Parks and museums are complex adaptive systems that are changed and influenced by budgets, available materials, local and global economic conditions, and visitors. Architects must often compromise and settle at local optima, and no matter what they intend, their buildings will develop lives of their own. Provocative and theoretically innovative, *Architects of Buddhist Leisure* asks readers to question the very category of “religious” architecture. It challenges current methodological approaches in religious studies and speaks to a broad audience interested in modern art, architecture, religion, anthropology, and material culture. dr chat gyi: Perfect Hostage Justin Wintle, 2013-07-01 Burma is a country where, as one senior UN official puts it, "just to turn your head can mean imprisonment or death." Aung San Suu Kyi is one of the world's foremost inspirational revolutionary leaders. Considered to be Burma's best hope for freedom, she has waged a war of steadfast nonviolent opposition to the country's vicious militant regime. Because of her resistance to the brutality of the Burmese government, she has been under house arrest since 1989. She has endured failing health, vilification through the Burmese media, and cruel imprisonment in one of the world's most dreadful and inhumane jails. Suu Kyi has fought every hardship the junta could put her through, yet she has never once wavered from her position, never once advocated violence, and persevered in her message of peaceful resistance at all costs, earning her the Nobel Peace Prize in 1991, placing her among the likes of such renowned champions of peace as Gandhi, King, and Mandela. She is a truly heroic revolutionary. In *Perfect Hostage*, the most thorough biography of Suu Kyi to date, Justin Wintle tells both the story of the Burmese people and the story of an ordinary person who became a hero.

Transboundary River Carl Middleton, Vanessa Lamb, 2019-08-12 This open access book focuses on the Salween River, shared by China, Myanmar, and Thailand, that is increasingly at the heart of pressing regional development debates. The basin supports the livelihoods of over 10 million people, and within it there is great socio-economic, cultural and political diversity. The basin is witnessing intensifying dynamics of resource extraction, alongside large dam construction, conservation and development intervention, that is unfolding within a complex terrain of local, national and transnational governance. With a focus on the contested politics of water and associated resources in the Salween basin, this book offers a collection of empirical case studies that highlights local knowledge and perspectives. Given the paucity of grounded social science studies in this contested basin, this book provides conceptual insights at the intersection of resource governance, development, and politics of knowledge relevant to researchers, policy-makers and practitioners at a time when rapid change is underway. - Fills a significant knowledge gap on a major river in Southeast Asia, with empirical and conceptual contributions - Inter-disciplinary perspective and by a range of writers, including academics, policy-makers and civil society researchers, the majority from within Southeast Asia - New policy insights on a river at the cross-roads of a major political and development transition

His style of mixing broad colloquialisms, stringent irony, and poetry has all the life and atmosphere of an oral teaching. Great care has been taken by the translators to render the precise meaning of the text in English while still reflecting the vigor and insight of the original Tibetan.

dr chat gyi: Social Transformations in India, Myanmar, and Thailand: Volume I Chosein

Yamahata, Donald M. Seekins, Makiko Takeda, 2021-01-02 “This book focuses on the different challenges and opportunities for social transformation in India, Myanmar and Thailand, by centering communities and individuals as the main drivers of change. In doing so, it includes discussions on a wide array of issues including women’s empowerment and political participation, ethno-religious tensions, plurilingualism, education reform, community-based healthcare, climate change, disaster management, ecological systems, and vulnerability reduction. Two core foundations are introduced for ensuring broader transformations. The first is the academic diplomacy project – a framework for an engaged academic enquiry focusing on causative, curative, transformative, and promotive factors. The second is a community driven collective struggle that serves as a grassroots possibility to facilitate positive social transformation by using locally available resources and enabling the participation of the resident population. As a whole, the book conveys the importance of a diversification of engagement at the grassroots level to strengthen the capacity of individuals as decisive stakeholders, where the process of social transformation makes communities more interconnected, interdependent, multicultural and vital in building an inclusive society.”

