in cold blood dialectical journal: A Century of Revolution Gilbert M. Joseph, Greg Grandin, 2010-10-21 Latin America experienced an epochal cycle of revolutionary upheavals and insurgencies during the twentieth century, from the Mexican Revolution of 1910 through the mobilizations and terror in Central America, the Southern Cone, and the Andes during the 1970s and 1980s. In his introduction to *A Century of Revolution*, Greg Grandin argues that the dynamics of political violence and terror in Latin America are so recognizable in their enforcement of domination, their generation and maintenance of social exclusion, and their propulsion of historical change, that historians have tended to take them for granted, leaving unexamined important questions regarding their form and meaning. The essays in this groundbreaking collection take up these questions, providing a sociologically and historically nuanced view of the ideological hardening and accelerated polarization that marked Latin America's twentieth century. Attentive to the interplay among overlapping local, regional, national, and international fields of power, the contributors focus on the dialectical relations between revolutionary and counterrevolutionary processes and their unfolding in the context of U.S. hemispheric and global hegemony. Through their fine-grained analyses of events in Chile, Colombia, Cuba, El Salvador, Guatemala, Mexico, Nicaragua, and Peru, they suggest a framework for interpreting the experiential nature of political violence while also analyzing its historical causes and consequences. In so doing, they set a new agenda for the study of revolutionary change and political violence in twentieth-century Latin America. Contributors Michelle Chase Jeffrey L. in cold blood dialectical journal: The Cultural Cold War Frances Stonor Saunders, 2013-11-05 During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called the most comprehensive account yet of the [CIA's] activities between 1947 and 1967 by the *New York Times*, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is a real contribution to popular understanding of the postwar period (*The Wall Street Journal*), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.

This beautifully illustrated and emotional story is an evocative memoir about the search for a better future and a longing for the past. Exploring the anguish of immigration and the lasting effects that displacement has on a child and her family, Bui documents the story of her family's daring escape after the fall of South Vietnam in the 1970s, and the difficulties they faced building new lives for themselves. At the heart of Bui's story is a universal struggle: While adjusting to life as a first-time mother, she ultimately discovers what it means to be a parent—the endless sacrifices, the unnoticed gestures, and the depths of unspoken love. Despite

how impossible it seems to take on the simultaneous roles of both parent and child, Bui pushes through. With haunting, poetic writing and breathtaking art, she examines the strength of family, the importance of identity, and the meaning of home. In what Pulitzer Prize-winning novelist Viet Thanh Nguyen calls “a book to break your heart and heal it,” *The Best We Could Do* brings to life Thi Bui’s journey of understanding, and provides inspiration to all of those who search for a better future while longing for a simpler past.

The bad news is that they don't have a pool. The good news is that only one of them can swim anyway. Bestselling author Chris Crutcher’s controversial and acclaimed novel follows a group of outcasts as they take on inequality and injustice in their high school. Crutcher's superior gifts as a storyteller and his background as a working therapist combine to make magic in *Whale Talk*. The thread of truth in his fiction reminds us that heroes can come in any shape, color, ability or size, and friendship can bridge nearly any divide.”—Washington Post T.J. When he sees a member of the wrestling team threatening an underclassman, T.J. decides he’s had enough. He recruits some of the biggest misfits at Cutter High to form a swim team. They may not have very much talent, but the All-Night Mermen prove to be way more than T.J. anticipated. Crutcher offers an unusual yet resonant mixture of black comedy and tragedy that lays bare the superficiality of the high-school scene. in cold blood dialectical journal: *The New Sultan* Soner Çağaptay, 2017 In a world of rising tensions between Russia and the United States, the Middle East and Europe, Sunnis and Shiites, Islamism and liberalism, Turkey is at the epicentre. And at the heart of Turkey is its right-wing populist president, Recep Tayyip Erdoğan. Since 2002, Erdoğan has consolidated his hold on domestic politics while using military and diplomatic means to solidify Turkey as a regional power. His crackdown has been brutal and consistent - scores of journalists arrested, academics officially banned from leaving the country, university deans fired and many of the highest-ranking military officers arrested. In some senses, the nefarious and failed 2016 coup has given Erdoğan the licence to make good on his repeated promise to bring order and stability under a 'strongman'. Here, leading Turkish expert Soner Çağaptay will look at Erdoğan's roots in Turkish history, what he believes in and how he has cemented his rule, as well as what this means for the world. The book will also unpick the 'threats' Erdogan has worked to combat - from the liberal Turks to the Gulen movement, from coup plotters to Kurdish nationalists - all of which have culminated in the crisis of modern Turkey.--Bloomsbury Publishing.

