However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

jay s journal pdf: **Illegal Mining** Yuliya Zabyelina, Daan van Uhm, 2020-10-05 This book provides a comprehensive analysis of the illegal extraction of metals and minerals from the perspectives of organized crime theory, green criminology, anti-corruption studies, and victimology. It includes contributions that focus on organized crime-related offences, such as drug trafficking and trafficking in persons, extortion, corruption and money laundering and sheds light on the serious environmental harms caused by illegal mining. Based on a wide range of case studies from the Amazon rainforest through the Ukrainian flatlands to the desert-like savanna of Central African Republic and Australia's elevated plateaus, this book offers a unique insight into the illegal mining business and the complex relationship between organized crime, corruption, and ecocide. This is the first book-length publication on illegal extraction, trafficking in mined commodities, and ecocide associated with mining. It will appeal to scholars working on organized crime and green crime, including criminologists, sociologists, anthropologists, and legal scholars. Practitioners and the general public may welcome this comprehensive and timely publication to contemplate on resource-scarcity, security, and crime in a rapidly changing world.

jay s journal pdf: **From Jim Crow to Jay-Z** Miles White, 2011-11-14 This multilayered study of the representation of black masculinity in musical and cultural performance takes aim at the reduction of African American male culture to stereotypes of deviance, misogyny, and excess. Broadening the significance of hip-hop culture by linking it to other expressive forms within popular culture, Miles White examines how these representations have both encouraged the demonization of young black males in the United States and abroad and contributed to the construction of their

identities. From Jim Crow to Jay-Z traces black male representations to chattel slavery and American minstrelsy as early examples of fetishization and commodification of black male subjectivity. Continuing with diverse discussions including black action films, heavyweight prizefighting, Elvis Presley's performance of blackness, and white rappers such as Vanilla Ice and Eminem, White establishes a sophisticated framework for interpreting and critiquing black masculinity in hip-hop music and culture. Arguing that black music has undeniably shaped American popular culture and that hip-hop tropes have exerted a defining influence on young male aspirations and behavior, White draws a critical link between the body, musical sound, and the construction of identity.

jay s journal pdf: *Crime, Shame and Reintegration* John Braithwaite, 1989-03-23 *Crime, Shame and Reintegration* is a contribution to general criminological theory. Its approach is as relevant to professional burglary as to episodic delinquency or white collar crime. Braithwaite argues that some societies have higher crime rates than others because of their different processes of shaming wrongdoing. Shaming can be counterproductive, making crime problems worse. But when shaming is done within a cultural context of respect for the offender, it can be an extraordinarily powerful, efficient and just form of social control. Braithwaite identifies the social conditions for such successful shaming. If his theory is right, radically different criminal justice policies are needed - a shift away from punitive social control toward greater emphasis on moralizing social control. This book will be of interest not only to criminologists and sociologists, but to those in law, public administration and politics who are concerned with social policy and social issues.

jay s journal pdf: *Think Like a Monk* Jay Shetty, 2020-09-08 Jay Shetty, social media superstar and host of the #1 podcast *On Purpose*, distills the timeless wisdom he learned as a monk into practical steps anyone can take every day to live a less anxious, more meaningful life. When you think like a monk, you'll understand: -How to overcome negativity -How to stop overthinking -Why comparison kills love -How to use your fear -Why you can't find happiness by looking for it -How to learn from everyone you meet -Why you are not your thoughts -How to find your purpose -Why kindness is crucial to success -And much more... Shetty grew up in a family where you could become one of three things—a doctor, a lawyer, or a failure. His family was convinced he had chosen option three: instead of attending his college graduation ceremony, he headed to India to become a monk, to meditate every day for four to eight hours, and devote his life to helping others. After three years, one of his teachers told him that he would have more impact on the world if he left the monk's path to share his experience and wisdom with others. Heavily in debt, and with no recognizable skills on his résumé, he moved back home in north London with his parents. Shetty reconnected with old school friends—many working for some of the world's largest corporations—who were experiencing tremendous stress, pressure, and unhappiness, and they invited Shetty to coach them on well-being, purpose, and mindfulness. Since then, Shetty has become one of the world's most popular influencers. In 2017, he was named in the *Forbes* magazine 30-under-30 for being a game-changer in the world of media. In 2018, he had the #1 video on Facebook with over 360 million views. His social media following totals over 38 million, he has produced over 400 viral videos which have amassed more than 8 billion views, and his podcast, *On Purpose*, is consistently ranked the world's #1 Health and Wellness podcast. In this inspiring, empowering book, Shetty draws on his time as a monk to show us how we can clear the roadblocks to our potential and power. Combining ancient wisdom and his own rich experiences in the ashram, *Think Like a Monk* reveals how to overcome negative thoughts and habits, and access the calm and purpose that lie within all of us. He transforms abstract lessons into advice and exercises we can all apply to reduce stress, improve relationships, and give the gifts we find in ourselves to the world. Shetty proves that everyone can—and should—think like a monk.