dr chat gyi: Walking as Jesus Walked Dann L. Spader, 2011-09-01 Jesus must be our model for ministry. Sounds obvious, right? Or is it? Jesus, in all His humanity (and all His divinity) shows us the best possible way to live. Through the way He lived, He modeled the priorities of how to multiply "much fruit." Following Jesus' example, His disciples then changed the course of history. How then can we follow Jesus' example? We must study His life. How did Jesus pray? In what types of relationships did He invest? Where were His priorities? Can my priorities be His priorities? Can I walk like He walked? What we do with Jesus MATTERS. Global ministry trainer Dann Spader practically and helpfully walks us through 10 weeks of exciting, ministry-altering study to really begin to walk as Jesus walked.

dr chat gyi: The Gilded Buddha Alex R. Furger, 2017 This book celebrates in words and images the traditional metal crafts practised for over a thousand years by the creators of religious Buddhist statues in Nepal. The skills of these artisans are nurtured with deep respect for tradition, regarding religion, iconography and technology. Wax modellers, mould makers, casters, fire-gilders and chasers are among the specialists of the Newar ethnic group, whose work is characterised to this day by a melding of age-old technology, great skill, religious observance and contemplation. There are numerous books and exhibition catalogues dedicated to Buddhist art and iconography but little was available about the craft of the artists who turn the religious imagery into metal casts. This book fills this gap, with a thoroughly documented and historical account of the development of this archaic technology. The well-informed text and comprehensive photographic coverage constitute the only up-to-date account and full documentation of an art that is 1300 years old but dying out: the ritual production of Buddhist statues in the lost wax casting technique. The author, Dr. Alex Furger, is an archaeologist who has studied ancient metallurgy and metalworking techniques over the past four decades. He spent twenty-five years at the head of the Roman site of Augusta Raurica and lives in Basel (Switzerland). He is the author of over 130 articles in scientific journals and twelve books in the field of culture history. The fieldwork for this book led him repeatedly to Nepal, where he met and interviewed dozens of craftsmen in their workshops. This book is addressed to readers interested in culture history, travellers to Asia, collectors of statues of Buddha, (avocational) metalworkers, historians of technology, Buddhists, ethnologists, archaeologists, art historians, scholars of Asia and to libraries and museums.

dr chat gyi: The Art of Not Being Governed James C. Scott, 2009-01-01 From the acclaimed author and scholar James C. Scott, the compelling tale of Asian peoples who until recently have stemmed the vast tide of state-making to live at arm's length from any organized state society For two thousand years the disparate groups that now reside in Zomia (a mountainous region the size of Europe that consists of portions of seven Asian countries) have fled the projects of the organized state societies that surround them—slavery, conscription, taxes, corvée labor, epidemics, and

warfare. This book, essentially an “anarchist history,” is the first-ever examination of the huge literature on state-making whose author evaluates why people would deliberately and reactively remain stateless. Among the strategies employed by the people of Zomia to remain stateless are physical dispersion in rugged terrain; agricultural practices that enhance mobility; pliable ethnic identities; devotion to prophetic, millenarian leaders; and maintenance of a largely oral culture that allows them to reinvent their histories and genealogies as they move between and around states. In accessible language, James Scott, recognized worldwide as an eminent authority in Southeast Asian, peasant, and agrarian studies, tells the story of the peoples of Zomia and their unlikely odyssey in search of self-determination. He redefines our views on Asian politics, history, demographics, and even our fundamental ideas about what constitutes civilization, and challenges us with a radically different approach to history that presents events from the perspective of stateless peoples and redefines state-making as a form of “internal colonialism.” This new perspective requires a radical reevaluation of the civilizational narratives of the lowland states. Scott’s work on Zomia represents a new way to think of area studies that will be applicable to other runaway, fugitive, and marooned communities, be they Gypsies, Cossacks, tribes fleeing slave raiders, Marsh Arabs, or San-Bushmen.

Key features include: a broad range of topics that are not covered elsewhere in the literature; contributions from a diverse group of industry research leaders from across the globe; exemplar case studies providing real-world examples of where information integration has been a key factor for success or lack thereof has been at the root cause of failure; an analysis of future priority areas for research and development investment as well as their strategic implications for public and private decision-makers; the book will deliver innovation in best practice methodology for information sharing across disciplines and between the design, construction and asset management sectors.