in cold blood dialectical journal: *Mein Kampf* Adolf Hitler, 2024-02-26 Madman, tyrant, animal—history has given Adolf Hitler many names. In *Mein Kampf* (My Struggle), often called the

Nazi bible, Hitler describes his life, frustrations, ideals, and dreams. Born to an impoverished couple in a small town in Austria, the young Adolf grew up with the fervent desire to become a painter. The death of his parents and outright rejection from art schools in Vienna forced him into underpaid work as a laborer. During the First World War, Hitler served in the infantry and was decorated for bravery. After the war, he became actively involved with socialist political groups and quickly rose to power, establishing himself as Chairman of the National Socialist German Worker's party. In 1924, Hitler led a coalition of nationalist groups in a bid to overthrow the Bavarian government in Munich. The infamous Munich Beer-hall putsch was unsuccessful, and Hitler was arrested. During the nine months he was in prison, an embittered and frustrated Hitler dictated a personal manifesto to his loyal follower Rudolph Hess. He vented his sentiments against communism and the Jewish people in this document, which was to become *Mein Kampf*, the controversial book that is seen as the blue-print for Hitler's political and military campaign. In *Mein Kampf*, Hitler describes his strategy for rebuilding Germany and conquering Europe. It is a glimpse into the mind of a man who destabilized world peace and pursued the genocide now known as the Holocaust.

in cold blood dialectical journal: *The Curious Incident of the Dog in the Night-Time* Mark Haddon, 2009-02-24 A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

in cold blood dialectical journal: *Love and Capital* Mary Gabriel, 2011-09-14 Brilliantly researched and wonderfully written, *Love and Capital* reveals the rarely glimpsed and heartbreakingly human side of the man whose works would redefine the world after his death. Drawing upon previously unpublished material, acclaimed biographer Mary Gabriel tells the story of Karl and Jenny Marx's marriage. Through it, we see Karl as never before: a devoted father and husband, a prankster who loved a party, a dreadful procrastinator, freeloader, and man of wild enthusiasms -- one of which would almost destroy his marriage. Through years of desperate struggle, Jenny's love for Karl would be tested again and again as she waited for him to finish his masterpiece, *Capital*. An epic narrative that stretches over decades to recount Karl and Jenny's story against the backdrop of Europe's Nineteenth Century, *Love and Capital* is a surprising and magisterial account of romance and revolution -- and of one of the great love stories of all time.

At the age of ten, when Martin Amis spent a year in Princeton, New Jersey, he was excited and frightened by America. As an adult he has approached that confusing country from many arresting angles, and interviewed its literati, filmmakers, thinkers, opinion-makers, leaders and crackpots with characteristic discernment and wit. Included in a gallery of Great American Novelists are Norman Mailer, Gore Vidal, Truman Capote, Joseph Heller, William Burroughs, Kurt Vonnegut, John Updike, Paul Theroux, Philip Roth and Saul Bellow. Amis also takes us to Dallas, where presidential candidate Ronald Reagan is attempting to liaise with born-again Christians. We glimpse the beau monde of Palm Beach, where

each couple tries to out-Gatsby the other, and examine the case of Claus von Bulow. Steven Spielberg gets a visit, as does Brian de Palma, whom Amis asks why his films make no sense, and Hugh Hefner's sybaritic fortress and sanitized image are penetrated. There can be little that escapes the eye of Martin Amis when his curiosity leads him to a subject, and America has found in him a superlative chronicler.

in cold blood dialectical journal: Democracy and Education John Dewey, 1916 . Renewal of Life by Transmission. The most notable distinction between living and inanimate things is that the former maintain themselves by renewal. A stone when struck resists. If its resistance is greater than the force of the blow struck, it remains outwardly unchanged. Otherwise, it is shattered into smaller bits. Never does the stone attempt to react in such a way that it may maintain itself against the blow, much less so as to render the blow a contributing factor to its own continued action. While the living thing may easily be crushed by superior force, it none the less tries to turn the energies which act upon it into means of its own further existence. If it cannot do so, it does not just split into smaller pieces (at least in the higher forms of life), but loses its identity as a living thing. As long as it endures, it struggles to use surrounding energies in its own behalf. It uses light, air, moisture, and the material of soil. To say that it uses them is to say that it turns them into means of its own conservation. As long as it is growing, the energy it expends in thus turning the environment to account is more than compensated for by the return it gets: it grows. Understanding the word control in this sense, it may be said that a living being is one that subjugates and controls for its own continued activity the energies that would otherwise use it up. Life is a self-renewing process through action upon the environment.