jay s journal pdf: From Research to Manuscript Michael J. Katz, 2006-07-10 From Research to Manuscript, written in simple, straightforward language, explains how to understand and summarize a research project. It is a writing guide that goes beyond grammar and bibliographic formats, by demonstrating in detail how to compose the sections of a scientific paper. This book takes you from the data on your desk and leads you through the drafts and rewrites needed to build a thorough, clear science article. At each step, the book describes not only what to do but why and how. It discusses why each section of a science paper requires its particular form of information, and it shows how to put your data and your arguments into that form. Importantly, this writing manual recognizes that experiments in different disciplines need different presentations, and it is illustrated with examples from well-written papers on a wide variety of scientific subjects. As a textbook or as an individual tutorial, From Research to Manuscript belongs in the library of every serious science writer and editor.

Bagga, 2021-10-29 In the present era dominated by computers, graph theory has come into its own as an area of mathematics, prominent for both its theory and its applications. One of the richest and most studied types of graph structures is that of the line graph, where the focus is more on the edges of a graph than on the vertices. A subject worthy of exploration in itself, line graphs are closely connected to other areas of mathematics and computer science. This book is unique in its extensive coverage of many areas of graph theory applicable to line graphs. The book has three parts. Part I covers line graphs and their properties, while Part II looks at features that apply specifically to directed graphs, and Part III presents generalizations and variations of both line graphs and line digraphs. Line Graphs and Line Digraphs is the first comprehensive monograph on the topic. With minimal prerequisites, the book is accessible to most mathematicians and computer scientists who have had an introduction graph theory, and will be a valuable reference for researchers working in graph theory and related fields.

jay s journal pdf: *Analysis of Energy Systems* Vincenzo Bianco, 2017-05-12 The analysis of energy systems is of paramount importance in modern societies, since it is fundamental to guarantee a sustainable economic development. It combines technical and economic research with a specific focus on quantitative modelling, in order to optimize the modalities of energy demand and supply globally. The book covers major advanced topics related to the analysis of energy by considering different aspects, namely management, planning and policies. The most recent trends, such as smart grids, transition from fossil fuels to renewables based energy systems and distributed generation, are also discussed in this book. Intended to be a collection of various contributions from experts all around the world, it includes latest research results, innovations and methodologies about the analysis of energy systems. The book also focuses to contribute to the current debate related to the evolution of energy systems, by discussing in an open way the pro's and con's without any pre-constituted point of view. Title is aimed to be a reference for the academic community, students and professionals with a wider interdisciplinary background. Key Features: Presents integration of renewable sources with conventional energy systems. Topic is addressed from a multidisciplinary point of view, i.e. economy, technical, modelling, planning. Investigates management and planning aspects of future energy supplies. Multidimensional nature of energy systems is highlighted and discussed. Contributes towards implementing policy measures to reduce primary energy consumptions and carbon footprint.

