it was always you by judy corry pdf: Trust in Numbers Theodore M. Porter, 2020-08-18 A foundational work on historical and social studies of quantification What accounts for the prestige of quantitative methods? The usual answer is that quantification is desirable in social investigation as a result of its successes in science. Trust in Numbers questions whether such success in the study of stars, molecules, or cells should be an attractive model for research on human societies, and examines why the natural sciences are highly quantitative in the first place. Theodore Porter argues that a better understanding of the attractions of quantification in business, government, and social research brings a fresh perspective to its role in psychology, physics, and medicine. Quantitative rigor is not inherent in science but arises from political and social pressures, and objectivity derives its impetus from cultural contexts. In a new preface, the author sheds light on the current infatuation with quantitative methods, particularly at the intersection of science and bureaucracy.

it was always you by judy corry pdf: Manufacturing Consent Edward S. Herman, Noam Chomsky, 2011-07-06 A compelling indictment of the news media's role in covering up errors and deceptions (The New York Times Book Review) due to the underlying economics of publishing—from famed scholars Edward S. Herman and Noam Chomsky. With a new introduction. In this pathbreaking work, Edward S. Herman and Noam Chomsky show that, contrary to the usual image of the news media as cantankerous, obstinate, and ubiquitous in their search for truth and defense of justice, in their actual practice they defend the economic, social, and political agendas of the privileged groups that dominate domestic society, the state, and the global order. Based on a series of case studies—including the media's dichotomous treatment of "worthy" versus "unworthy" victims, "legitimizing" and "meaningless" Third World elections, and devastating critiques of media coverage of the U.S. wars against Indochina—Herman and Chomsky draw on decades of criticism and research to propose a Propaganda Model to explain the media's behavior and performance. Their new introduction updates the Propaganda Model and the earlier case studies, and it discusses several other applications. These include the manner in which the media covered the passage of the North American Free Trade Agreement and subsequent Mexican financial meltdown of 1994-1995, the media's handling of the protests against the World Trade Organization, World Bank, and International Monetary Fund in 1999 and 2000, and the media's treatment of the chemical industry and its regulation. What emerges from this work is a powerful assessment of how propagandistic the U.S. mass media are, how they systematically fail to live up to their self-image as providers of the kind of information that people need to make sense of the world, and how we can understand their function in a radically new way.

What price would you pay for falling in love? Rachel is a respected doctor who lives in a picturesque and affluent English village where her husband Nathan teaches at an elite private school. Competent, unflappable, and nearing 50, Rachel has everything in her life firmly in her control, even if some of its early luster has worn off. But one day a new patient arrives at her practice for emergency treatment. A longtime patient appears to be following her every movement, turning up unexpectedly wherever she goes. Her somewhat estranged adult daughter Lizzie is hiding a secret—or at least, hiding it from Rachel. Which was why I didn't need anybody messing with me. Especially not the guy who had dedicated his whole life to making mine a joke. The guy who filled my high school locker with frogs and my hot car with cans of tuna. I mean...I always got him back. But not this summer. Things were different now. I was engaged. I had grown up. Dalrymple takes the reader on both an entertaining and at times shocking journey through social, political, popular and literary issues as diverse as child tantrums, aggression, educational reform, honour killings, sexual abuse, public emotions and the role of suffering, and shows the perverse results when we abandon logic in favour of the cult of feeling.