in cold blood dialectical journal: Nobody's Normal: How Culture Created the Stigma of Mental Illness Roy Richard Grinker, 2021-01-26 A compassionate and captivating examination of evolving attitudes toward mental illness throughout history and the fight to end the stigma. For centuries, scientists and society cast moral judgments on anyone deemed mentally ill, confining many to asylums. In *Nobody's Normal*, anthropologist Roy Richard Grinker chronicles the progress and setbacks in the struggle against mental-illness stigma—from the eighteenth century, through America's major wars, and into today's high-tech economy. *Nobody's Normal* argues that stigma is a social process that can be explained through cultural history, a process that began the moment we defined mental illness, that we learn from within our communities, and that we ultimately have the power to change. Though the legacies of shame and secrecy are still with us today, Grinker writes that we are at the cusp of ending the marginalization of the mentally ill. In the twenty-first century, mental illnesses are fast becoming a more accepted and visible part of human diversity. Grinker infuses the book with the personal history of his family's four generations of involvement in psychiatry, including his grandfather's analysis with Sigmund Freud, his own daughter's experience

with autism, and culminating in his research on neurodiversity. Drawing on cutting-edge science, historical archives, and cross-cultural research in Africa and Asia, Grinker takes readers on an international journey to discover the origins of, and variances in, our cultural response to neurodiversity. Urgent, eye-opening, and ultimately hopeful, *Nobody's Normal* explains how we are transforming mental illness and offers a path to end the shadow of stigma.

in cold blood dialectical journal: *Paper Cadavers* Kirsten Weld, 2014-03-21 In *Paper Cadavers*, an inside account of the astonishing discovery and rescue of Guatemala's secret police archives, Kirsten Weld probes the politics of memory, the wages of the Cold War, and the stakes of historical knowledge production. After Guatemala's bloody thirty-six years of civil war (1960–1996), silence and impunity reigned. That is, until 2005, when human rights investigators stumbled on the archives of the country's National Police, which, at 75 million pages, proved to be the largest trove of secret state records ever found in Latin America. The unearthing of the archives renewed fierce debates about history, memory, and justice. In *Paper Cadavers*, Weld explores Guatemala's struggles to manage this avalanche of evidence of past war crimes, providing a firsthand look at how postwar justice activists worked to reconfigure terror archives into implements of social change. Tracing the history of the police files as they were transformed from weapons of counterinsurgency into tools for post-conflict reckoning, Weld sheds light on the country's fraught transition from war to an uneasy peace, reflecting on how societies forget and remember political violence.

in cold blood dialectical journal: *Julian Assange* Julian Assange, 2011-09-22 In December 2010, Julian Assange signed a contract with Canongate Books to write a book – part memoir, part manifesto – for publication the following year. At the time, Julian said: 'I hope this book will become one of the unifying documents of our generation. In this highly personal work, I explain our global struggle to force a new relationship between the people and their governments.' In the end, the work was to prove too personal. Despite sitting for more than fifty hours of taped interviews and spending many late nights at Ellingham Hall (where he was living under house arrest) discussing his life and the work of WikiLeaks with the writer he had enlisted to help him, Julian became increasingly troubled by the thought of publishing an autobiography. After reading the first draft of the book at the end of March, Julian declared: 'All memoir is prostitution.' In June 2011, with thirty-eight publishing houses around the world committed to releasing the book, Julian told us he wanted to cancel his contract. We disagree with Julian's assessment of the book. We believe it explains both the man and his work, underlining his commitment to the truth. Julian always claimed the book was well written; we agree, and this also encouraged us to make the book available to readers. And the contract? By the time Julian wanted to cancel the deal he had already used the advance money to settle his legal bills. So the contract still stands. We have decided to honour it – and to publish. This book is the unauthorised first draft. It is passionate, provocative and opinionated – like its author. It fulfils the promise of the original proposal and we are proud to publish it. in cold blood dialectical journal: *Imagining Judeo-Christian America* K. Healan Gaston, 2019-11-13 "Judeo-Christian" is a remarkably easy term to look right through. Judaism and Christianity obviously share tenets, texts, and beliefs that have strongly influenced American democracy. In this ambitious book, however, K. Healan Gaston challenges the myth of a monolithic Judeo-Christian America. She demonstrates that the idea is not only a recent and deliberate construct, but also a potentially dangerous one. From the time of its widespread adoption in the 1930s, the ostensible inclusiveness of Judeo-Christian terminology concealed efforts to promote particular conceptions of religion, secularism, and politics. Gaston also shows that this new language, originally rooted in arguments over the nature of democracy that intensified in the early Cold War years, later became a marker in the culture wars that continue today. She argues that the debate on what constituted Judeo-Christian—and American—identity has shaped the country's religious and political culture much more extensively than previously recognized.