jay s journal pdf: *The Handbook of Social Work and Social Development in Africa* Mel Gray, 2016-10-26 All recent books on international social work mention Africa only briefly and few engage with the broader field of development studies. This book focuses solely on the unique African context engaging with issues relating to social work and development more broadly thus enabling a deeper examination and more complex and nuanced picture to emerge. Unlike most academic works, this book highlights multiple practitioner voices, with authors or co-authors that have recently been or are currently practising social workers. As an edited book, it draws from both academic research as well as lived practice experience, supported by strong theoretical positioning and guidance in introductory chapters, drawing on African literature, wherever possible. Looking at case-studies from Lesotho, Botswana, Kenya, Zimbabwe, Ethiopia, Namibia, Uganda, Nigeria, Kenya, South Africa, Rwanda, Zambia and Tanzania and covering established areas of practice such as child protection; working with older people; working with people with disabilities; mental health; and mainstream services targeting women as well as emerging areas of developmental social work

practice, such as humanitarian assistance in post-conflict situations; work with immigrants and refugees; and the training of community-based workers, this book takes a future-oriented perspective that aims to move beyond well-worn critiques to envision constructive and sustainable futures for social work and social development in Africa from a critical perspective.

jay s journal pdf: Gender, Sexuality and Identities of the Borderlands Suzanne Clisby, 2020-05-26 Drawing on border thinking, postcolonial and transnational feminisms, and queer theory, *Gender, Sexuality and Identities of the Borderlands* brings an intersectional feminist and queer lens to understandings of borderlands, liminality, and lives lived at the margins of socio-cultural and sexual normativities. Bringing together new and contemporary interdisciplinary research from across diverse global contexts, this collection explores the lived experiences of what Gloria Anzaldúa might have called 'threshold people', people who live among and in-between different worlds. While it is often challenging, difficult, and even dangerous, inhabiting marginal spaces, living at the borders of socio-cultural, religious, sexual, ethnic, or gendered norms can create possibilities for developing unique ways of seeing and understanding the worlds within which we live. This collection casts a spotlight on the margins, those 'queer spaces' in literary, cinematic, and cultural borderlands; postcolonial and transnational feminist perspectives on movement and migration; and critical analyses of liminal lives within and between socio-cultural borders. Each chapter within this unique book brings a critical insight into diverse global human experiences in the 21st Century.

jay s journal pdf: Dispute System Design Lisa Blomgren Amsler, Janet Martinez, Stephanie E. Smith, 2020-06-02 *Dispute System Design* walks readers through the art of successfully designing a system for preventing, managing, and resolving conflicts and legally-framed disputes. Drawing on decades of expertise as instructors and consultants, the authors show how dispute systems design can be used within all types of organizations, including business firms, nonprofit organizations, and international and transnational bodies. This book has two parts: the first teaches readers the foundations of Dispute System Design (DSD), describing bedrock concepts, and case chapters exploring DSD across a range of experiences, including public and community justice, conflict within and beyond organizations, international and comparative systems, and multi-jurisdictional and complex systems. This book is intended for anyone who is interested in the theory or practice of

DSD, who uses or wants to understand mediation, arbitration, court trial, or other dispute resolution processes, or who designs or improves existing processes and systems.

