It is one of the most popular science fiction novels ever written, has won awards, sold millions of copies around the world and spawned multiple motion-picture adaptations. Brian Herbert, Frank Herbert's eldest son, tells the provocative story of his father's extraordinary life in this honest and loving chronicle. He has also brought to light all the events in Herbert's life that would find their way into speculative fiction's greatest epic. From his early years in Tacoma, Washington, through his time at university and in the Navy, to the difficult years of poverty while struggling to become a published writer, Herbert worked long and hard before finding success after the publication of Dune in 1965. Brian Herbert writes about these years with a truthful intensity that brings every facet of his father's brilliant, and sometimes troubled, genius to full light. Insightful and provocative, containing family photos never published anywhere, this absorbing biography offers Brian Herbert's unique personal perspective on one of the most enigmatic and creative talents of our time.

dune frank herbert pdf: The Dervish House Ian McDonald, 2010-10-04 It begins with an explosion. Another day, another bus bomb. Everyone it seems is after a piece of Turkey. But the shockwaves from this random act of 21st century pandemic terrorism will ripple further and resonate louder than just Enginsoy Square. Welcome to the world of *The Dervish House*—the great, ancient, paradoxical city of Istanbul, divided like a human brain, in the great, ancient, equally paradoxical nation of Turkey. The year is 2027 and Turkey is about to celebrate the fifth anniversary of its accession to the European Union. This is the age of carbon consciousness: every individual in the EU has a card stipulating individual carbon allowance that must be produced at every CO2 generating transaction. For those who can master the game, who can make the trades between gas price and carbon trading permits, who can play the power factions against each other, there are fortunes to be made. The old Byzantine politics are back. They never went away. The ancient power struggled between Sunni and Shia threatens like a storm: Ankara has watched the Middle East emerge from twenty-five years of sectarian conflict. So far it has stayed aloof. A populist Prime Minister has called a referendum on EU membership. Tensions run high. The army watches, hand on holster. And a Galatasaray Champions' League football game against Arsenal stokes passions even higher. *The Dervish House* is seven days, six characters, three interconnected story strands, one central common core -the eponymous dervish house, a character in itself—that pins all these players together in a weave of intrigue, conflict, drama and a ticking clock of a thriller. From the Hardcover edition.

dune frank herbert pdf: Dreamscapes of Modernity Sheila Jasanoff, Sang-hyun Kim, 2015-09-02 Dreamscapes of Modernity offers the first book-length treatment of sociotechnical imaginaries, a concept originated by Sheila Jasanoff and developed in close collaboration with Sang-Hyun Kim to describe how visions of scientific and technological progress carry with them implicit ideas about public purposes, collective futures, and the common good. The book presents a mix of case studies—including nuclear power in Austria, Chinese rice biotechnology, Korean stem cell research, the Indonesian Internet, US bioethics, global health, and more—to illustrate how the concept of sociotechnical imaginaries can lead to more sophisticated understandings of the national and transnational politics of science and technology. A theoretical introduction sets the stage for the contributors' wide-ranging analyses, and a conclusion gathers and synthesizes their collective findings. The book marks a major theoretical advance for a concept that has been rapidly taken up across the social sciences and promises to become central to scholarship in science and technology studies.
