FAQs

1. What is the difference between CPR and AED use? CPR provides manual chest compressions and rescue breaths, while an AED delivers an electric shock to restore a normal heart rhythm. Both are used in cardiac arrest.
2. How often should I practice CPR? It's recommended to refresh your CPR skills annually through a certified course.
3. What if I make a mistake during CPR? It's better to attempt CPR than do nothing. Focus on continuing chest compressions and providing rescue breaths to the best of your ability.
4. Can I use an AED on someone with a pacemaker? Yes, an AED can be safely used on someone with a pacemaker.
5. What are the signs of cardiac arrest in children? Similar to adults, but look for unresponsiveness, lack of breathing, or abnormal breathing.
6. What should I do if I am unsure if someone needs CPR? Err on the side of caution and start CPR. The risk of doing nothing far outweighs the risk of acting.

Drawing upon lessons from his own life, Mayo Clinic cardiologist Stephen Kopecky offers a holistic, evidence-based approach to preventing common diseases and chronic illnesses and living a longer life of pleasure and purpose. In the past century, the leading causes of death around the world have shifted from infectious diseases to long-term chronic illnesses. The overwhelming number of people now living under the burden of chronic illness indicates otherwise. After surviving two bouts of cancer, Dr. Stephen Kopecky, M.D set out to discover the behaviors people can adopt to live longer lives free of chronic illnesses and diseases. What he discovered was that the answer lies in just six habits that require small changes to your daily life, but reap big results long-term. From adopting better diet and exercise habits to managing stress and sleep, these behaviors will not only preserve

your health, they can improve your quality of living and extend your life. The secret, however, lies not just in the steps themselves but in how you accomplish them. This book offers in-depth insights on: The best foods to eat and why Increasing physical activity and improving fitness Why your sleep habits matter The dangers of stress and what to do about them The true impact of alcohol and tobacco on our bodies How to make changes that will last a lifetime After 30 years of research in the field of cardiovascular disease prevention, Dr. Kopecky is sharing what he's learned from his practice and own personal experience about staying healthy, preventing chronic illnesses, and living younger longer.

Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration.