jay s journal pdf: Risk and Choice in Maternity Care Andrew Symon, 2006-01-01 This title is directed primarily towards health care professionals outside of the United States. This book explores the complex interrelationship between risk and choice in maternity care, taking a close look at how high and low risk are defined and what impact this has on a woman's ability to exercise informed choices throughout pregnancy. It offers an international collaboration that highlights different perspectives on debated issues, with chapters on maternity care in the UK, United States, Australia, and Ireland contributed by midwives, obstetricians, risk management experts, and sociologists. The aim of this book is to illustrate the changing reality of risk management as it relates to maternity care, and to highlight risk management concerns that may limit the choices available to pregnant women. Clarifies how applications of risk affect the choices pregnant women are able to exercise. Locates pregnancy risk considerations within the overall scheme of risk management. Analyzes practitioners' responses to the requirements of risk management. Presents risk management and choice from the risk manager's perspective, providing an understanding of risk as a macro concept in health care. Highlights medico-legal opinions on exercising choice, underscoring the need for accurate information and the ability to make informed decisions. Two chapters examine women's perspectives on risk labeling and the impact this has on choice - one in which the concept of safety within maternity care is discussed, and one in which the views of women with defined risk factors are explored and their ability to make choices is evaluated. Two chapters written by health service risk managers discuss the differences between an inner-city approach and a rural approach to the debate surrounding risk and choice. Discusses midwifery's focus on normality in childbirth and considers how this viewpoint affects the risk dialogue, including a chapter on clinical trends in maternity care. An obstetric perspective on risk refutes criticisms of obstetricians as being more likely to impose risk labels and limit choices by discussing how risks and choices are presented and considered within obstetric care. Explores the debate surrounding a woman's right to have a home birth in Ireland, in light of its risk management climate. Two chapters discuss the collaboration between service users, midwives, and obstetricians in Australia regarding the organization and delivery of maternity care, as well as the views concerning risk among indigenous Australians. Perspectives from nurse-midwives in the U.S. discuss the complex relationships among nurse-midwives, obstetricians, and pregnant women with regard to choice, including views on risk within immigrant communities.

jay s journal pdf: Nothing to Hide Daniel J. Solove, 2011-05-31 If you've got nothing to hide, many people say, you shouldn't worry about government surveillance. Others argue that we must sacrifice privacy for security. But as Daniel J. Solove argues in this important book, these arguments and many others are flawed. They are based on mistaken views about what it means to protect

privacy and the costs and benefits of doing so. The debate between privacy and security has been framed incorrectly as a zero-sum game in which we are forced to choose between one value and the other. Why can't we have both? In this concise and accessible book, Solove exposes the fallacies of many pro-security arguments that have skewed law and policy to favor security at the expense of privacy. Protecting privacy isn't fatal to security measures; it merely involves adequate oversight and regulation. Solove traces the history of the privacy-security debate from the Revolution to the present day. He explains how the law protects privacy and examines concerns with new technologies. He then points out the failings of our current system and offers specific remedies. Nothing to Hide makes a powerful and compelling case for reaching a better balance between privacy and security and reveals why doing so is essential to protect our freedom and democracy--Jacket.

jay s journal pdf: Fatal Invention Dorothy Roberts, 2011-06-14 An incisive, groundbreaking book that examines how a biological concept of race is a myth that promotes inequality in a supposedly "post-racial" era. Though the Human Genome Project proved that human beings are not naturally divided by race, the emerging fields of personalized medicine, reproductive technologies, genetic genealogy, and DNA databanks are attempting to resuscitate race as a biological category written in our genes. This groundbreaking book by legal scholar and social critic Dorothy Roberts examines how the myth of race as a biological concept—revived by purportedly cutting-edge science, race-specific drugs, genetic testing, and DNA databases—continues to undermine a just society and promote inequality in a supposedly "post-racial" era. Named one of the ten best black nonfiction books 2011 by AFRO.com, *Fatal Invention* offers a timely and "provocative analysis" (Nature) of race, science, and politics that "is consistently lucid . . . alarming but not alarmist, controversial but evidential, impassioned but rational" (Publishers Weekly, starred review). "Everyone concerned about social justice in America should read this powerful book." —Anthony D. Romero, executive director, American Civil Liberties Union "A terribly important book on how the 'fatal invention' has terrifying effects in the post-genomic, 'post-racial' era." —Eduardo Bonilla-Silva, professor of sociology, Duke University, and author of *Racism Without Racists: Color-Blind Racism and the Persistence of Racial Inequality in the United States* "Fatal Invention is a triumph! Race has always been an ill-defined amalgam of medical and cultural bias, thinly overlaid with the trappings of contemporary scientific thought. And no one has peeled back the layers of assumption and deception as lucidly as Dorothy Roberts." —Harriet A. Washington, author of *and Deadly Monopolies: The Shocking Corporate Takeover of Life Itself*

