iteach principal certification: Understanding by Design Grant P. Wiggins, Jay McTighe, 2005 What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of Understanding by Design. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of Understanding by Design apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of Understanding by Design offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

iteach principal certification: The Leader in Me Stephen R. Covey, 2012-12-11 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

iteach principal certification: Partnerships for Leadership Preparation and Development Frances K. Kochan, Ellen H. Reames, Dana M. Griggs, 2021-01-01 There is a large body of research that supports the reality that school leaders make a significant contribution to the success of schools

and the students in them. Additionally, there is strong agreement among and between researchers and state and national educational leadership associations that educational leadership preparation and development should be created and implemented within university/school partnerships. Although institutions engage in forming university/school partnerships for varied reasons, research on the extent to which these partnerships exist; their organizational structures and processes; their implementation and effectiveness; and elements that foster and hinder their success is limited. Perhaps more importantly, there is not a widely accepted, research-based model of such partnerships that practitioners and researchers can use to guide the development and assessment of these partnership endeavors and upon which they can conduct effective research. This book seeks to fill these gaps. It presents the purposes, processes, practices and outcomes of eleven university/school partnerships focused on school leadership preparation and/or development. Each chapter presents an overview of the partnership, elements that fostered and hindered partnership success, and lessons learned. The book concludes with a chapter that summarizes findings across all chapters and presents a school/university partnership model that can be used by those interested in forming, improving or researching similar partnership endeavors. There are no similar resources available in the field. Thus, this book makes an important contribution to the literature and to the world of practice and research. *Praise for Partnerships for Leadership Preparation and Development: Facilitators, Barriers and Models for Change*: Kochan, Reames and Griggs bring together the latest research and eleven case examples of university-practice partnerships for school leadership preparation and development. The volume provides keen insights into practices that can make or break an effective partnership, making it a valuable resource for those seeking to develop new partnerships, to enhance existing ones, and to engage in research on this topic. For those in the throes of redesign or leadership program improvement, it is an essential read. Michelle D. iteach principal certification: For White Folks Who Teach in the Hood... and the Rest of Y'all Too Christopher Emdin, 2017-01-03 A New York Times Best Seller Essential reading for all adults who work with black and brown young people...Filled with exceptional intellectual sophistication and necessary wisdom for the future of education.—Imani Perry, National Book Award Winner author of *South To America* An award-winning educator offers a much-needed antidote to traditional top-down pedagogy and promises to radically reframe the landscape of urban education for the better Drawing on his own experience of feeling undervalued and invisible in classrooms as a young man of color, Dr. Christopher Emdin has merged his experiences with more than a decade of teaching and researching in urban America. He takes to task the perception of urban youth of color as unteachable, and he challenges educators to embrace and respect each student's culture and to reimagine the classroom as a site where roles are reversed and students become the experts in their own learning. Putting forth his theory of Reality Pedagogy, Emdin provides practical tools to unleash the brilliance and eagerness of youth and educators alike—both of whom have been typecast and stymied by outdated modes of thinking about urban education. With this fresh and engaging new pedagogical vision, Emdin demonstrates the importance of creating a family structure and building communities within the classroom, using culturally relevant strategies like hip-hop music and call-and-response, and connecting the experiences of urban youth to indigenous populations globally. Merging real stories with theory, research, and practice, Emdin demonstrates how by implementing the “Seven Cs” of reality pedagogy in their own classrooms, urban youth of color benefit from truly transformative education.

iteach principal certification: **The Knowledge Gap** Natalie Wexler, 2020-08-04 The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension skills at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

iteach principal certification: Getting Value Out of Value-Added National Academy of Education, National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Value-Added Methodology for Instructional Improvement, Program Evaluation, and Educational Accountability, 2010-01-25 Value-added methods refer to efforts to estimate the relative contributions of specific teachers, schools, or programs to student test performance. In recent years, these methods have attracted considerable attention because of their potential applicability for educational accountability, teacher pay-for-performance systems, school and teacher improvement, program evaluation, and research. Value-added methods involve complex statistical models applied to test data of varying quality. Accordingly, there are many technical challenges to ascertaining the degree to which the output of these models provides the desired estimates. Despite a substantial amount of research over the last decade and a half, overcoming these challenges has proven to be very difficult, and many questions remain unanswered-at a time when there is strong interest in implementing value-added models in a variety of settings. The National Research Council and the National Academy of Education held a workshop, summarized in this volume, to help identify areas of emerging consensus and areas of disagreement regarding appropriate uses of value-added methods, in an effort to provide research-based guidance to policy makers who are facing decisions about whether to proceed in this direction.

I have a BA in Communications and an MA in Adult Education along with 15 years of experience as a Corporate Trainer and Leadership Coach, but what has helped me the most to overcome my struggles and to conquer all of my goals, are the tools I use now to coach my clients.