jay s journal pdf: *More Readings From One Man's Wilderness* John Branson, 2012-02-07 Throughout history, many people have escaped to nature either permanently or temporarily to rest and recharge. Richard L. Proenneke, a modern-day Henry David Thoreau, is no exception. Proenneke built a cabin in Twin Lakes, Alaska in 1968 and began thirty years of personal growth, which he spent growing more connected to the wilderness in which he lived. This guide through Proenneke's memories follows the journey that began with *One Man's Wilderness*, which contains some of Proenneke's journals. It continues the story and reflections of this mountain man and his time in Alaska. The editor, John Branson, was a longtime friend of Proenneke's and a park historian. He takes care that Proenneke's journals from 1974-1980 are kept exactly as the author wrote them. Branson's footnotes give a background and a new understanding to the reader without detracting from Proenneke's style. Anyone with an interest in conservation and genuine wilderness narratives will surely enjoy and treasure this book.

jay s journal pdf: New Battlefields/Old Laws William C. Banks, 2011-10-25 An internationally-recognized authority on constitutional law, national security law, and counterterrorism, William C. Banks believes changing patterns of global conflict are forcing a reexamination of the traditional laws of war. The Hague Rules, the customary laws of war, and the post-1949 law of armed conflict no longer account for nonstate groups waging prolonged campaigns of terrorism—or even more conventional insurgent attacks. Recognizing that many of today's conflicts are low-intensity, asymmetrical wars fought between disparate military forces, Banks's collection analyzes nonstate armed groups and irregular forces (such as terrorist and insurgent groups, paramilitaries, child soldiers, civilians participating in hostilities, and private military firms) and their challenge to international humanitarian law. Both he and his contributors believe gaps in the laws of war leave modern battlefields largely unregulated, and they fear state parties suffer without guidelines for responding to terrorists and their asymmetrical tactics, such as the targeting of civilians. These gaps also embolden weaker, nonstate combatants to exploit forbidden strategies and violate the laws of war. Attuned to the contested nature of post-9/11 security and policy, this collection juxtaposes diverse perspectives on existing laws and their application in contemporary conflict. It sets forth a legal definition of new wars, describes the status of new actors, charts the evolution of the twenty-first-century battlefield, and balances humanitarian priorities with military necessity. While the contributors contest each other, they ultimately reestablish the legitimacy of a long-standing legal corpus, and they rehumanize an environment in which the most vulnerable targets, civilian populations, are themselves becoming weapons against conventional power.

jay s journal pdf: Maritime Spatial Planning Jacek Zaucha, Kira Gee, 2018-01-01 This book is open access under a CC BY 4.0 license Maritime or marine spatial planning has gained increasing prominence as an integrated, common-sense approach to promoting sustainable maritime development. A growing number of countries are engaged in preparing and implementing maritime spatial plans: however, questions are emerging from the growing body of MSP experience. How can maritime spatial planning deal with a complex and dynamic environment such as the sea? How can MSP be embedded in multiple levels of governance across regional and national borders – and how far does the environment benefit from this new approach? This open access book is the first comprehensive overview of maritime spatial planning. Situated at the intersection between theory and practice, the volume draws together several strands of interdisciplinary research, reflecting on the history of MSP as well as examining current practice and looking towards the future. The authors and contributors examine MSP from disciplines as diverse as geography, urban planning, political science, natural science, sociology and education; reflecting the growing critical engagement with MSP in many academic fields. This innovative and pioneering volume will be of interest and value to students and scholars of maritime spatial planning, as well as planners and practitioners. Jacek Zaucha is Professor of Economics at Gdansk University, Poland. He is long experienced in maritime spatial planning, and is currently leading the team preparing the first plan for Polish waters. Kira Gee is Research Associate at the Centre for Materials and Coastal Research (Helmholtz-Zentrum Geesthacht), Germany. She has been involved in MSP research and practice for over 20 years, and has participated in numerous national and transnational European MSP projects.
